C_ACDET_2506考試證照綜述 & C_ACDET_2506證照

通過C_ACDET_2506認證考試好像是一件很難的事情。已經報名參加考試的你，現在正在煩惱應該怎麼準備考試嗎？如果是這樣的話，請看下面的內容，我現在告訴你通過C_ACDET_2506考試的捷徑。可以讓你一次就通過考試的優秀的C_ACDET_2506考試資料出現了。它就是VCESoft的C_ACDET_2506考古題。如果你想輕鬆通過考試，那麼快來試試吧。

最新的 SAP Certified Associate C_ACDET_2506 免費考試真題 (Q59-Q64):

問題 #59

During which SAP Activate Methodology phase do you define the customer requirements?

- A. Design
- B. Discover
- **C. Explore**
- D. Define

答案：C

解題說明：

SAP Activate's Explore phase is focused on refining and validating customer requirements through fit-to-standard workshops. During this phase, project teams analyze SAP best practice processes alongside customer business needs, identifying configuration gaps and defining functional requirements.

Design as a distinct phase has been replaced by the more agile Explore phase, focusing on solution validation.

The Discover phase focuses on solution evaluation and strategy alignment, not detailed requirements gathering. The term "Define" is not part of SAP Activate methodology.

Proper requirements definition during Explore ensures that the configurations built in Realize align with business needs, reducing rework and enhancing solution adoption. This methodology reflects SAP's emphasis on agile and iterative project delivery within

cloud and hybrid deployments.

問題 #60

The customer wants to have a field to hold Contract Storage Locations and the address. Those locations are loaded from an external system, and the user should be able to search for storage locations.

What should be used to hold the valid storage locations?

- A. You should create a new Flex Master Data (FMD) Template with appropriate attributes and call it Storage Location. Once the template is published and sample data loaded, you can create a custom field and select the type Storage Location
- B. Create a new field of type Text, with a custom Validation where the available Storage Locations are listed.
- C. You should load a new Enumeration Type and call it Storage Location and load the location addresses. Create a new field of type Enumeration with a custom filter to only Enumerations of type show Storage Locations.
- D. Create a new field of type Date, where each date entry is tied to a unique Storage Location and its corresponding address, allowing users to select locations based on historical data entries.

答案: A

問題 #61

Which of the following considerations are important when creating custom fields? (Select 2 correct answers)

- A. There's a limit to the number of fields, by data type, that can be added to a class
- B. Published field changes can be reverted via Un-publish to free up memory
- C. When a field has been created and published, that field type has been consumed from the number of available fields on the class
- D. The data type of a field can be dynamically changed, depending on data type availability

答案: A,C

解題說明:

SAP Ariba allocates a finite number of field "slots" per data type for each class. When a custom field is created and published, it consumes one of these slots. Therefore, there are limits to how many fields of each type you can create per class. The data type cannot be changed after creation, and un-publishing does not reclaim the allocated slot; you must delete the field to free resources. Planning field usage carefully avoids hitting these system limits.

問題 #62

What actions can typically be performed on existing fields? Note: There are 3 correct answers to this question.

- A. Change the internal name
- B. Change the help tip
- C. Make the field mandatory
- D. Change the field type
- E. Add a Visibility, Editability, or Validity Condition

答案: B,C,E

問題 #63

Which of the following languages is used to define defaults on fields within Ariba?

- A. Python programming language
- B. Ariba expression language
- C. Javascript
- D. ABAP

答案: B

問題 #64
