

# Exam COBIT-Design-and-Implementation Objectives - Latest COBIT-Design-and-Implementation Dumps Book

2026 Latest Pass4SureQuiz COBIT-Design-and-Implementation PDF Dumps and COBIT-Design-and-Implementation Exam Engine Free Share: <https://drive.google.com/open?id=1nGxl5mobJQGpqiivabtrqbXwcsbhWGJ>

The learning material is available in three different easy-to-use forms. The first one is a PDF form. The students can save the COBIT-Design-and-Implementation questions by taking out their prints or can access them on their smartphones, tablets, and laptops. The PDF form can be used anywhere anytime and is essential for applicants who like to learn from their smart devices. The second form is ISACA COBIT Design and Implementation Certificate (COBIT-Design-and-Implementation) web-based practice test which can be taken from browsers.

It would be really helpful to purchase ISACA COBIT Design and Implementation Certificate (COBIT-Design-and-Implementation) exam dumps right away. If you buy this ISACA Certification Exams product right now, we'll provide you with up to 1 year of free updates for ISACA COBIT Design and Implementation Certificate (COBIT-Design-and-Implementation) authentic questions. You can prepare using these no-cost updates in accordance with the most recent test content changes provided by the ISACA COBIT Design and Implementation Certificate (COBIT-Design-and-Implementation) exam dumps.

## Free PDF Quiz ISACA - COBIT-Design-and-Implementation - Newest Exam ISACA COBIT Design and Implementation Certificate Objectives

Your ISACA COBIT Design and Implementation Certificate (COBIT-Design-and-Implementation) exam anxiety will be reduced by having the chance to practice under the COBIT-Design-and-Implementation real exam environment created by this software. The objective of Pass4SureQuiz is to offer excellent ISACA COBIT Design and Implementation Certificate (COBIT-Design-and-Implementation) test simulation software to its customers. Thus it is offering an exceptional and dedicated 24/7 customer support team to assist its users.

## ISACA COBIT Design and Implementation Certificate Sample Questions (Q76-Q81):

### NEW QUESTION # 76

A CIO of a global enterprise has been mandated by the board to change the IT organizational structure from a divisional model to a centralized model and adopt outsourcing as required. The CIO identifies specific design factors that increase the importance of certain governance and management objectives. Which of the following is MOST likely to increase as a result?

- A. Capability levels
- B. Risk appetite and tolerance
- C. IT deployment
- **D. Threat landscape**

**Answer: D**

Explanation:

The COBIT 2019 Design Guide emphasizes:

"Adopting centralized IT structures and outsourcing can significantly increase exposure to external threats, third-party dependencies, and compliance complexity-thereby elevating the threat landscape." A more centralized and outsourced environment implies shared systems, external service providers, and expanded attack surfaces, all contributing to heightened threat scenarios that must be managed through governance priorities.

Reference:COBIT 2019 Design Guide, Section 4.4.5

### NEW QUESTION # 77

When assessing the current state of I&T, a continual improvement task includes:

- A. Raising executive awareness of IT and the value of EGIT.
- B. Developing metrics to monitor I&T performance.
- **C. Identifying potential process improvements.**
- D. Identifying key enterprise and supporting alignment goals.

**Answer: C**

Explanation:

In the COBIT 2019 Implementation Guide:

"During the 'Where are we now?' phase, the enterprise assesses the current state of governance and identifies process capability gaps. These gaps directly inform process improvement opportunities for the implementation roadmap." The emphasis at this stage is on evaluation and gap identification-not strategic goal-setting or awareness- building, which occur earlier in the lifecycle.

Reference:COBIT 2019 Implementation Guide, Phase 2

### NEW QUESTION # 78

Which of the following involves numeric mapping tables created for each of the design factors?

- A. An architecture design approach
- **B. A quantitative approach**
- C. A qualitative approach
- D. A risk-based approach

**Answer: B**

Explanation:

In the COBIT 2019 Design Guide, it is clearly stated that:

"The more quantitative approach involves numeric mapping tables created for each design factor. The mapping tables quantify the descriptive values associated with each design factor, in order to indicate their correlation with governance and management objectives." These mapping tables typically contain values ranging from zero (0) to four (4), where four indicates maximum relevance of a governance or management objective with that particular design factor value, and zero indicates no relevance.

Reference:COBIT 2019 Design Guide, Section 4.3.1

### NEW QUESTION # 79

Who is responsible for monitoring the achievement of the overall EGIT implementation program plan results, including the achievement of goals and realization of benefits?

- A. IT process owners
- **B. Program steering committee**
- C. IT managers
- D. CIO

**Answer: B**

Explanation:

The COBIT 2019 Implementation Guide clearly assigns accountability for overall program oversight to the program steering committee. This body is responsible for monitoring whether the implementation program delivers its intended outcomes, including achievement of enterprise goals, realization of benefits, and alignment with strategic drivers.

While the CIO typically sponsors or chairs the steering committee, the responsibility is collective and not individual. IT managers and process owners are accountable for executing specific activities and processes, but they do not have authority over program-level outcomes.

The Implementation Guide emphasizes that benefit realization, stakeholder value, and performance tracking must be governed at a level that can make cross-functional decisions, resolve escalations, and redirect priorities when necessary. The steering committee fulfills this role by providing governance oversight, ensuring continued alignment with enterprise objectives, and validating that outcomes justify investments.

Therefore, monitoring overall EGIT program results-including goals and benefits-is explicitly the responsibility of the program steering committee.

#### **NEW QUESTION # 80**

Which of the following is a KEY change enablement task that must be completed during the driver identification phase of an IT initiative?

- A. Assign high-level roles and responsibilities.
- B. Define high-level improvement targets.
- C. Establish urgency for the changes needed.
- **D. Identify the business and governance drivers.**

**Answer: D**

Explanation:

A key change enablement task that must be completed during the driver identification phase of an IT initiative is to identify the business and governance drivers. Understanding these drivers is essential for aligning IT initiatives with the strategic objectives and governance needs of the enterprise.

Identifying business and governance drivers involves understanding the fundamental factors that influence the direction and priorities of IT initiatives. These drivers include strategic goals, regulatory requirements, market conditions, and internal organizational needs.

COBIT 2019 Framework References:

\* COBIT 2019 Design Guide, Chapter 2: Highlights the importance of identifying business and governance drivers as part of the design factors that influence the governance system.

\* COBIT 2019 Implementation Guide, Chapter 4: Discusses the process of identifying and analyzing drivers to ensure that IT initiatives are aligned with enterprise goals.

By identifying these drivers, the enterprise can ensure that the IT initiative is aligned with its strategic and governance objectives, thereby facilitating successful change enablement.

#### **NEW QUESTION # 81**

.....

When you are eager to pass the COBIT-Design-and-Implementation real exam and need the most professional and high quality practice material, we are willing to offer help. Our COBIT-Design-and-Implementation training prep has been on the top of the industry over 10 years with passing rate up to 98 to 100 percent. By practicing our COBIT-Design-and-Implementation Learning Materials, you will get the most coveted certificate smoothly. Our COBIT-Design-and-Implementation study quiz will guide you throughout the competition with the most efficient content compiled by experts.
