Detail AP-203 Explanation & Hot AP-203 Spot Questions

AP-203 exam prep has an extensive coverage of test subjects, a large volume of test questions, and an online update program. AP-203 test guide is not only the passbooks for students passing all kinds of professional examinations, but also the professional tools for students to review examinations. In the past few years, AP-203 question torrent has received the trust of a large number of students and also helped a large number of students passed the exam smoothly.

Salesforce Communications Cloud Accredited Professional Sample Questions (Q55-Q60):

NEW QUESTION # 55

A company is selling voice products to business customers. The offer allows customers to select devices of various models. The product modeler intends to create a phone add-on product specification with voice offers with a cardinality that allows up to 700. Which of the three statements are valid regarding the product model in this scenario?

- A. Product model uses OOTB features from EPC. Decomposition may fail when the maximum number of products is processed.
- B. Product Model use hierarchical modeling which is natively supports EPC
- C. This type of modeling is not supported in EPC and modular should follow a flat modelling technique.
- D. Since the product model uses OOTB feature of EPC, MACD operations and decomposition are guaranteed to work well
- E. Modeling children with large cardinalities can result in processing inefficiencies for MACD operations.

Answer: A,B,E

NEW QUESTION # 56

Has commercial attribute called "access Type" on the internet offers with two values, namely DSL and Fiber. UC has requirement to model routers as technical products and offer either a DSL or a fiber router based on the "access type" value. What kind of decomposition relationship should a consultant recommend to achieve this requirement?

- A. M:1
- B. 1:M
- C. 1:1
- D. M:M

Answer: B

NEW QUESTION # 57

Universal containers (UC) is a communication service provider using communication cloud. As a part of internet order fulfillment, UC warehouse agents will use salesforce to enter a router's barcode and enter the shipping tracking number of the router. How should a Communication cloud consultant solve this requirement?

- A. Configure an Autotask Orchestration item that will automatically launch an OmniScript to enter the router's barcode number and shipping tracking number
- B. Configure a Manual Task Orchestration item that will launch an OmniScript to enter the router's barcode number and shipping tracking number
- C. Configure a manual task Orchestration item that will launch a flow to enter the router's barcode number and shipping tracking number.
- D. Configure a Push Event Orchestration item that will receive the router's barcode number and shipping tracking number

Answer: B

NEW QUESTION # 58

A Large Tier 1 Telco with 20 million subscribers needs to move all of their customer data from legacy system to communication cloud. The team have discovered it would take a long time to migrate all the data over. which approach should the fulfillment designer recommend as the migration strategy to ensure that all the orders uninterrupted through the salesforce platform during migration?

- A. Partition the data into logical blocks and run the migration in multiple stages over time, allowing for on demand migration data when migrations occurs
- B. Migrate Data on demand as orders are raised through the salesforce interface and implement a bulk migration strategy
- C. Disable the production system during off peak hours and migrate the data from the old system to the new system. Ensure both new and old system are online during Peak hours.
- D. Partition the data into logical blocks and run the migration in multiple stages over time, allowing for on demand migration for the non-migrated data to the legacy system

Answer: D

Acme technology is an internet service provider that has 20 distinct download and 10 upload speeds, unique billing code must be sent to billing system during fulfillment.

- A. Create a single CFS specifications and map the upload and download speeds. Retrieve the fulfillment details from the calculation matrix using a custom auto task
- B. Create Multiple CFS specification where the billing code attribute is defined. Use attribute based decomposition relationship to map the various upload/download speeds to the billing code attribute
- C. Create a technical product catalog which maps 1:1 to the billing model. Use the out of the box tool to create product and generate billing code. Use unconditional decomposition relationships to select the correct technical product
- D. Create a single CFS specifications and map the upload and download speeds. Retrieve the fulfillment details from the calculation matrix market using the integration procedure invoked by an auto task
