## **100% Pass Juniper First-grade JN0-253 Mist AI, Associate (JNCIA-MistAI) New Braindumps Ebook**

It helps you to pass the Juniper JN0-253 test with excellent results. Juniper JN0-253 imitates the actual JN0-253 exam environment. You can take the JN0-253 practice exam many times to evaluate and enhance your Juniper JN0-253 Exam Preparation level. Desktop JN0-253 practice test software is compatible with windows and the web-based software will work on these operating systems: Android, IOS, Windows, and Linux.

### **Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q58-Q63):**

#### **NEW QUESTION # 58**

Which protocol is used by Mist to monitor non-Juniper switches?

- A. SNMP
- B. IPsec
- C. SMTP
- D. LLDP

**Answer: A**

Explanation:

The Simple Network Management Protocol (SNMP) is used by Mist to monitor non-Juniper switches. SNMP is a widely adopted protocol for network management, enabling the collection and organization of information about managed devices on IP networks.

#### NEW QUESTION # 59

Which Juniper Mist feature provides application forwarding path details?

- A. Platform Insights
- B. Forwarding Insights
- C. Router Insights
- D. WAN Edge Insights

**Answer: B**

Explanation:

In the Juniper Mist WAN Assurance and SD-WAN framework, Forwarding Insights is the feature responsible for providing application forwarding path visibility. It delivers detailed analytics on how application traffic is being routed across the WAN, enabling network administrators to understand and optimize application performance across multiple WAN links or paths.

According to the Juniper Mist WAN Assurance and Insights Documentation, Forwarding Insights:

"Provides visibility into the application forwarding path by showing which WAN link or tunnel is used for a specific flow, including health metrics such as latency, loss, and jitter." It integrates with Marvis and the AI-driven WAN Assurance engine to automatically correlate user experience with network transport behavior. Administrators can use Forwarding Insights to:

- \* Identify which path (primary, secondary, or backup) an application flow takes.
- \* View real-time performance metrics such as round-trip delay and packet loss per path.
- \* Understand why path selection decisions were made, based on policy or link health.

Other options are incorrect:

- \* A. Router Insights focuses on routing and device-level performance, not per-application path details.
- \* B. WAN Edge Insights provides device health and site connectivity data, not application-level forwarding analytics.
- \* D. Platform Insights covers cloud infrastructure performance, not WAN traffic analysis.

Thus, the correct answer is C. Forwarding Insights.

#### NEW QUESTION # 60

Referring to the exhibit, which two statements are correct? (Choose two.)

**Session Policy**

Session Timeout after  minutes

Inactivity Timeout after  minutes

- A. To stay logged in, you will need to perform an action in Mist every 10 minutes regardless of which organization you are viewing.
- B. To stay logged in, you will need to perform an action in Mist every 10 minutes as long as you are viewing this organization.
- C. You will need to log in to Mist every 60 minutes as long as you are viewing this organization.

- D. You will need to log in to Mist every 60 minutes regardless of which organization you are viewing.

**Answer: A,D**

Explanation:

Session Timeout (60 minutes):

This timeout applies globally, meaning you will be logged out of Mist after 60 minutes of continuous session time, regardless of which organization you are working in.

Inactivity Timeout (10 minutes):

If there is no user activity for 10 minutes, you will be logged out automatically. This also applies globally, regardless of the organization being accessed.

#### NEW QUESTION # 61

Which two Wi-Fi related SLEs are visible in the Mist UI? (Choose two.)

- A. Switch Health
- B. Capacity
- C. Application Health
- D. Throughput

**Answer: B,D**

Explanation:

Wi-Fi Related SLEs in Mist UI:

SLEs (Service Level Expectations) help monitor and ensure Wi-Fi network performance.

Visible SLEs:

Capacity:

Capacity SLE monitors the network's ability to handle the number of connected clients and their bandwidth requirements.

Throughput:

Throughput SLE measures the data transfer rates, ensuring that the network meets the expected performance levels.

#### NEW QUESTION # 62

What are two ways to claim an Access Point with Juniper Mist? (Choose two.)

- A. Activation code
- B. Serial number
- C. Claim code
- D. MAC address

**Answer: A,C**

Explanation:

From Juniper's official guide:

"You'll need either a claim code or an activation code to claim an AP. With either, you can claim an AP by using one of the following methods:

\* Mist AI Mobile App

\* A Web browser

You can claim either a single AP using a claim code or multiple APs using an activation code. You can use any of these methods to claim an AP:

\* To claim a single AP, use the claim/QR code located on the rear of the AP.

\* To claim multiple APs, you'll need to use an activation code. When you purchase multiple APs, we provide you with an activation code along with your PO information." From the Mist documentation:

"APs can be claimed to any organization by using either the activation code, claim code or QR code.

Activation Code: Whenever you order APs, our Sales Operations team will send you an activation code which can be used for claiming the APs and subscriptions as per the order. ...

AP Claim Code: You can individually claim APs to your organization by navigating to Organization > Inventory > Claim APs and entering in the claim code found on the back of each AP.

AP QR Code: Using our Mist AI mobile app you can scan the QR code printed on the back of our APs to claim APs to your organization." Summary:

The Juniper Mist platform allows you to claim an Access Point using:

\* Activation code (provided for bulk purchases, via PO)

\* Claim code (unique per AP, on the rear label)

\* QR code (scanned with the Mist AI mobile app, also encoded as the claim code) These extracts are direct from Juniper's own documentation and confirm the methods for AP onboarding in the Mist platform.

## NEW QUESTION # 63

.....

PrepAwayETE is a convenient website to provide training resources for JN0-253 professionals to participate in the certification exam. PrepAwayETE have different training methods and training courses for different candidates. With these PrepAwayETE's targeted training, the candidates can pass the exam much easier. A lot of people who participate in the JN0-253 professional certification exam was to use PrepAwayETE's practice questions and answers to pass the exam, so PrepAwayETE got a high reputation in the JN0-253 industry.
