Besides, our Salesforce-Slack-Administrator Exam Questions will help you pass the exam and get the certification for sure.

Salesforce Certified Slack Administrator Sample Questions (Q145-Q150):

NEW QUESTION # 145

You're an Org Admin in your Slack Enterprise Grid org.

Your security team has requested that all new Slack Connect channels only be approved by Org Admins and Org Owners.

What should you do?
(Select the best answer.)

- A. Advise all Workspace Admins and Workspace Owners to forward all Slack Connect channel requests to Org Admins and Org Owners.
- **B. Use Slack's default Slack Connect channel approval permissions which state only Org Admins and Org Owners can approve new channel requests.**
- C. Change the permissions in the admin dashboard so that Slack Connect channels can be approved by any Workspace Admin or Workspace Owner.
- D. Send all Slack Connect channel requests to a private channel on an Org Admin and Org Owner-only workspace.

Answer: B

Explanation:

Slack's default permissions for Slack Connect channel approvals state:

"Only Org Admins and Org Owners can approve Slack Connect channels by default in an Enterprise Grid organization." No manual forwarding or private channel workflows are needed if using defaults (B, D). Changing permissions to let Workspace Admins/Owners approve (A) would contradict the requirement.

-

NEW QUESTION # 146

Clint is a Workspace Owner on the Sales Workspace, and his organization is on Slack's Enterprise Grid plan.

Clint cannot find the option to make the #announcement-sales multi-workspace channel available to all Workspaces in the Org. Who can give Clint multi-workspace channel permissions?

- A. Only Org Owners can manage multi-workspace channels.
- B. A Workspace Owner, who already has multi-workspace channel permissions, can give them to Clint.
- **C. Org Owners and Org Admins decide who can manage multi-workspace channels in this situation.**
- D. The Sales Workspace Primary Owner can give multi-workspace channel permissions to Clint.

Answer: C

NEW QUESTION # 147

GoodAdvertisements Inc works with several companies to support global advertising campaigns and are on a paid plan. They are preparing for a campaign launch that requires input from multiple companies.

GoodAdvertisements Inc wants the ability to coordinate effectively with the companies before and during their respective launch in a private channel, but it is not clear whether the companies use paid Slack plans.

The Admins at the company want to take security precautions before inviting any outside individuals into their Slack workspace.

What is the best way for the Admins to have the individuals from the outside companies join the Slack workspace and ensure the process scales for future launches with other companies?

- A. Require that invitations get approval via a #guest-invitation-approval channel so Admins can action the requests and inform project leaders to invite individuals from outside companies as Multi-Channel Guests. Set expiry dates for the Multi-Channel Guests.
- **B. Require that invitations get approval via a #guest-invitation-approval channel so Admins can action the requests and inform project leaders to invite individuals from outside companies as Single-Channel Guests. Set expiry dates for the Single-Channel Guests.**
- C. Have the Admins individually send out Single-Channel Guest invitations.
- D. Ask the outside companies to upgrade to the paid plan. Then, share the launch channel externally to the companies, and set a reminder to unshare the channel when the launch is complete.

Answer: B

Explanation:

The best practice in Slack for securely collaborating with external partners is:

"Use Single-Channel Guests for external users when collaboration is limited to specific channels. Admins should control guest approvals, ideally via a private approval workflow, and set expiry dates for guest accounts to ensure access is revoked after projects end." Multi-Channel Guests (Option B) provide broader access than necessary, and manually inviting guests (Option C)

does not scale well. Asking companies to upgrade (Option D) is unrealistic for scalable collaboration.

-

NEW QUESTION # 148

How many integrations can be installed on a workspace on the Standard plan?

- A. 25 integrations
- B. 5 integrations
- C. 10 integrations
- D. Unlimited

Answer: D

NEW QUESTION # 149

You're an IT Manager and Slack Workspace Owner leading a team of employees on Slacks Business plan.

Your security team has requested that you put a governance process in place for installing and approving Slack apps requested by users. They want to ensure that your team reviews each app before installation to ensure it meets compliance requirements They also want to audit requests and approvals, and to require a rationale for why the app is being requested.

What is the best approach that uses native functionality to address the security teams request to manage app installations and approvals?

- A. Create a public channel called
