

DASCA SDS 1 year of Free Updates

P.S. Free 2026 DASCA SDS dumps are available on Google Drive shared by Free4Dump: <https://drive.google.com/open?id=1JSw1TkenyZyyWwT5hlpDov2ZBpjKtvD>

Just as an old saying goes, it is better to gain a skill than to be rich. Contemporarily, competence far outweighs family backgrounds and academic degrees. One of the significant factors to judge whether one is competent or not is his or her SDS certificates. Generally speaking, SDS certificates function as the fundamental requirement when a company needs to increase manpower in its start-up stage. In this respect, our SDS practice materials can satisfy your demands if you are now in preparation for a SDS certificate.

Knowledge of the SDS study materials contains is very comprehensive, not only have the function of online learning, also can help the user to leak fill a vacancy, let those who deal with qualification exam users can easily and efficient use of the SDS study materials. By visit our website, the user can obtain an experimental demonstration, free after the user experience can choose the most appropriate and most favorite SDS Study Materials download. Users can not only learn new knowledge, can also apply theory into the actual problem, but also can leak fill a vacancy, can say such case selection is to meet, so to grasp the opportunity!

SDS Valid Test Camp, SDS Reliable Exam Labs

Are you interested in Free4Dump SDS pdf torrent? You know, most of IT candidates choose DASCA SDS for preparation for their exam test. Yes, we provide you with the comprehensive and most valid SDS study material. We say valid because we check the update every day, so as to ensure the SDS Exam Dump offered to you is the latest and best. With SDS updated training pdf, you can pass your SDS actual exam at first attempt.

DASCA Senior Data Scientist Sample Questions (Q64-Q69):

NEW QUESTION # 64

Business Intelligence (BI) is:

- A. BI focuses on reporting on the future state of the business
- B. BI focuses on "What happened?"
- **C. Both A and B**
- D. Both B and C
- E. BI focuses on descriptive analytics

Answer: C

Explanation:

Business Intelligence (BI) is primarily focused on descriptive analytics and reporting - understanding historical and current business performance.

Option A (Descriptive analytics): Correct. BI uses dashboards, reports, and OLAP tools to summarize what has occurred in the past.

Option B ("What happened?"): Correct. BI answers retrospective questions by analyzing transactional and operational data.

Option C (Future state): Incorrect. Predicting future business outcomes falls under predictive analytics or advanced analytics, not BI. Thus, the correct answer is Option D (Both A and B).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Data Visualization & BI: Descriptive Analytics and Reporting.

NEW QUESTION # 65

Which of the following is correct?

- A. The central object in Pandas is called a DataFrame
- B. DataFrame is similar to SQL tables or R data frames
- **C. All of the above**
- D. Both A and B
- E. A data frame is a table with rows and columns

Answer: C

Explanation:

Pandas is one of the most widely used Python libraries for data analysis and manipulation. Its central object is the DataFrame.

Option A: Correct. DataFrame is the core data structure in Pandas.

Option B: Correct. DataFrame resembles SQL tables and R data frames, supporting row/column indexing, joins, and grouping.

Option C: Correct. A DataFrame is essentially a 2D labeled table consisting of rows and columns.

Option D: Correct, but not fully inclusive.

Option E: Correct, since all of A, B, and C are true.

Thus, the best answer is Option E (All of the above).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Programming for Data Science: Pandas Data Structures.

NEW QUESTION # 66

Which of the following is NOT a process of Use Case?

- A. Identify your key business stakeholders
- **B. Brainstorm the outcomes that the key stakeholders need to answer to facilitate making the decisions**
- C. Brainstorm the questions that the key stakeholders need to answer to facilitate making the decisions
- D. Capture the decisions that the key business stakeholders need to make in order to support the organization's key business initiatives
- E. Understand your organization's key business initiatives or business challenge

Answer: B

Explanation:

Use Case Development in data science projects involves identifying business needs and mapping analytics to business decisions. The standard steps include:

Option A: Understanding the key initiatives or challenges.

Option B: Identifying the key stakeholders.

Option C: Capturing the decisions stakeholders must make.

Option E: Brainstorming the questions stakeholders need answered to support decisions.

However:

Option D (Brainstorm the outcomes stakeholders need to answer): Incorrect phrasing. It is not "outcomes" that are brainstormed but questions and decisions.

Thus, the correct answer is Option D.

DASCA Data Scientist Knowledge Framework (DSKF) - Business Use Case Development Process.

NEW QUESTION # 67

Spark is written in:

- **A. Scala**

- B. Python
- C. Java
- D. C++
- E. C

Answer: A

Explanation:

Apache Spark is an open-source distributed computing framework widely used for big data processing and machine learning pipelines.

The core implementation of Spark is written in Scala (Option A), which runs on the JVM (Java Virtual Machine).

Spark also provides APIs for Java, Python (PySpark), R, and SQL, but its native language is Scala.

Options C (C) and D (C++) are incorrect; Spark is not written in these languages.

Python (Option E) is a supported API, but Spark itself is not written in Python.

Thus, the correct answer is Scala (Option A).

NEW QUESTION # 68

Which of the following errors refers to the wrong negation of a true null hypothesis?

- A. Type II Error
- B. None of the above
- C. Logical Error
- D. Type I Error
- E. Hypothesis Error

Answer: D

Explanation:

In hypothesis testing, two main types of errors are defined:

Type I Error (Option A): Occurs when the null hypothesis (H_0) is true, but we incorrectly reject it. This is known as a false positive.

Example: Concluding a drug is effective when it is not.

Type II Error (Option B): Occurs when the null hypothesis (H_0) is false, but we fail to reject it. This is a false negative. Example:

Concluding a drug has no effect when it actually does.

Logical Error / Hypothesis Error (Options C and D): Not standard terms in statistical hypothesis testing.

Thus, the "wrong negation of a true null hypothesis" refers to a Type I Error (false positive).
