SAP C_WME_2506 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.
Topic 2	<ul style="list-style-type: none"> • Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.
Topic 3	<ul style="list-style-type: none"> • Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q37-Q42):

NEW QUESTION # 37

You're analyzing data in Insights, specifically the 'What Users Are Searching For' section. You see that users are not finding any helpful content for the search term 'profile' because 85% of the searches for that term are resulting in no action. However, you know that you have content published specific for help with 'profile.' What should you do?

- A. Give it more time. Users will eventually find the help.
- B. Adjust the jQuery for a step in the process.
- **C. Add Keywords to the content.**
- D. Remove any content related to 'profile.'

Answer: C

Explanation:

The 'What Users Are Searching For' section in WalkMe Insights reveals search terms entered by users in the WalkMe Menu and the percentage of searches that result in no action, indicating content gaps or discoverability issues. If 85% of searches for 'profile' result in no action, despite existing content, the issue is likely that the content is not properly indexed or tagged for search. Adding relevant keywords (e.g., 'profile,'

'account settings,' 'user profile') to the content's metadata in the WalkMe Editor improves its discoverability, ensuring it appears in search results when users enter related terms.

The other options are less effective:

* Giving it more time(A) does not address the discoverability issue, as users are already failing to find the content.

* Removing profile content(B) would worsen the problem by eliminating the existing help.

* Adjusting jQuery for a step(D) is irrelevant, as jQuery selectors affect element targeting, not search functionality.

Extract from Official WalkMe Documentation:

According to the WalkMe Insights User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 3.2: Analytics and Reporting):

"High 'no action' rates in the 'What Users Are Searching For' report suggest that content is not being found.

To resolve this, add relevant keywords to the content's settings in the WalkMe Editor to improve search indexing and visibility." The course *Advancing Your Skills in Building WalkMe Solutions* states:

"If Insights shows users searching for terms like 'profile' but taking no action, enhance content discoverability by adding targeted keywords in the Editor, ensuring the WalkMe Menu returns relevant results." Option C, adding keywords, directly addresses the issue of users not finding the 'profile' content.

NEW QUESTION # 38

While doing Quality Assurance for a SmartTip, you notice that when you scroll up and down the page the SmartTip appears to scroll up and down as well before snapping back to its proper location next to your element. Which configuration should you adjust to fix this?

- A. Z-Index
- **B. Lock to Element**
- C. Selected Element→ Appears and disappears as a result of end user action
- D. Display Condition

Answer: B

NEW QUESTION # 39

You have been given a project where end users are inputting incorrect information on a form, and the company wants to add some WalkMe content to help people complete the form correctly to improve data integrity. Which of the following solutions would you suggest FIRST?

- A. Create a Smart Walk-Thru to guide users through the process
- **B. Create Guidance or Validation SmartTips**
- C. Onboarding Task to encourage users to complete the form
- D. Add a Resource to the Menu that provides additional details

Answer: B

Explanation:

To address incorrect form inputs and improve data integrity, Guidance or Validation SmartTips are the most direct and effective solution to suggest first. Guidance SmartTips provide on-screen instructions for each field, while Validation SmartTips check user inputs against predefined rules (e.g., format, required fields) and display error messages if incorrect. This approach targets the root issue-user errors in specific fields-and provides real-time feedback to ensure accurate data entry.

The other options are less immediate:

* Onboarding Task(B) is better for guiding users through a multi-step process, not form-specific errors.

* Smart Walk-Thru(C) is useful for complex processes but may be overkill for a single form.

* Resource in the Menu(D) requires users to seek help proactively, which is less effective than in- context guidance.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.5: SmartTips):

"For forms with frequent user errors, Guidance SmartTips offer field-specific instructions, and Validation SmartTips enforce correct inputs, improving data integrity directly at the point of entry." The course Getting Started with Building WalkMe Solutions advises:

"Start with SmartTips for form-related issues, using Guidance to clarify field requirements and Validation to catch errors, as they provide targeted, real-time support." Option A, Guidance or Validation SmartTips, is the first solution to suggest.

NEW QUESTION # 40

What information does the Flow Tracker provide when testing Smart Walk-Thrus?

- A. A list of all HTML tags used in the webpage
- **B. Real-time feedback on step triggers and goals**
- C. A summary of all JavaScript errors on the page
- D. A detailed report of all CSS styles applied to the page

Answer: B

NEW QUESTION # 41

In the Editor, a Shuttle has a full green circle next to it when looking at the Production environment. How would you describe the status of this Shuttle?

- A. Draft mode in Test
- B. Archived in Production
- C. Published to Production but has been modified
- **D. Published to Production**

Answer: D

Explanation:

In the WalkMe Editor, a full green circle next to a content item, such as a Shuttle, in the Production environment indicates that the item is Published to Production and is live for end users. This status confirms that the Shuttle has been successfully deployed without subsequent modifications or archiving.

The other options are incorrect:

- * Draft mode in Test (A) would show a different icon (e.g., gray or yellow) in the Test environment.
- * Archived in Production (B) would show an archived status, not a green circle.
- * Published but modified (C) would display a modified indicator, not a full green circle.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.10: Publishing and Status):

"A full green circle in the Production environment indicates that the content item, such as a Shuttle, is published and active for end users." The course Getting Started with Building WalkMe Solutions states:

"Check the status icon in the Editor: a full green circle in Production means the content is live and published without pending changes." Option D correctly describes the Shuttle's status.
