

Free PDF Quiz Perfect CWNP - CWDP-305 - New Certified Wireless Design Professional Test Experience

P.S. Free 2026 CWNP CWDP-305 dumps are available on Google Drive shared by CramPDF: https://drive.google.com/open?id=1K3ubbZpAMmc7QYHNsH4UxI_C389iRg7j

We can conclude this post with the fact that to clear the Certified Wireless Design Professional (CWDP-305) certification exam, you need to be prepared before, study well, and practice. You cannot rely on your luck to score well in the CWDP-305 exam. You have to prepare with CramPDF real CWNP CWDP-305 Exam Questions to clear the CWDP-305 test in one go. You will also receive up to 365 days of free updates and CWDP-305 dumps pdf demos. Purchase the Certified Wireless Design Professional (CWDP-305) practice tests today and get these amazing offers.

CWNP CWDP-305 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Design the WLAN: This section of the exam measures the skills of a WLAN Design Engineer and covers the process of selecting configurations, architecture types, and wireless components to meet business and technical requirements. It includes using design software, selecting access points and antennas, and applying methodologies such as predictive or measured design. Candidates must demonstrate the ability to produce effective documentation and configure features like QoS, roaming security, and network services for different types of client devices and applications.
Topic 2	<ul style="list-style-type: none">Validate and Optimize the WLAN: This section of the exam measures the skills of a WLAN Optimization Specialist and assesses the ability to test, validate, and fine-tune wireless networks post-deployment. Key tasks include RF validation surveys, performance testing, troubleshooting connectivity and security issues, and applying appropriate physical or RF adjustments. It also involves client testing and final project handover, including documentation, knowledge transfer, and meetings to ensure long-term WLAN success.

Topic 3	<ul style="list-style-type: none"> Deploy the WLAN: This section of the exam measures the skills of a WLAN Implementation Specialist and involves overseeing the deployment phase of wireless networks. It focuses on understanding deployment procedures for various WLAN architectures, configuring supporting infrastructure, and verifying proper installation. The section also addresses physical installation checks, documentation handover, and quality assurance practices during ongoing installations.
Topic 4	<ul style="list-style-type: none"> Define Specifications for the WLAN: This section of the exam measures the skills of a Wireless Network Planner and focuses on gathering business and technical requirements needed for designing wireless LANs. It includes understanding user needs, regulatory and safety constraints, and environmental factors. Candidates are expected to identify critical elements such as coverage, capacity, security, and device compatibility, and to analyse existing infrastructure and documentation to ensure a successful design strategy.

CWNP CWDP-305 Exam Questions Answers - CWDP-305 Latest Study Questions

We try to offer the best CWDP-305 exam braindumps to our customers. First of all, in order to give users a better experience, we have been updating the system of CWDP-305 simulating exam to meet the needs of more users. After the new version appears, we will also notify the user at the first time. Second, in terms of content, we guarantee that the content provided by our CWDP-305 Study Materials is the most comprehensive.

CWNP Certified Wireless Design Professional Sample Questions (Q143-Q148):

NEW QUESTION # 143

If the amplifier in Question 4 has a noise figure of 10 dB but a gain of 0 dB, what is the total noise figure of the cable, amplifier, and filter in series?

Response:

- A. 16 dB
- B. 70 dB
- C. 10 dB
- D. **75 dB**

Answer: D

NEW QUESTION # 144

During a post-validation survey, you find an area lacking any detectable Wi-Fi signal at all. It is located behind an elevator shaft. What is a common solution to this problem?

- A. Move one or more APs so that indoor propagation results in coverage in that area or install another AP on that side of the elevator shaft
- B. Install antennas with at least 3 more dB of gain on the two APs closest to that area
- C. Replace all the clients in that area with clients having better receive sensitivity
- D. Turn up the power on the three APs closest to that area

Answer: A

NEW QUESTION # 145

Which type of building material causes the most attenuation of Wi-Fi signals?

- A. Brick wall

- B. Drywall
- C. Plywood
- D. **Fire-rated steel door**

Answer: D

NEW QUESTION # 146

Given:

In your regulatory domain, a Tx Power Level of "1" is equivalent to 17 dBm. For every integer increment (e.g., from 1 to 2) to the Tx Power Level, the AP's transmit power is halved.

In units of mW, what is the actual transmit power for an AP configured at a Tx Power Level of "4"?

- A. 8 mW
- B. 50 mW
- C. **6.25 mW**
- D. 12.5 mW

Answer: C

Explanation:

Starting with a Tx Power Level of "1" at 17 dBm, each increment halves the power:

Level 2: 17 dBm - 3 dB = 14 dBm

Level 3: 14 dBm - 3 dB = 11 dBm

Level 4: 11 dBm - 3 dB = 8 dBm

Converting 8 dBm to mW:

10
