

Scrum PSPO-I證照 - PSPO-I考題資源

從Google Drive中免費下載最新的VCESoft PSPO-I PDF版考試題庫：<https://drive.google.com/open?id=1p1tYT-gOzfBQJ8FgRmVnvEZI1dz6m-z>

適當的選擇培訓是成功的保證，但是選擇是相當重要的，VCESoft的知名度眾所周知，沒有理由不選擇它。當然，如果涉及到完善的培訓資料給你，如果你不適用那也是沒有效果的，所以在利用我們VCESoft的培訓資料之前，你可以先下載部分免費試題及答案作為試用，這樣你可以做好最真實的考試準備，以便輕鬆自如的應對PSPO-I測試，這也是為什麼成千上萬的考生依賴我們VCESoft的重要原因之一，我們提供的是最好最實惠最完整的PSPO-I考試培訓資料，以至於幫助他們順利通過測試。

Scrum PSPO-I（專業Scrum產品所有者i）認證考試是全球認可的認證，可驗證專業人員在產品所有權領域的知識和技能。該考試旨在測試候選人對Scrum框架，產品所有權角色和職責，產品願景和利益相關者管理的理解。

>> Scrum PSPO-I證照 <<

最有效的PSPO-I證照，由Scrum權威專家撰寫

Scrum的PSPO-I考古題覆蓋了最新的考試指南，根據真實的PSPO-I考試真題編訂，確保每位考生順利通過PSPO-I考試。如果在考試過程中變題了，考生可以享受免費更新一年的考題服務，保障了考生的權利。PSPO-I考試適合於Scrum技術人士開發，目的是為了測驗考生基於各種平臺的設計和開發應用知識技能。考生要考取PSPO-I認證，必須要擁有兩年開發技術領域的能力。

最新的 Professional Scrum Product Owner PSPO-I 免費考試真題 (Q58-Q63):

問題 #58

Which of the following are Scrum Values?

- A. Commitment
- B. Courage
- C. Focus
- D. Respect
- E. Collaboration
- F. Openness
- G. Maximize Value
- H. Inspection

答案：A,B,C,D,F

問題 #59

Which is NOT a valid consideration when ordering a Product Backlog?
(choose the best answer)

- A. Alignment with business strategy and goals.
- B. Dependencies on other Product Backlog items.
- C. Risk.
- D. Importance to customers.
- E. Tools and techniques.

答案: E

解題說明:

* The Product Backlog is an ordered list of everything that is known to be needed in the product. It is the single source of truth for the Scrum Team and the stakeholders. It contains all the requirements, features, functions, enhancements, fixes, and anything else that can deliver value to the customers and users of the product.

* The Product Owner is accountable for ordering the Product Backlog. The Product Owner orders the items in the Product Backlog based on factors such as value, risk, priority, dependency, feedback, or market conditions. The order of the Product Backlog items provides a clear and consistent indication of what is most important and urgent for the product. The order of the Product Backlog items also helps the Scrum Team and the stakeholders to plan and forecast effectively.

* The tools and techniques used to create, manage, or refine the Product Backlog are not a valid consideration when ordering the Product Backlog. The tools and techniques are means to an end, not an end in themselves. The tools and techniques do not affect the value or quality of the product or service delivered. The tools and techniques may vary from one Product Owner to another, depending on their preferences, skills, or context. The tools and techniques may also change over time, as new technologies or practices emerge or evolve.

問題 #60

The Product Owner is the person who will be held accountable if a product does not achieve its goals or deliver value. Does this mean that the Product Owner has the final say over the Definition of Done?
(choose the best answer)

- A. Yes, the Product Owner decides the Definition of Done. The Developers may be consulted.
- B. No, the Scrum Team decides the Definition of Done, if it is not a standard of the organization. The Product Owner is just one member of the Scrum Team.

答案: B

解題說明:

* The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product. The Definition of Done is used to assess when work is complete on the product Increment.

* The Definition of Done is defined by the Scrum Team, not by the Product Owner alone. The Scrum Team consists of one Product Owner, one Scrum Master, and Developers. They are all accountable for creating a valuable, useful, and potentially releasable product Increment each Sprint.

* The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. The Product Owner is responsible for managing and refining the Product Backlog, collaborating with the stakeholders and the Developers, and ordering the items in a way that best achieves goals and missions. The Product Owner represents the interests of everyone with a stake in the product and ensures that the Scrum Team works on the right things at the right time.

* The Developers are accountable for creating a "Done" Increment that meets the Definition of Done each Sprint. The Developers are responsible for planning and executing the Sprint Backlog, designing and building the product functionality, testing and improving the product quality, and delivering a potentially releasable Increment. The Developers work closely with the Product Owner to understand and clarify the Product Backlog items, provide feedback and estimates, and suggest improvements and innovations.

* The Scrum Master is accountable for establishing Scrum as defined in the Scrum Guide. The Scrum Master is responsible for promoting and supporting Scrum as defined in the Scrum Guide. The Scrum Master does this by helping everyone understand Scrum theory and practice, both within the Scrum Team and the organization.

* The Definition of Done may vary from one Scrum Team to another, depending on the context and domain of work. However, it

must be consistent within one team. If there are multiple Scrum Teams working on one product, they must share a common Definition of Done. If there is an organizational standard for a Definition of Done, all Scrum Teams must follow it as a minimum. References:

問題 #61

Five new Scrum Teams have been created to build one product. A few of the Developers on one of the Scrum Teams ask the Scrum Master how to coordinate their work with the other teams. What should the Scrum Master do? (choose the best answer)

- A. Collect the Sprint tasks from the teams at the end of their Sprint Planning and merge that into a consolidated plan for the entire Sprint.
- **B. Teach them that it is their responsibility to work with the other teams to create an integrated Increment that is inclusive of all five team's work.**
- C. Teach the Product Owner to work with the lead developers on ordering Product Backlog in a way to avoid too much overlap during a Sprint.
- D. Visit the five teams each day to inspect that their Sprint Backlogs are aligned.

答案: B

解題說明:

Explanation

Teach them that it is their responsibility to work with the other teams to create an integrated Increment that is inclusive of all five team's work.

Explanation: According to the Scrum Guide, the Scrum Team is responsible for all product-related activities, including coordination and integration with other teams. The Scrum Master should teach the Developers how to work with the other teams to create a potentially releasable product increment that meets the Definition of Done and the Product Goal. One way to facilitate this coordination is to use a Scrum of Scrums meeting, which is a daily or periodic meeting where representatives from each team share their progress, plans, and impediments. The Scrum of Scrums meeting is not mandatory, but it can help the teams align their work and resolve dependencies.

The other options are not correct because they violate the principles of Scrum, such as self-management, empiricism, and transparency:

B: Collecting the Sprint tasks from the teams and merging them into a consolidated plan for the entire Sprint is a centralized and controlled way of coordination that undermines the self-management and autonomy of the teams. The Scrum Master should not act as a project manager or a coordinator, but as a servant-leader and a coach who enables the teams to manage their own work.

C: Visiting the five teams each day to inspect that their Sprint Backlogs are aligned is a micromanagement and inspection approach that does not respect the trust and transparency of the teams.

The Scrum Master should not interfere with the work of the teams, but support them in creating a shared understanding of the product vision, goals, and requirements.

D: Teaching the Product Owner to work with the lead developers on ordering Product Backlog in a way to avoid too much overlap during a Sprint is a suboptimal and inefficient way of coordination that does not leverage the collective intelligence and creativity of the teams. The Product Owner should not rely on a few individuals to order the Product Backlog, but collaborate with all the teams and stakeholders to maximize value delivery.

References:

[Scrum Guide], section 2.2: "The Scrum Team is responsible for all product-related activities from stakeholder collaboration, verification, maintenance, operation, experimentation, research and development, and anything else that might be required." Scrum Of Scrums - Guide to Agile Scaling Frameworks - Agilest: "The coordination of the various teams is done in a Scrum of Scrums meeting which can be held daily, twice a week, or at a minimum, once a week. Each Scrum team has its ScrumMaster or a designated team member attend the Scrum of Scrum meeting as its representative."

問題 #62

A Product Owner is accountable for maximizing the value of the product that is the result of the work of the Scrum Team. Which of the following can be delegated to others, while the Product Owner remains accountable for the work? (choose the best two answers)

- A. Developing and communicating the Product Goal.
- B. Attending the Sprint Review.
- C. Attending the Sprint Retrospective.
- D. Ordering Product Backlog items.

答案： B,C

解題說明：

A Product Owner is accountable for maximizing the value of the product that is the result of the work of the Scrum Team. However, they can delegate some of their responsibilities to others, while still remaining accountable for the work. Two of the responsibilities that can be delegated to others are:

* Attending the Sprint Retrospective. The Sprint Retrospective is an event where the Scrum Team inspects how the last Sprint went with regards to individuals, interactions, processes, tools, and their Definition of Done. The purpose of the Sprint Retrospective is to plan ways to improve quality and effectiveness.

The Product Owner may attend the Sprint Retrospective as one of the Scrum Team members who has a stake in the outcome of the product development. However, they can also choose not to attend or delegate their attendance to someone else who can represent their interests and perspectives.

* Attending the Sprint Review. The Sprint Review is an event where the Scrum Team and stakeholders inspect the Increment and adapt the Product Backlog if needed. The purpose of the Sprint Review is to elicit feedback and foster collaboration. The Product Owner is accountable for ensuring that key stakeholders attend the Sprint Review and that they understand what has been done and what can be done next. However, they can also delegate some of their tasks to others who can facilitate or present the Increment on their behalf.

Other options, such as ordering Product Backlog items or developing and communicating the Product Goal, are not responsibilities that can be delegated to others by the Product Owner. They are essential accountabilities that only the Product Owner can perform.
