

Get Success in SolarWinds Hybrid-Cloud-Observability-Network-Monitoring Exam With an Unbelievable Score

The scoring system of our Hybrid-Cloud-Observability-Network-Monitoring exam torrent absolutely has no problem because it is intelligent and powerful. First of all, our researchers have made lots of efforts to develop the scoring system. So the scoring system of the Hybrid-Cloud-Observability-Network-Monitoring test answers can stand the test of practicability. Once you have submitted your practice. The scoring system will begin to count your marks of the Hybrid-Cloud-Observability-Network-Monitoring Exam guides quickly and correctly. At the same time, there is specific space below every question for you to make notes. So you can quickly record the important points or confusion of the Hybrid-Cloud-Observability-Network-Monitoring exam guides.

Our Hybrid-Cloud-Observability-Network-Monitoring guide torrent is compiled by experts and approved by the experienced professionals. They are revised and updated according to the change of the syllabus and the latest development situation in the theory and practice. The language is easy to be understood to make any learners have no learning obstacles and our Hybrid-Cloud-Observability-Network-Monitoring study questions are suitable for any learners. The software boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our Hybrid-Cloud-Observability-Network-Monitoring Exam Torrent boosts timing function and the function to stimulate the exam. Our product sets the timer to stimulate the exam to adjust the speed and keep alert. Our Hybrid-Cloud-Observability-Network-Monitoring study questions have simplified the complicated notions and add the instances, the stimulation and the diagrams to explain any hard-to-explain contents.

Hybrid-Cloud-Observability-Network-Monitoring Exam bootcamp & ExamCollection Hybrid-Cloud-Observability-Network-Monitoring PDF

If you feel nervous about your exam, then our Hybrid-Cloud-Observability-Network-Monitoring exam materials will be your bets choice. Hybrid-Cloud-Observability-Network-Monitoring Soft test engine can stimulate the real exam environment, so that your confidence for your exam will be strengthened. In addition, we provided you with free demo to have a try before buying Hybrid-Cloud-Observability-Network-Monitoring Exam Cram. You can enjoy free update for one year, so that you can obtain the latest version timely, and the latest version for Hybrid-Cloud-Observability-Network-Monitoring training materials will be sent to your email automatically. You just need to check your email.

SolarWinds Hybrid Cloud Observability Network Monitoring Exam Sample Questions (Q161-Q166):

NEW QUESTION # 161

Which SNMP version will support MD5, SHA1, SHA256, and SHA512 authentication in SolarWinds' platform?

- A. version 1
- B. version 3
- C. version 2
- D. version 2c

Answer: B

Explanation:

Only SNMP version 3 supports advanced authentication methods such as MD5, SHA1, SHA256, and SHA512 in SolarWinds and other SNMP-compliant platforms.

The documentation specifies:

"SNMP v3 provides secure authentication and encryption options, including MD5, SHA1, SHA256, and SHA512. Versions 1 and 2c only support community string authentication." References:

NPM Administrator Guide: SNMP Security and Supported Authentication Methods

NEW QUESTION # 162

If a NetFlow collector service is showing a "down" status, which two of the following steps are possible troubleshooting options? (Choose two.)

- A. Start or restart SolarWinds' collector service.
- **B. Start or restart SolarWinds' NetFlow service from Orion service manager.**
- **C. Confirm the database connection is up and server has free resources.**
- D. Delete and re-add NetFlow collector service.

Answer: B,C

Explanation:

When the NetFlow collector service is showing a "down" status, the SolarWinds documentation recommends the following troubleshooting steps:

* Confirm the database connection is up and server has free resources.

* Explanation: The NetFlow collector service relies on connectivity to the SolarWinds database. If the database connection is lost or the server is out of resources (such as CPU or RAM), the service may go down or fail to start. Ensuring that the database is reachable and that the server has enough resources is a primary troubleshooting step.

* Start or restart SolarWinds' NetFlow service from Orion Service Manager.

* Explanation: The official troubleshooting guidance instructs administrators to use the Orion Service Manager to start or restart the NetFlow service. This is a direct method to recover the NetFlow collector from a "down" state and is one of the first actions recommended by SolarWinds support.

Options B and C are not recommended in the official documentation:

* Deleting and re-adding the NetFlow collector service is not a documented troubleshooting step and may cause loss of configuration.

* Starting or restarting the generic "collector service" is not specific to NetFlow; the correct service is the NetFlow service.

Exact Extract from Official Guide:

"If NetFlow collector service status is down:

* Ensure the SolarWinds database is online and the server is not experiencing resource issues.

* Use the Orion Service Manager to start or restart the NetFlow service.

* If the issue persists, review the NetFlow logs for errors and consult the SolarWinds Success Center for advanced troubleshooting.

" - (Network Performance Monitor Administrator Guide, Troubleshooting NetFlow and Service Issues) References:

NEW QUESTION # 163

Which VPN vendor allows Network Insight to check site-to-site VPN connections?

- A. Citrix Gateway
- **B. GlobalProtect**
- C. OpenVPN
- D. AnyConnect

Answer: B

Explanation:

The best answer from the choices is GlobalProtect. SolarWinds firewall monitoring documentation states that SolarWinds Observability Self-Hosted can monitor VPN tunnels, including site-to-site VPNs and GlobalProtect VPNs, and that supported firewall vendors include Cisco ASA and Palo Alto. GlobalProtect is the Palo Alto VPN capability represented in the options.

AnyConnect is Cisco remote-access VPN branding, not the SolarWinds Network Insight vendor option given here. Citrix Gateway and OpenVPN are not documented in the SolarWinds Network Insight firewall monitoring scope for this feature. The question wording is not ideal because SolarWinds also monitors Cisco ASA site-to-site VPN tunnels, but Cisco ASA is not one of the answer options.

NEW QUESTION # 164

Which custom poller supports interface traffic, UPS battery status, and CPU temperature?

- A. hardware health
- B. device studio
- C. universal device poller
- D. visualization integration

Answer: C

NEW QUESTION # 165

A custom application is to be monitored in hybrid cloud observability's flow monitoring features. How is this application added for monitoring?

- A. Ensure the application is using IPv6 then map it to a source.
- B. Add the source or destination machine, then map it to application ports.
- C. Custom application ports cannot be added they may only be edited.
- D. Add the application ports, then assign it to a machine.

Answer: B

NEW QUESTION # 166

.....

In this fast-changing world, the requirements for jobs and talents are higher, and if people want to find a job with high salary they must boost varied skills which not only include the good health but also the working abilities. But if you get the Hybrid-Cloud-Observability-Network-Monitoring certification, your working abilities will be proved and you will find an ideal job. We provide you with Hybrid-Cloud-Observability-Network-Monitoring Exam Materials of high quality which can help you pass the exam easily. It also saves your much time and energy that you only need little time to learn and prepare for exam.
