Citrix Deploy and Manage Citrix ADC 13 with Citrix Gateway Sample Questions (Q160-Q165):

NEW QUESTION # 160

A Citrix Administrator wants to configure independent and isolated access on a single appliance to allow three different departments to manage and isolate their own applications.

What can the administrator configure to isolate department-level administration?

- A. A VIP in each partition, and bind a VLAN for the department
- B. Policy-based routes for each department in the nsroot partition
- **C. Admin partitions that use dedicated VLANs**
- D. Dedicated routes in the admin partitions for each department

Answer: C

NEW QUESTION # 161

Scenario: A Junior Citrix Administrator needs to create a content switching virtual server on a Citrix ADC high availability (HA) pair. The NSIP addresses are 192.168.20.10 and 192.168.20.11. The junior administrator connects to NSIP address 192.168.20.10 and saves the changes.

The following day, a Senior Citrix Administrator tests the new content switching virtual server, but it is NOT working. The senior administrator connects to the HA pair and discovers that everything the junior administrator configured is NOT visible.

Why has the Citrix ADC lost the newly added configurations?

- A. The Citrix ADC appliances have different firmware versions.
- B. The junior administrator made the changes and did NOT force a failover to save the configurations.
- **C. Both Citrix ADCs in the HA pair restarted overnight.**
- D. The junior administrator connected to the NSIP of the secondary Citrix ADC in the HA pair.

Answer: C

NEW QUESTION # 162

What can a Citrix Administrator configure to access RDP shortcuts?

- A. Intranet applications
- B. Split tunneling
- C. Next hop server
- **D. Bookmarks**

Answer: D
