And the questions and answers of our E\_ACTAI\_2403 practice materials are closely related with the real exam. Besides, they constantly keep the updating of products to ensure the accuracy of questions. All E\_ACTAI\_2403 Actual Exams are 100 percent assured. Besides, we price the

E\_ACTAI\_2403 actual exam with reasonable fee without charging anything expensive.

## **SAP Certified Specialist - Project Manager - SAP Activate for Agile Implementation Management Sample Questions (Q11-Q16):**

### **NEW QUESTION # 11**

What solution operations framework can customers use to create a joint business and IT organization?

- A. Customer Center of Expertise
- B. Transformation Management Office
- C. Solution Standardization Board
- D. SAP Roadmap Explorer

**Answer: A**

Explanation:

The correct solution operations framework that customers can use to create a joint business and IT organization is:

\* A. Customer Center of Expertise: This framework helps organizations to develop internal competencies and capabilities necessary to maximize the value of their SAP solutions, fostering a collaborative environment between business and IT. Options B (SAP Roadmap Explorer), C (Solution Standardization Board), and D (Transformation Management Office) are valuable tools and organizational structures but do not specifically serve to create a joint business and IT organization as effectively as a Customer Center of Expertise. References:

\* SAP solution operations frameworks documentation  
\* Best practices for SAP project and solution management

### **NEW QUESTION # 12**

What should the project team consider when defining their sprint duration and cadence? Note: There are 2 correct answers to this question.

- A. Sprint duration between 1 week to 4 weeks.
- B. Establish fixed duration of each sprint.
- C. Adjust sprint duration based on team availability.
- D. Set variable sprint duration based on work.

**Answer: A,B**

Explanation:

When defining their sprint duration and cadence, the project team should consider:

\* A. Sprint duration between 1 week to 4 weeks: This is the typical range for sprint durations in Agile methodologies. It balances the need for frequent feedback with the practicalities of meaningful work increments.  
\* D. Establish fixed duration of each sprint: Setting a fixed duration for sprints helps establish a consistent rhythm for the team, making planning and progress tracking easier and more predictable.

Adjusting sprint duration based on team availability (Option B) and setting variable sprint durations based on work (Option C) can lead to inconsistencies that disrupt the team's rhythm and make it difficult to measure progress across sprints. References:

SAP Activate Elements

### **NEW QUESTION # 13**

What information does the Scrum team need before they can correctly estimate the relative size of backlog user stories? Note: There are 2 correct answers to this question.

- A. Definition of Done
- B. Number of backlog user stories
- C. Definition of Ready
- D. Anchor user story in the backlog

**Answer: A,C**

Explanation:

#### Agile Project Planning

Before the Scrum team can correctly estimate the relative size of backlog user stories, they need specific information that includes:

\* A. Definition of Done: This clarifies what criteria must be met for the user stories to be considered complete. Understanding the Definition of Done helps the team accurately estimate the effort required to fulfill these criteria.

\* D. Definition of Ready: This ensures that user stories are adequately prepared and meet all necessary conditions for the team to start work on them. A clear Definition of Ready helps in determining if the story is actionable and estimable.

Both the Definition of Done and the Definition of Ready provide critical context that impacts how the team evaluates the work and complexity involved, ensuring more accurate and consistent estimations. References:

\* Scrum methodology guides

\* Agile estimation techniques

### NEW QUESTION # 14

What are key goals of the burndown chart? Note: There are 2 correct answers to this question.

- A. Determination of the overall availability of the team for the future sprints
- B. **Visualization of the size of the backlog consumed so far**
- C. Assignment of backlog items to future sprint up to completion of the release
- D. **Determination of the planned go-live date based on current velocity**

**Answer: B,D**

Explanation:

Key goals of the burndown chart in Agile project delivery include:

\* C. Visualization of the size of the backlog consumed so far: The burndown chart provides a visual representation of work completed over time against the total work scope, helping teams track progress and pace.

\* D. Determination of the planned go-live date based on current velocity: By analyzing the rate at which the team is completing work, project managers can forecast when the project is likely to be completed, which aids in planning for the go-live date.

Options A (Determination of the overall availability of the team for the future sprints) and B (Assignment of backlog items to future sprint up to completion of the release) are not direct goals of the burndown chart; these aspects are more related to sprint planning and capacity management. References:

\* Agile project management tools and their uses

\* Effective use of burndown charts in project management

Agile Project Delivery

### NEW QUESTION # 15

You are defining the testing strategy for your project.

What would you include in a scope of Integration Test? Note: There are 2 correct answers to this question.

- A. Quality of data for migration
- B. Connectivity between database and application servers
- C. **Interfaces with other applications**
- D. **Functionality of end-to-end business processes**

**Answer: C,D**

### NEW QUESTION # 16

.....
