## 現実的なISO-45001-Lead-Auditor問題数 & 資格試験におけるリーダーオファァー & 初段的ISO-45001-Lead-Auditorキャリアパス

人生はさまざまな試しがある、人生の頂点にかからないけど、刺激のない生活に変化をもたらします。あなたは我々社の提供する質高いPECB ISO-45001-Lead-Auditor問題集を使用して、試験に参加します。もし無事にISO-45001-Lead-Auditor試験に合格したら、あなたはもっと自信になって、更なる勇気でやりたいことをしています。

## PECB Certified ISO 45001 Lead Auditor Exam 認定 ISO-45001-Lead-Auditor 試験問題 (Q28-Q33):

### 質問 # 28

Select the two options which describe a disadvantage of using a checklist.

- A. Helping with sampling of evidence
- B. Ensuring relevant audit trails are followed
- C. Using the same checklist for every audit without review
- D. Assisting with starting an interview
- E. Noting down evidence details
- F. Not varying from the checklist when necessary

正解: E、F

### 質問 # 29

Consider the emergency preparedness and response process outlined in ISO 45001. Match each process activity to the correct stage of the PDCA cycle.

To complete the table click on the blank section you want to complete so it is highlighted in red and then click on the applicable text from the options the appropriate process."

Emergency Preparedness and Response Activity	PDCA Stage
Develop an emergency response plan	
Conduct emergency drill responses	
Evaluate the performance of the planned response	
Update the emergency response plan	

正解:

解説:

Emergency Preparedness and Response Activity	PDCA Stage
Develop an emergency response plan	Plan
Conduct emergency drill responses	Do
Evaluate the performance of the planned response	Check
Update the emergency response plan	Act

Emergency Preparedness and Response Activity	PDCA Stage
Develop an emergency response plan	Plan
Conduct emergency drill responses	Do
Evaluate the performance of the planned response	Check
Update the emergency response plan	Act

### 質問 # 30

Worker's participation is a key factor for the success of OHSMS. Which three of the following ISO 45001 activities require workers' participation?

- A. Establishing OHS objectives
- B. Managing internal audit programme
- C. Establishing OHS policy
- D. Determining what needs to be communicated
- E. Determining competence requirements
- F. Determining actions to eliminate hazards

正解: A、C、F

解説:

Worker participation is a fundamental principle of ISO 45001 (Clause 5.4). It ensures workers at all levels are involved in key activities to enhance the OH&S management system's effectiveness.

Analysis of Options:

- \* A. Determining competence requirements: Incorrect. Determining competence is primarily the responsibility of management, though workers may provide input.
- \* B. Establishing OHS objectives: Correct. Worker involvement ensures objectives are realistic and relevant to workplace conditions (Clause 6.2).
- \* C. Managing internal audit programme: Incorrect. Managing audits is typically a managerial responsibility, though workers may participate in audits.
- \* D. Determining actions to eliminate hazards: Correct. Workers' insights are critical in identifying and implementing actions to eliminate hazards (Clause 8.1.2).
- \* E. Determining what needs to be communicated: Incorrect. While communication strategies impact workers, their participation in determining communication needs is not explicitly required.
- \* F. Establishing OHS policy: Correct. Workers should be involved in developing policies to ensure relevance and buy-in (Clause 5.2).

ISO References:

- \* Clause 5.4: Worker participation.
- \* Clause 6.2: OHS objectives.
- \* Clause 8.1.2: Hierarchy of controls and hazard elimination.

### 質問 # 31

An internal auditor of a manufacturer of plastic packaging products for the food industry raised a nonconformity against section 10.2 of ISO 45001 in Report JA202. The nonconformity (NC3) stated: "The level of reported health and safety incidents has increased by 9.7% over the last 12 months." As the third-party auditor who comes across this nonconformity during a surveillance audit, how would you react? Select one.

- A. You would ask the OHS Manager why the incident rate was rising by so much in one year.
- B. You would raise a nonconformity since the incident rate had not reduced at the time of the internal audit.

- C. You would investigate whether the incident rate featured in the previous internal audit report.
- **D. You would find out what corrective action was taken and whether it was effective.**

正解: D

### 質問 # 32

An auditor of a manufacturer of plastic packaging products for the food industry found a nonconformity in an internal audit report raised against section 10.2 of ISO 45001 in Report IA202. The nonconformity (NC3) stated: "The level of reported health and safety incidents has increased by 9.7% over the last 12 months. This included an increase in reported accidents." Against this background, the third-party audit team found more than twenty minor nonconformities during the audit, which they agreed should be combined into one major nonconformity against clause 4.4 of ISO 45001. "The organisation has failed to demonstrate that it is maintaining and continually improving a health and safety management system." Select two options which would represent acceptable corrective actions for the nonconformity.

- A. External consultants were appointed to conduct a gap analysis of the OHSMS and report on the gaps found.
- B. OH&S champions were appointed in each department to report near misses and incidents in the OHSMS.
- C. Staff from departments with nonconformities were given regular OH&S safety training sessions during their daily toolbox talks.
- **D. Top management initiated a comprehensive review of the internal and external issues to decide on actions that could lead to improving the performance of the OHSMS.**
- **E. Top Management developed and is leading a programme to promote an effective culture of support for the OHSMS.**
- F. Union representatives of the workers were invited to attend the OH&S management meetings.

正解: D、E

解説:

Clause 4.4 of ISO 45001 requires organizations to establish, implement, maintain, and continually improve an OH&S management system. The corrective actions must address systemic issues, involve leadership commitment, and aim to foster a strong safety culture.

Analysis of Options:

- \* A. Top management initiated a comprehensive review of internal and external issues:Correct. A review of internal and external issues aligns with Clause 4.1 and demonstrates leadership commitment.
- \* B. Union representatives were invited to attend OH&S management meetings:Incorrect. While participation is valuable, it is not a systemic corrective action.
- \* C. Top management developed and is leading a programme to promote an effective culture of support:Correct. Promoting a safety culture is a proactive measure and aligns with Clause 5.1 (Leadership).
- \* D. Staff from departments with nonconformities received regular safety training during toolbox talks:Incorrect. While training addresses specific gaps, it does not address systemic issues.
- \* E. External consultants conducted a gap analysis of the OHSMS:Incorrect. While helpful, this action does not demonstrate leadership or address systemic improvement.
- \* F. OH&S champions were appointed in each department to report near misses and incidents:Incorrect. This is a good practice but does not directly address Clause 4.4's requirement for systemic improvement.

ISO References:

- \* Clause 4.4: Maintaining and improving the OH&S management system.
- \* Clause 5.1: Leadership and commitment.
- \* Clause 10.3: Continual improvement.
