CheckPoint Check Point Certified Security Expert - R82 Sample Questions (Q81-Q86):

NEW QUESTION # 81

In a standard HA configuration, what is known as Collision Mode?

- A. This happens when the Primary and Secondary Management Servers do have issues in synchronizing their respective local time.
- B. There are situations where there might be more than one Standby Management Servers.
- C. There are situations where there might be more than one Primary Management Servers.
- **D. There are situations where there might be more than one Active Management Servers.**

Answer: D

Explanation:

Collision Mode occurs when both Management Servers mistakenly assume the active role simultaneously, resulting in multiple active servers, which can cause database conflicts and inconsistent policy deployment.

NEW QUESTION # 82

Network Feed objects are used as a Source or Destination in Access Control, HTTPS Inspection, and Threat Prevention Policies. What file formats are supported for download in Network Feed objects?

- **A. Flat list or JSON**
- B. Flat list only
- C. JSON only
- D. Flat list and XML

Answer: A

Explanation:

Network Feed objects support downloading external intelligence data in either flat list (plain text) or JSON format, allowing Security Gateways to parse and dynamically update IP addresses or networks for use in policy enforcement.

NEW QUESTION # 83

In what way is Secure Network Distributor (SND) a relevant feature of the Security Gateway?

- A. SND is an alternative to IPSec Main Mode, using only 3 packets.
- B. SND is a feature to accelerate multiple SSL VPN connections
- C. SND is a feature of fw monitor to capture accelerated packets
- **D. SND is used to distribute packets among Firewall instances**

Answer: D

NEW QUESTION # 84

Alice knows about the Check Point Management HA installation from Bob and needs to know which Check Point Security Management Server is currently in "Active" state. Alice uses the Check Point SmartConsole tool. Which Check Point Console is needed to lookup for the Management High Availability status?

- A. SmartUpdate -> Package Repository -> Management High Availability
- B. Gaia Portal -> Overall View -> Management High Availability
- C. SmartView Tracker -> Log Search "Mgmt HA Status"
- **D. Check Point SmartConsole -> Applications Menu -> Management High Availability**

Answer: D

Explanation:

The Management High Availability status is viewed directly in SmartConsole through the Applications menu, where the Management High Availability view displays which management server is currently active and which is standby.

NEW QUESTION # 85

What is correct regarding the target device for deploying SmartEvent components?

- A. SmartEvent is always a dedicated Standalone exclusive device
- B. SmartEvent is just a blade on Security Management Server and can be activated on a Primary or Secondary SMS only
- C. SmartEvent works by correlating logs, hence it has to be deployed on each log server. If any log server does not include SmartEvent components then its logs will not be correlated
- **D. SmartEvent can be integrated with the Security Management Server, or deployed on a dedicated Log or SmartEvent Server**

Answer: D

Explanation:

SmartEvent components can be deployed on the Security Management Server, on a dedicated Log Server, or on a dedicated SmartEvent Server, allowing flexible architecture depending on performance and scalability requirements.

NEW QUESTION # 86

.....
