In addition, the price of the Virginia-Life-Annuities-and-Health-Insurance dumps pdf is reasonable and affordable for all of you.

## **Virginia Insurance Virginia Life, Annuities, and Health Insurance Examination Series 11-01 Sample Questions (Q132-Q137):**

### **NEW QUESTION # 132**

Which is true about a joint and survivor annuity?

- A. Each annuitant must provide evidence of insurability.
- B. The benefits are payable throughout the lifetimes of two or more people.
- C. The benefits cease when the surviving annuitant reaches life expectancy.
- D. It is a combination of an annuity and whole life insurance.

**Answer: B**

Explanation:

A joint and survivor annuity, as outlined in Virginia Code § 38.2-3100 et seq., is an annuity contract that pays benefits as long as at least one of the named annuitants (typically two, such as spouses) is alive. Option A accurately reflects this, stating benefits continue throughout their lifetimes, ceasing only upon the last survivor's death. Option B is false because payments aren't tied to life expectancy but to actual survival, per standard annuity terms in the study guide. Option C is incorrect; an annuity provides income, while whole life insurance offers a death benefit—combining them is a different product (e.g., a universal life policy), not a joint and survivor annuity. Option D is wrong because annuities, unlike life insurance, don't typically require evidence of insurability, as they're based on longevity, not mortality risk (Virginia Code § 38.2-3113). The study guide emphasizes the lifetime payment feature as the defining trait, confirming A.

**NEW QUESTION # 133**

The elimination of a hazard is an example of risk:

- A. Transfer
- B. Pooling
- C. Retention
- D. **Avoidance**

**Answer: D**

Explanation:

The elimination of a hazard is an example of risk avoidance. This involves removing or eliminating the risk entirely by preventing hazardous activities or conditions. This is different from other risk management strategies such as transfer (shifting risk to another party), pooling (combining risks to spread the impact), or retention (accepting the risk).

**NEW QUESTION # 134**

Which one of the following would entitle the beneficiary to receive benefits under accidental death and dismemberment insurance coverage?

- A. Death caused by a stroke
- B. Death caused by a heart attack
- C. Death caused by suicide
- D. **Death caused by a commercial airline crash**

**Answer: D**

Explanation:

Accidental death and dismemberment (AD&D) insurance provides benefits if the insured's death is caused by an accident, such as a commercial airline crash. This coverage is specifically designed for accidental injuries or death, and it does not typically cover natural causes such as heart attacks, strokes, or suicide.

**NEW QUESTION # 135**

If an individual health contract is issued on a conditionally renewable basis, the insurer has a right to refuse renewal:

- A. When losses for the policy period exceed premiums
- B. **For specific reasons stated in the contract only**
- C. For any reason stated or unstated
- D. Because of changes in the covered individual's health status

**Answer: B**

Explanation:

"Conditionally renewable" policies guarantee renewal as long as certain conditions listed in the contract are met. These conditions may include factors such as reaching a certain age or maintaining occupation class, but not health status or claims history. Exact extract: "A conditionally renewable policy may be nonrenewed only on grounds stated in the policy; health deterioration or claims experience may not be a reason for nonrenewal." This gives insurers some flexibility while protecting consumers from arbitrary

termination.

#### NEW QUESTION # 136

A licensee is NOT required by Virginia law to keep which of the following records?

- A. Accounting records of premium payments
- B. Premium quotations of unissued policies
- C. Files of insurance applications on current policies issued
- D. Policy renewal notices

**Answer: B**

Explanation:

Virginia Code § 38.2-1809 mandates that licensees maintain specific records for regulatory oversight and consumer protection. Option A (accounting records of premium payments) is required to track funds received and remitted, ensuring financial accountability (e.g., premiums collected for a \$1,000 policy). Option B (files of insurance applications on current policies) must be kept as part of the contract and for audit purposes, per § 38.2-1810. Option C (policy renewal notices) is required to document communication with policyholders about ongoing coverage, ensuring transparency. Option D (premium quotations of unissued policies) is not mandated; while agents may provide quotes (e.g., \$500 annually for a term policy), these are preliminary offers, not binding until a policy is issued, and Virginia law doesn't require retaining them unless they result in a transaction. The study guide likely details recordkeeping in a compliance chapter, contrasting required records (A, B, C) with optional ones like quotes (D), using examples—e.g., keeping a paid policy's file but not a rejected quote-making D the item not required. This reflects Virginia's focus on executed contracts over prospective ones.

#### NEW QUESTION # 137

.....

These formats hold high demand in the market and offer a great solution for quick and complete Virginia Insurance Virginia-Life-Annuities-and-Health-Insurance exam preparation.
