## Questions (Q89-Q94):

### NEW QUESTION # 89

An admin wants to create new custom metric on the Account product period forecast component . What need to be done to make the metric available on the Account forecast component?

- A. Create a custom field on Account Forecast, create a custom of field on account product, map both of new fields in the account forecast setting page.
- **B. Create a custom of field on account product period forecast, , create a custom of field on account product forecast, map both of new fields in the account forecast setting page.**
- C. Create a custom of field on account forecast adjustment, Create a custom of field on account forecast adjustment period, map both of new fields in the account forecast setting page.
- D. Create a custom of field on Sales agreement product, Create a custom of field on Sales agreement product period, map both of new fields in the Sales agreement setting page

**Answer: B**

Explanation:

According to the Salesforce Manufacturing Cloud documentation, to create a new custom metric on the Account product period forecast component, you need to create a custom field on the Account Product Period Forecast object and another custom field on the Account Product Forecast object. Then, you need to map both of these fields in the Account Forecast setting page. This will allow you to add the custom metric to the Forecast tab of an account and track it along with the standard metrics<sup>1</sup>. References: 1: Create Custom Fields for Account Product Forecast and Account Product Period Forecast Objects

### NEW QUESTION # 90

What is the recommended way to calculate an Account Based Forecast for the next 13 months in the formula builder?

- A. Create a two-part formula for periods 1-12 and period 13.
- B. Create a two-part validation rule for periods 1-12 and period 13.
- **C. Create separate formulas for periods 1-12 and period 13.**
- D. Create an approval process for periods 1-12 and period 13.
- E. Create 13 separate formulas.

**Answer: C**

### NEW QUESTION # 91

During the discovery phase, sales leadership at Universal Containers says that their run rate business is hard to forecast because their customer constantly orders more or fewer engine control units than contractually agreed upon.

Which Manufacturing Cloud capability should a consultant recommend for managers to discuss these variances with sales reps and for sales reps to monitor their customers?

- A. Set up the CRM Analytics template app and leverage embedded dashboards for forecast deviation on the Account page.
- **B. Leverage a Data Processing Engine (DPE) job to calculate the forecast deviation.**
- C. Use a formula field on the Sales Agreement Product Schedule object to calculate the forecast deviation.

**Answer: B**

Explanation:

Explanation

A Data Processing Engine (DPE) job is a Manufacturing Cloud feature that allows users to perform complex calculations on large data sets and store the results in custom objects. One of the use cases for DPE jobs is to calculate the forecast deviation, which is the difference between the planned and actual sales for a given period. By using a DPE job, users can compare the sales agreement quantities with the order quantities and generate a forecast deviation metric that can be used for reporting and analysis. This can help sales managers and reps to identify and address any variances in customer demand and adjust their sales strategies accordingly.

### NEW QUESTION # 92

The Financial Team ut Budger Power wants to be sure to pay out Rebates on Invoices that has Status Paid within Rebate nagemen

How can an Admin ensure that this requirement is fulfilled?

- **A. Additional steps are not needed Only transactions with Status = Paid are included in the Journal,**
- B. Create a custom field in Transaction Journal, copy Invoice Status data into custom field, then use as an eligibility condition in Rebate Types
- C. Validate invoice status in ERP before bringing into Salesforce.
- D. Update Data Processing Engine job to filter out transactions where Invoice status does not Paid

**Answer: A**

#### NEW QUESTION # 93

After selecting the manufacturing template in the community creation wizard, which tool can be used to customize in the site?

- **A. Experience Builder**
- B. Process Builder
- C. Template Builder
- D. Partner Builder
- E. Site Builder

**Answer: A**

Explanation:

Explanation

Experience Builder is the tool that can be used to customize the site after selecting the manufacturing template in the community creation wizard. Experience Builder is a point-and-click tool that lets you create pixel-perfect, responsive, and dynamic digital experiences for your customers, partners, and employees. You can use Experience Builder to customize the layout, branding, navigation, components, pages, and permissions of your site. You can also preview and publish your changes, and monitor the performance and usage of your site.
