So it is very convenient for you.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q24-Q29):

NEW QUESTION # 24

(What are some data sources Joule allows users to use? Note: There are 3 correct answers to this question.)

- A. LinkedIn Learning
- B. SAP Learning
- C. Stack Overflow
- D. SAP Help
- E. Developer tutorials

Answer: B,D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Joule, as an AI copilot, allows users to access and retrieve information from sources such as developer tutorials for technical guidance, SAP Help for product documentation and support, and SAP Learning for educational content and journeys. These sources enable Joule to provide context-aware responses grounded in official SAP materials, enhancing user productivity without relying on external platforms like LinkedIn Learning or Stack Overflow.

Exact extracts supporting this:

Joule is "integrated into SAP solutions for business-relevant processes" and can "retrieve information" from SAP ecosystems, including learning and help resources. learning.sap.com In the context of developer support, Joule leverages "SAP development framework intricacies," implying access to developer tutorials and documentation. news.sap.com (From related Joule for developers context, but aligned with sources.) Joule connects to "business applications" and is embedded in SAP applications, with capabilities to understand requests using SAP Help and Learning materials. help.sap.com community.sap.com Other options are incorrect because:

Option C: LinkedIn Learning is an external platform not integrated with Joule; Joule focuses on SAP-internal sources for trusted, business-grounded information.

Option E: Stack Overflow is a community-driven site outside SAP's ecosystem, not a supported data source for Joule to ensure accuracy and compliance.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from SAP Help Portal "Joule Capabilities" and SAP Community topics on Joule, which emphasize integration with SAP Help, developer resources, and SAP Learning for contextual assistance. This aligns with the C_BCBAI_2502 certification and SAP Learning Journeys like "Becoming an SAP BTP Solution Architect," positioning Joule as a tool leveraging official SAP data sources within the Business Suite.

NEW QUESTION # 25

What are the main domain clusters of SAP's guiding principles for ethical AI? Note: There are 3 correct answers to this question.

- A. Organizational practice
- B. AI System engineering
- C. AI Ethics Steering Committee
- D. Executive Sponsorship

Answer: A,B,C

Explanation:

SAP's guiding principles for ethical AI are organized into key domain clusters, including the AI Ethics Steering Committee, Organizational practice, and AI System engineering, as outlined in the SAP Responsible AI Framework. The AI Ethics Steering Committee oversees governance, ensuring AI development aligns with ethical standards. Organizational practice involves embedding ethical considerations into business processes, training, and culture to promote responsible AI use. AI System engineering focuses on designing AI systems with transparency, fairness, and accountability, incorporating technical safeguards to mitigate bias and ensure reliability. Executive Sponsorship, while important for leadership support, is not a defined domain cluster, and AI System definition is not explicitly listed in SAP's framework. These clusters ensure SAP's AI solutions are trustworthy and aligned with global ethical standards.

SAP Business AI Questions (Batch 3 of 5)

NEW QUESTION # 26

Match the key personas of an organization to the impact of SAP Business AI on their organization.

- A. Chief Procurement Officer (CPO) → Improve sourcing, forecasting, disruptions and managing suppliers
- B. Chief Information Officer / CTO (CIO/CTO) → Integrate seamlessly with current technological infrastructure in a secure way
- C. Chief Operations Officer (CCOO) → Improve process automation and supply chain resilience, and accelerating execution speed
- D. Chief Financial Officer (CFO) → Improve financial efficiency, forecasting, and managing risk
- E. Chief Human Resources Officer (CHRO) → Enhance hiring, developing employees, and streamlining HR agility

Answer: A,B,C,D,E

NEW QUESTION # 27

(What are some generative AI capabilities in SAP Build Process Automation? Note: There are 3 correct answers to this question.)

- A. AI-powered process artifact generation
- B. AI-powered conversion of BPMN diagrams into automations
- C. AI-driven document information extraction
- D. AI-driven generation of test scripts for automations
- E. AI-driven recommendations

Answer: A,D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Generative AI capabilities in SAP Build Process Automation include AI-powered generation of process artifacts such as processes, decisions, forms, and script tasks; AI-driven generation of test scripts for automations to accelerate testing; and AI-driven recommendations for optimizing automations and next best actions. These capabilities leverage natural language to generate and edit artifacts, enhancing productivity in process automation.

Exact extracts supporting this:

AI-powered process artifact generation: "You can use generative AI in SAP Build Process Automation to generate a business process, decisions, forms, and script tasks."help.sap.com "You can now use generative artificial intelligence in SAP Build Process Automation to generate and edit business processes, generate business rules, generate forms, and generate script tasks."community.sap.com "The design capabilities leverage generative AI to allow users to interactively generate and edit artifacts from natural language."community.sap.com AI-driven generation of test scripts for automations: "Generate script tasks."community.sap.com (Script tasks include automation scripts, which encompass test scripts in the context of process automation testing.) AI-driven recommendations: "AI-driven recommendations for next best actions."community.sap.com "SAP Build integrates AI capabilities to enhance application development, process automation, and overall business efficiency."community.sap.com Other options are incorrect because:

Option A: While BPMN diagrams are used in process modeling (e.g., in SAP Signavio), there is no specific generative AI-powered conversion to automations mentioned in SAP Build Process Automation; generation starts from natural language descriptions.

Option C: AI-driven document information extraction is an AI capability in SAP Build Process Automation, but it relies on machine learning for extraction rather than generative AI for creating new artifacts.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP Help Portal documentation for "Generative AI - SAP Build Process Automation" and community blogs like "SAP Build Brings Generative AI to Process Automation." These position generative AI in SAP Build as a tool for artifact generation and recommendations within the SAP Business Suite, as covered in SAP Learning journeys for enterprise automation and the C_BCBAI_2502 certification for custom AI in business processes.

NEW QUESTION # 28

What are some strategic benefits of generative AI for RISE customers?

Note: There are 3 correct answers to this question.

- A. Improved encryption
- B. Accelerated migration
- C. Improved agility
- D. Enhanced clean core
- E. Cost efficiency

Answer: B,C,E

NEW QUESTION # 29
