

Providing You High-quality 300-740 Exam Cost with 100% Passing Guarantee

What's more, part of that Getcertkey 300-740 dumps now are free: <https://drive.google.com/open?id=1jMvtfbtkR4rKfR2V2XMk1JXjaexQllo>

Our Cisco learning materials contain latest test questions, valid answers and professional explanations, which ensure you hold 300-740 actual test with great confidence. And we will provide you with the most comprehensive service when you prepare 300-740 Practice Exam with our valid dumps collection.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• SAFE Architectural Framework: This section of the exam measures skills of Security Architects and explains the Cisco SAFE framework, a structured model for building secure networks. It emphasizes the importance of aligning business goals with architectural decisions to enhance protection across the enterprise.
Topic 2	<ul style="list-style-type: none">• User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.
Topic 3	<ul style="list-style-type: none">• Integrated Architecture Use Cases: This section of the exam measures the skills of Cloud Solution Architects and covers key capabilities within an integrated cloud security architecture. It focuses on ensuring common identity across platforms, setting multicloud policies, integrating secure access service edge (SASE), and implementing zero-trust network access models for more resilient cloud environments.
Topic 4	<ul style="list-style-type: none">• Network and Cloud Security: This section of the exam measures skills of Network Security Engineers and covers policy design for secure access to cloud and SaaS applications. It outlines techniques like URL filtering, app control, blocking specific protocols, and using firewalls and reverse proxies. The section also addresses security controls for remote users, including VPN-based and application-based access methods, as well as policy enforcement at the network edge.
Topic 5	<ul style="list-style-type: none">• Threat Response: This section of the exam measures skills of Incident Response Engineers and focuses on responding to threats through automation and data analysis. It covers how to act based on telemetry and audit reports, manage user or application compromises, and implement response steps such as containment, reporting, remediation, and reinstating services securely.

Topic 6	<ul style="list-style-type: none"> • Industry Security Frameworks: This section of the exam measures the skills of Cybersecurity Governance Professionals and introduces major industry frameworks such as NIST, CISA, and DISA. These frameworks guide best practices and compliance in designing secure systems and managing cloud environments responsibly.
Topic 7	<ul style="list-style-type: none"> • Visibility and Assurance: This section of the exam measures skills of Security Operations Center (SOC) Analysts and focuses on monitoring, diagnostics, and compliance. It explains the Cisco XDR solution, discusses visibility automation, and describes tools for traffic analysis and log management. The section also involves diagnosing application access issues, validating telemetry for behavior analysis, and verifying user access with tools like firewall logs, Duo, and Cisco Secure Workload.

300-740 Valid Exam Question, Practice 300-740 Exams Free

By selecting our 300-740 training material, you will be able to pass the 300-740 exam in the first attempt. You will be able to get the desired results in 300-740 certification exam by checking out the unique self-assessment features of our 300-740 Practice Test software. You can easily get the high paying job if you are passing the 300-740 exam in the first attempt, and our 300-740 study guides can help you do so.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q15-Q20):

NEW QUESTION # 15

A security analyst detects an employee endpoint making connections to a malicious IP on the internet and downloaded a file named Test0511127691C.pdf. The analyst discovers the machine is infected by trojan malware. What must the analyst do to mitigate the threat using Cisco Secure Endpoint?

- **A. Start isolation of the machine on the Computers tab**
- B. Create an IP Block list and add the IP address of the affected endpoint
- C. Identify the malicious IPs and place them in a blocked list
- D. Enable scheduled scans to detect and block the executable files

Answer: A

Explanation:

In Cisco Secure Endpoint (formerly AMP for Endpoints), isolating an infected machine is the most immediate action to contain the threat. Isolation cuts the endpoint off from all network communication except to the management console, allowing the analyst to investigate further while preventing lateral movement or data exfiltration.

According to SCAZT Section 6: Threat Response (Pages 114-117), isolation is a recommended first response in the event of malware detection.

Reference: Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT), Section 6, Pages 114-117

NEW QUESTION # 16

The main benefit of integrating threat intelligence into cloud security is:

- **A. Enhancing the ability to identify and respond to emerging threats**
- B. Reducing the effectiveness of security operations
- C. Increasing the complexity of security architectures
- D. Decreasing the need for secure domains

Answer: A

NEW QUESTION # 17

The importance of VPN policies for remote users is to ensure:

- A. Secure and encrypted access to corporate resources from any location
- B. That remote users have a slower connection to prioritize office users
- C. The use of public Wi-Fi networks for corporate access
- D. Remote users cannot access sensitive corporate resources

Answer: A

NEW QUESTION # 18

Advanced app control mechanisms are essential for SaaS applications because they:

- A. Simplify compliance with data protection regulations
- B. Enable granular control over app functionality and user actions
- C. Reduce the overall security posture by focusing only on user experience
- D. Allow all user actions without logging

Answer: B

NEW QUESTION # 19

Cisco Umbrella provides visibility and assurance by:

- A. Reducing the scope of security monitoring to non-web traffic
- B. Limiting its functionality to on-premises solutions
- C. Offering DNS-layer security to prevent access to malicious domains
- D. Focusing exclusively on email security

Answer: C

NEW QUESTION # 20

.....

You can use 300-740 guide materials through a variety of electronic devices. At home, you can use the computer and outside you can also use the phone. Now that more people are using mobile phones to learn our 300-740 study materials, you can also choose the one you like. One advantage is that if you use our 300-740 Practice Questions for the first time in a network environment, then the next time you use our study materials, there will be no network requirements. You can open the 300-740 real exam anytime and anywhere.
