## valid EAEP2201 Enterprise Administration Professional 2201 Practice Course

Please Get the Link of the Exam to proceed further - <https://www.educationry.com/?product=pass-eaep2201-enterprise-administration-professional-2201-certification-exam-educationry>

Most effective these exam dumps are routinely updated with usually precise and most current material by profoundly talented authorities, that have obtained authentication in their absolute very first attempt. Whenever you get your hands around the most current exam dumps preparation supply, then, at that point, you don't need to pressure over alluding to distinctive sources. These correct exam dumps pdf cover just about every single prospectus of this exam. You must merely concentrate on these exam questions cautiously and comprehend them well.

Using the assistance with the exam dumps you can quickly release your stress more than your exam readiness due to the deficiency. Prepare on time and get genuine exam dumps for efficient preparation. Get the additional weight due to the fact of it, you can get the itemized this exam questions connected along with your affirmation. These precise exams supply you using a belief of how to plan for the exam successfully. The genuine exams intended for operating on the expert abilities of the contender for the exam certification dumps who want to be able to cope with just about every one of the concerns impeccably.

Get prepared by means of the updated exam, you find out using the most current innovations, and any time you program by the most recent exam dumps 2022, you comprehend its significance and also the advantages in the executions. The part of the veritable exam dumps is coordinated appropriately by the endeavors of our topic matter experts. Carve out opportunities to perform it appropriately and afterward, you receive the greatest outcomes in your exam conclusion. Make your preparation in advance by taking the exam dumps.

Choose the major excellent exam dumps for the preparation of the exam which are checked by the exam dumps. The greatest exam questions and answers are finished by the precise exam dumps that happen to be in your schedule. Get ready with a compelling exam dumps pdf then you definitely will truly like to answer 90% from the exam certification dumps ideal. The fundamentals of the certified exam are investigated by professionals, so our refreshed exam questions will construct your capacity of inventiveness.

## EAEP2201試験準備、EAEP2201資格参考書

より落ち着いて、落ち着いて試験に合格してください。当社の製品を使用した後、当社の学習資料は、EAEP2201試験の前に実際のテスト環境を提供します。シミュレーション後、試験環境、試験プロセス、試験概要をより明確に理解できます。EAEP2201学習教材は本当にあなたの友達になり、あなたが最も必要とする助けを与えてくれます。EAEP2201試験の教材はあなたを理解しており、忘れられない旅にあなたを同行したいと思っています。

**Esri Enterprise Administration Professional 2201 認定 EAEP2201 試験問題**

## (Q25-Q30):

### 質問 # 25

An ArcGIS Enterprise administrator wants to publish their feature classes as layers in bulk from a registered geodatabase. Which action should the administrator perform?

- A. Create a data store item in the ArcGIS Enterprise portal
- B. Import an SDE connection file into ArcGIS Server Administrator Directory
- C. Register the geodatabase in ArcGIS Server Manager
- D. Register as a hosted layer in ArcGIS Data Store

正解: C

#### 解説:

To publish feature classes as services in bulk from an enterprise geodatabase, it must first be registered with the ArcGIS Server site. This registration tells ArcGIS Server where to access the data directly for referenced service publishing. The proper way to do this is through ArcGIS Server Manager.

From ArcGIS Enterprise documentation:

"To publish layers directly from a registered enterprise geodatabase without copying data, you must register the geodatabase with your ArcGIS Server site using ArcGIS Server Manager."

- \* Option B is used for hosted services, not referenced publishing.
- \* Option C is not the correct interface for registering data sources.

\* Option D involves hosting data, which is not applicable for referenced layers from a geodatabase.

Reference: ArcGIS Server - Registering Data Stores for Publishing Referenced Services

### 質問 # 26

An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.

Which action should the administrator perform?

- A. Use command line utilities
- B. Delete users using the Member tab
- C. Batch delete users with ArcPy

正解: A

#### 解説:

The most efficient and supported method for managing and removing multiple users after a Portal for ArcGIS upgrade is by using command line utilities, specifically the `deleteusers` utility included with Portal for ArcGIS. This tool allows administrators to batch delete user accounts by referencing a file that lists usernames. This method is especially useful when needing to quickly reduce the number of named users to comply with licensing restrictions.

Deleting users individually via the Member tab (Option B) is time-consuming and inefficient when dealing with large numbers of accounts. Using ArcPy (Option C) is not supported for managing Portal users in bulk.

Reference Source: ArcGIS Enterprise Administrator Guide - Portal for ArcGIS tools and command line utilities

### 質問 # 27

An ArcGIS Enterprise deployment is completely internal and does not have access to the internet. How should the organization find patches and updates for the deployment components?

- A. Run the patch notification bat utility from the command line
- B. Open the Check For Updates option on the machine where ArcGIS Server is installed
- C. Refer to the Patches and Service Pack page on the Esri Support website

正解: A

#### 解説:

For environments without internet access, the organization can use the `patchnotification.bat` utility to check for available patches and updates. This utility can be run from the command line and provides information about the current patch status of the ArcGIS Enterprise components. Administrators can then manually download the necessary patches from another machine with internet

access and transfer them to the internal environment for installation.

Reference Source: ArcGIS Enterprise documentation on checking for and installing software patches and updates

### 質問 # 28

An ArcGIS analyst is curating a series of basemaps for field crews editing utility infrastructure in the field.

The analyst must ensure optimal performance.

Which type of service should be published?

- A. Cached map service
- B. Dynamic map service
- C. **Vector tile service**

正解: C

解説:

For field operations, Vector Tile Services are highly efficient and suitable for basemaps. They offer fast rendering, smaller file sizes, and are easily scalable across various devices, including those with limited bandwidth or processing capabilities. Vector tiles also support dynamic styling and are ideal for offline use, which is often necessary for field crews working in areas with limited connectivity.

Cached map services (Option A) are raster-based and can be larger in size, making them less optimal for mobile use. Dynamic map services (Option C) require real-time data rendering, which can be resource-intensive and may not perform well in field conditions with limited connectivity.

Reference Source: ArcGIS Enterprise documentation on customizing basemaps

### 質問 # 29

A GIS contractor is developing and testing an upcoming workflow for a client. The contractor is publishing fictional hydrant locations as a service to be consumed in a custom application. The contractor wants to consume as few resources as possible for the client's ArcGIS Server because they do not have a testing environment.

Which type of service should the contractor publish?

- A. Non-hosted feature service
- B. **Hosted feature service**
- C. Non-hosted map service
- D. Scene service

正解: B

解説:

The contractor should publish a hosted feature service. Hosted feature services are managed entirely by the ArcGIS Data Store, not by the ArcGIS Server site directly. This means they consume fewer server resources since they are not managed by a dedicated ArcGIS Server site's memory or CPU at runtime the way traditional services are.

From ArcGIS documentation:

"Hosted feature layers (services) are stored in and powered by the ArcGIS Data Store, relieving ArcGIS Server from managing service processes. This is ideal for testing, lightweight apps, or non-production workflows when minimizing load on the GIS Server is desired."

\* Option B (Non-hosted map service) would require server-side management and is more resource-intensive.

\* Option C (Scene service) is used for 3D visualization and is not appropriate for 2D hydrant location data.

\* Option D (Non-hosted feature service) would also consume more ArcGIS Server resources.
