Microsoft PL-400최신버전덤프, 는 모든 PL-400시험내용을 커버합니다!

Microsoft인증PL-400시험준비를 하고 계시다면DumpTOP에서 출시한Microsoft인증PL-400덤프를 제일 먼저 추천해 드리고 싶습니다. DumpTOP제품은 여러분들이 제일 간편한 방법으로 시험에서 고득점을 받을 수 있도록 도와드리는 시험동반자입니다. Microsoft인증PL-400시험패는DumpTOP제품으로 고고고!

최신 Microsoft Certified: Power Platform Developer Associate PL-400 무료 샘플문제 (Q115-Q120):

질문 # 115

You are developing a Power Platform solution. The solution connects to a third-party accounting system by using a Web API through a Power Apps app that automatically exchanges contacts with the sales data.

You have the following code: (Line numbers are included for reference only.)

```
01 GET https://contoso.crm.dynamics.com/api/data/v9.1/accounts?$select=name,accountnumber,telephone1 &$top=5 HTTP/1.1
02
03 Cache-Control: no-cache
04 OData-Version: 4.0
05 Content-Type: application/json; charset=utf-8
```

You need to ensure that the code only synchronizes data that was not previously synchronized. Which code segment should you insert at line 02?

- A. Prefer: odata.track-changes
- B. Prefer: odata.allow-entityreferences
- C. Prefer: odata.include-annotations

- D. Prefer: odata.allow-entityreferences

정답: A

질문 # 116

A company uses Dynamics 365 Sales.

You need to configure the customer lookup search for email activity in the canvas app.

How should you complete the expression? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

If (, , ,)

(ThisItem.'Company Name' , [@Accounts]) ,

 "Account: " & (ThisItem.'Company Name' , [@Accounts]).'Account Name' ,

 "Contact: " & (ThisItem.'Company Name' , [@Contacts]).'Full Name'

)

(Note: Each dropdown menu in the image contains the options: IsBlank, AsType, IsType)

정답:

설명:

If (, , ,)

(ThisItem.'Company Name' , [@Accounts]) ,

 "Account: " & (ThisItem.'Company Name' , [@Accounts]).'Account Name' ,

 "Contact: " & (ThisItem.'Company Name' , [@Contacts]).'Full Name'

)

(Note: Each dropdown menu in the image contains the options: IsBlank, AsType, IsType)

Explanation:

Box 1: IsBlank

The IsBlank function tests for a blank value or an empty string. The test includes empty strings to ease app creation since some data sources and controls use an empty string when there is no value present.

Box 2: IsType

The IsType function tests whether a record reference refers to a specific table type.

Box 3: AsType

The AsType function treats a record reference as a specific table type, sometimes referred to as casting. You can use the result as if it were a record of the table and again use the Record.Field notation to access all of the fields of that record. An error occurs if the reference isn't of the specific type.

Box 4: AsType

질문 # 117

A developer must register a step using the Plug-in registration tool.

You need to associate the correct Event Pipeline Stage of Execution with its purpose.

Which stage should you associate with each description? To answer, drag the appropriate stages to the correct descriptions. Each stage may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Stages	Answer Area	
	Description	Stage
PreValidation	Cancel the operation before the database transaction.	Stage
PreOperation	Change any values for an entity within the database transaction.	Stage
MainOperation	Modify any properties of the message before it returns to the caller.	Stage
PostOperation		

정답:

질문 # 118

You need to configure the row filter on the Dataverse trigger. Which filter should you use?

- A. Dataknull
- B. not contains(new_dataid, ")
- C. new_dataid eq null
- D. new dataid ne null

정답: A

설명:

Topic 6, City Power & Light

Background

City Power & Light is an energy and utilities company that has offices in Europe. The company subsidizes home improvements for domestic customers, to improve energy efficiency and to meet environmental commitments. The company also distributes and generates electricity for domestic and commercial customers.

The company has 2,000 employees in multiple offices and in work-from-home locations.

City Power & Light uses a team of schedulers, assessors, field engineers, and customer support agents for home improvements in a program named Get Energy Fit.

Current Environment

Get Energy Fit Program

City Power & Light uses the following to manage the Get Energy Fit program:

- * The company uses a Microsoft Excel spreadsheet named Planning Hub on Microsoft SharePoint Online to store information about customer appointments, customer details, and customer eligibility in the program

- * The company records sensitive customer information that includes the document identification numbers and the customer's financial information.

- * The company uses an assessor to verify customer eligibility in the program and to perform a suitability assessment. The assessor completes the suitability assessment by using a paper and clipboard at the customer property and enters the data to the Planning Hub after the assessment is completed. The assessor also uploads

- * photographs to an on-premises document library. The assessor completes the eligibility assessment by using an application written in React.

- * Schedulers use Microsoft Outlook to schedule engineers and assessors for home improvement appointments.

About 200 appointments are scheduled daily.

- * Employees for the company submit funding claims on behalf of the customer by uploading evidence and compliance checks information to an application named the Claim Submission Portal.

Technical Environment

- * Schedulers use Windows 11 desktop and laptop computers with the latest version of Microsoft Edge.

- * Assessors use iOS and Android tablet devices.

- * The Claim Submission Portal uses REST-based APIs for all operations and a dedicated testing environment.

Authentication to the API is provided by using the following example header key and value pair o Authentication: 2C8D41431415E429C7FC7A74D8315

- * The company uses Microsoft Azure for hosting multiple applications.

Requirements

Overview

City Power & Light plans to implement Microsoft Power Platform to improve the customer experience and increase delivery for the Get Energy Fit program.

Business Requirements

- * Only team leaders and senior managers should have access to read personally identifiable information (PII).

- * All development changes must be tested in a separate environment.

- * The company requires out-of-the-box solutions, when possible.

- * Sensitive credentials, such as user passwords and API secrets, must be stored securely.

- * The Claim Submission Portal must allow citizen developers to create automated solutions.

- * Customer and appointment information must be accessible to all applications.

Planning Hub Application

The company is planning to replace the Planning Hub spreadsheet with a new application. The new application has the following requirements:

- * The application must support a component design that provides rapid changes requested by the schedulers.

- * The data model for the application must capture the following information:

- * The application must support a component design that provides rapid changes requested by the schedulers.

- * The data model for the application must capture the following information; o Information about customers such as name, address, and other PH.

- o The data and time for an assessor's or engineer's appointment. Schedulers must be able to view all appointments without filters, o Records the details of the home improvements installed for the customer, o Contains all the information and evidence for submission to the Claim Submission Portal.

- * After an assessor uploads the funding application and all evidence after a home improvement has been complete, the company requires that the status of the application is set to Submit and should run the following:

- o Retrieve the details about the customer and the improvement installed, o Send an approval to a senior manager to review and approve in Microsoft Teams.

- o Upload the information to the API endpoint.

- o If the upload fails to complete, it should retry after a delay of 30 seconds up to three times. If an error occurs after three times, the application should send an email notification to the application support team.

o Must record the status on the funding application.

Suitability Assessment Tool

The company plans to implement a new application named the Suitability Assessment Tool for the assessors.

The new application has the following requirements:

* Must integrate with Microsoft Power Platform

* Assessors must be able to complete the eligibility assessment by using the Suitability Assessment Tool. The assessors must be able to upload photographs to the on-premises file share.

* Must be developed by using modular components that can be used by other applications.

* Must be optimized for use on tablet devices.

* All changes to the application must be completed in the Suitability Assessment Tool solution.

Reporting

The company has the following requirements for a reporting solution:

* The data source for the reporting solution must support incremental refreshes.

* The solution must report accurate data if an error occurs.

질문 # 119

A model-driven app has the following JavaScript code. The code is attached to the OnChange event of the Phone (telephone1) field on the Account entity.

```
var telephone = formContext.getAttribute("telephone1").getValue();
if (!telephone) {
    return;
}
var contact = formContext.getAttribute("primarycontactid").getValue();
var data = { "telephone1": telephone }
Xrm.WebApi.updateRecord("contact", contact[0].id, data).then(
    function () {
        Xrm.Navigation.openAlertDialog("Updated");
    },
    function () {
        var errorOptions = { "message": "Not Updated" };
        Xrm.Navigation.openAlertDialog(errorOptions);
    }
)
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

	Yes	No
When the code runs and the Primary contact (primarycontactid) field is populated, the Contact record's Phone (telephone1) field is updated to match the Account.	<input type="radio"/>	<input type="radio"/>
When the code runs and the Primary contact (primarycontactid) field is not populated, the following error message displays: Not Updated	<input type="radio"/>	<input type="radio"/>
When the code runs and the value in Phone (telephone1) is removed, the Contact record's Phone (telephone1) field is updated to null.	<input type="radio"/>	<input type="radio"/>

정답:

설명:

Yes

No

When the code runs and the Primary contact (primarycontactid) field is populated, the Contact record's Phone (telephone1) field is updated to match the Account.

When the code runs and the Primary contact (primarycontactid) field is not populated, the following error message displays: Not Updated

When the code runs and the value in Phone (telephone1) is removed, the Contact record's Phone (telephone1) field is updated to null
