EMC Dell PowerProtect Data Domain Deploy 2023 Sample Questions (Q55-Q60):

NEW QUESTION # 55

The finance department requires PDFs that are no longer being accessed be sent to AWS S3.

Which data movement policy is used?

- A. Age-based
- B. Age-driven
- C. Recall
- D. Age-range

Answer: A

Explanation:

An age-based data movement policy automatically moves data to a lower-cost storage tier (in this case, AWS S3) based on the age of the files. This means that PDFs that have not been accessed for a certain period will be identified and moved to AWS S3, aligning with the finance department's requirement to archive infrequently accessed data. This policy helps in managing storage efficiently and reducing costs by offloading older data to cheaper storage options.

NEW QUESTION # 56

A customer has stored the data that is in the cloud using PowerProtect DD. For security reasons, encryption will be applied to the data.

What is the required action to achieve the customer's goal?

- A. Encrypt and reupload the data
- B. Enable the encryption via cloud tier level
- C. Turn off encryption and reenable
- D. Activate the Data at Rest encryption

Answer: A

NEW QUESTION # 57

When the PowerProtect DD system boots up for the first time, the CU configuration wizard script does not start automatically. Which of the following can you do to start the configuration wizard manually? (Choose two.)

- A. Restart the system and the configuration wizard appears after you log in as sysadmin
- B. Use the adminaccess configure CLI command
- C. Use the config setup CLI command
- D. Use the configure terminal CLI command
- E. In the DD System Manager select Maintenance > System > Configure System

Answer: C,E

Explanation:

Use the config setup CLI command: This command starts the configuration wizard from the command-line interface, allowing you to set up the system manually.

In the DD System Manager select Maintenance > System > Configure System: If you are using the graphical DD System Manager

interface, you can navigate to the "Maintenance" section and select "Configure System" to launch the configuration wizard.

NEW QUESTION # 58

What is the maximum number of ES40 SAS shelves that can be added to a PowerProtect DD system with an existing DS60 shelf?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

Explanation: When a DS60 shelf is already part of the configuration, a maximum of 5 ES40 SAS shelves can be added to maintain balance and prevent overloading the system's data handling capabilities. This limit ensures optimal performance and reliability.

NEW QUESTION # 59

How are the slots identified on a PowerProtect DD DS60 storage shelf?

- A. Columns of 12 (1 through 12)
Rows of five (A through E)
- B. Columns of 10 (1 through 10)
Rows of six (A through F)
- **C. Columns of 10 (0 through 9)
Rows of six (A through F)**
- D. Columns of 12 (0 through 11)
Rows of five (A through E)

Answer: C

Explanation:

In the DS60 storage shelf, slots are organized into columns and rows for easy identification. The columns are numbered from 0 to 9, indicating 10 slots in total, while the rows are labeled from A to F, indicating 6 rows.

This identification scheme helps administrators manage and organize the physical components of the storage system effectively.

NEW QUESTION # 60

.....

The D-PDD-DY-23 practice exam we offered is designed with the real questions that will help you in enhancing your knowledge about the D-PDD-DY-23 certification exam. Our online test engine will improve your ability to solve the difficulty of D-PDD-DY-23 Real Questions and get used to the atmosphere of the formal test. Our experts created the valid D-PDD-DY-23 study guide for most of candidates to help them get good result with less time and money.
