

Test Certification 800-150 Cost | 800-150 Latest Exam Questions

What's more, part of that PrepAwayETE 800-150 dumps now are free: <https://drive.google.com/open?id=1cOY-tYUqDxgP2NelfWVFFic2rQw5ebcl>

Your privacy and personal right are protected by our company and corresponding laws and regulations on our 800-150 study guide. Whether you are purchasing our 800-150 training questions, installing or using them, we won't give away your information to other platforms, and the whole transaction process will be open and transparent. Therefore, let us be your long-term partner and we promise our 800-150 Preparation exam won't let down.

With "reliable credit" as the soul of our 800-150 study tool, "utmost service consciousness" as the management philosophy, we endeavor to provide customers with high quality service. Our customer service staff, who are willing to be your little helper and answer your any questions about our 800-150 qualification test, fully implement the service principle of customer-oriented service on our 800-150 Exam Questions. Any puzzle about our 800-150 test torrent will receive timely and effective response, just leave a message on our official website or send us an e-mail for our 800-150 study guide.

800-150 Latest Exam Questions - Reliable 800-150 Exam Tips

The cost of registering a Cisco 800-150 certification is quite expensive, ranging between \$100 and \$1000. After paying such an amount, the candidate is sure to be on a tight budget. PrepAwayETE provides Cisco 800-150 preparation material at very low prices compared to other platforms. We also assure you that the amount will not be wasted and you will not have to pay for the certification a second time. For added reassurance, we also provide up to 1 year of free updates. Free demo version of the actual product is also available so that you can verify its validity before purchasing. The key to passing the 800-150 Exam on the first try is vigorous practice. And that's exactly what you'll get when you prepare from our material. Each format excels in its own way and helps you get success on the first attempt.

Cisco 800-150 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Networking Foundations: This section of the exam measures the skills of a Network Engineer and covers the basic building blocks of computer networking. It explains different types of networks like local area networks and wireless networks, and introduces lightweight wireless LANs. It describes the layers of communication models like the OSI model and TCP• IP stack, and explains how data moves across networks. It also discusses the physical cabling used in networks, such as Ethernet and fiber optics. Students will learn about network switching, IP addressing, subnetting, and routing at Layer 3. The section also introduces Cisco's campus network devices, data center switches, UCS servers, and collaboration devices, describing their roles and functions in the network.

Topic 2	<ul style="list-style-type: none"> • Cisco Infrastructure and Collaboration Infrastructure: This section of the exam measures the skills of a Collaboration Engineer and focuses on Cisco infrastructure devices, endpoints, and collaboration technologies. It introduces network devices, collaboration endpoints like IP phones and video systems, and explains on-premises collaboration deployments using tools like Cisco Unified Communications Manager. It also covers how video systems integrate into collaboration environments and highlights Cisco's cloud services for enterprise communication, including Webex Meetings, Webex Teams, and hosted collaboration solutions.
Topic 3	<ul style="list-style-type: none"> • Cisco UCS and Data Center Architecture: This section of the exam measures the skills of a Data Center Engineer and introduces Cisco's UCS and data center solutions. It explains the devices found in a data center, including switches, UCS servers, and director switches, and describes different server deployment models. Students will also learn about virtualization components like virtual machines, hypervisors, cloud computing concepts, and deployment models. The section covers how Cisco UCS devices fit into campus networks, edge locations, and data centers, and explains the key components and connections used in UCS architecture.
Topic 4	<ul style="list-style-type: none"> • Cisco Hardware Replacement: This section of the exam measures the skills of a Technical Support Engineer and teaches how to safely and correctly replace Cisco hardware. It explains safety procedures such as creating safe work zones and handling electrostatic discharge. Students learn the step-by-step processes to replace a wide range of Cisco devices, from switches and routers to firewalls, UCS servers, and collaboration endpoints. It also covers configuring Cisco NX-OS software, including understanding operating modes, boot procedures, and password recovery, and introduces Cisco collaboration endpoint solutions like IP phones and video systems.

Cisco Supporting Cisco Devices for Field Technicians Sample Questions (Q84-Q89):

NEW QUESTION # 84

What is the purpose of the packages.conf file in Install mode on Cisco IOS XE Software supported switches?

- A. It determines which software packages need to be loaded and in what order during boot up.
- B. It contains the entire bundled software image in a single file.
- C. It is a subdirectory in flash memory where individual software packages are stored.
- D. It is used to extract the bin file during the installation process.

Answer: A

Explanation:

In Install mode, the packages.conf file plays a crucial role in the boot process of Cisco IOS XE Software. It specifies the list of software packages to be loaded and the sequence in which they should be initialized during system startup. This file ensures that all necessary components are correctly loaded, providing a modular and flexible approach to software management.

Contrary to the other options:

* The packages.conf file does not extract the bin file; it references already extracted packages.

* It does not contain the entire bundled image; that's characteristic of Bundle mode.

* While it resides in the flash memory, it is not a subdirectory but a configuration file.

NEW QUESTION # 85

Which management option is best suited for standalone Cisco Secure Firewall deployments?

- A. Cisco Defense Orchestrator
- B. Cisco Secure Firewall Management Center
- C. Cisco Security Manager
- D. Cisco Secure Firewall Device Manager

Answer: D

Explanation:

For standalone Cisco Secure Firewall deployments, the Cisco Secure Firewall Device Manager (FDM) is the most appropriate management option. FDM is a browser-based, on-box management tool that allows administrators to configure and manage a single firewall device without the need for external management infrastructure. It provides an intuitive interface for basic configurations, policy management, and monitoring.

In contrast:

Cisco Secure Firewall Management Center (FMC) is designed for centralized management of multiple firewall devices.

Cisco Defense Orchestrator (CDO) is a cloud-based solution for managing security policies across various devices.

Cisco Security Manager is an older platform primarily used for managing ASA devices.

NEW QUESTION # 86

Drag and drop the configuration tasks for restoring software from the left onto the corresponding commands on the right.

Restore configuration from USB drive.	show running-config
Save configuration changes.	copy running-config startup-config
Display current configuration.	copy tftp: running-config
Download configuration from TFTP server.	copy usbflash0:backup.cfg running-config

Answer:

Explanation:

Restore configuration from USB drive.	Display current configuration.
Save configuration changes.	Save configuration changes.
Display current configuration.	Download configuration from TFTP server.
Download configuration from TFTP server.	Restore configuration from USB drive.

NEW QUESTION # 87

Which two configuration parameters are most critical to ensure optimal performance when configuring a network port for a newly installed IP phone in an enterprise environment? (Choose two.)

- A. VLAN assignment
- B. Link aggregation
- C. Power over Ethernet
- D. Spanning Tree Protocol
- E. QoS classification

Answer: A,C

Explanation:

When configuring a network port for a newly installed IP phone, two critical parameters to ensure optimal performance are:

* VLAN Assignment: Assigning the correct VLANs is essential for segregating voice and data traffic.

Typically, a separate voice VLAN is configured to prioritize voice traffic and enhance security.

* Power over Ethernet (PoE): PoE allows the switch to supply power to the IP phone over the same Ethernet cable used for data transmission. This eliminates the need for separate power supplies and simplifies installation.

* While QoS classification (Option E) is important for prioritizing voice traffic, it is typically configured at a broader network level.

Link aggregation (Option B) and Spanning Tree Protocol (Option C) are more relevant to network redundancy and loop prevention, respectively, and are not directly critical for the initial configuration of an IP phone port.

NEW QUESTION # 88

Refer to the exhibit.

```
Router# 
NAME: "Chassis", DESCR: "Cisco ISR4451-X/K9"
PID: ISR4451-X/K9, VID: V01, SN: FCW2134L0SH
```

Refer to the exhibit. Which CLI show command identifies the serial number on a router?

- A. show idprom
- B. show version
- C. show platform
- D. show inventory

Answer: D

Explanation:

The show inventory command is used on Cisco devices to display detailed information about the hardware components installed, including:

Product Identifier (PID)

Serial Number (SN)

Description of the component

In the exhibit, the output clearly shows:

NAME: "Chassis", DESCR: "Cisco ISR4451-X/K9"

PID: ISR4451-X/K9, VID: V01, SN: FCW2134L0SH

This confirms that show inventory is the correct command to retrieve the serial number and hardware inventory details.

show version provides some system information and sometimes includes serial numbers, but it's not as reliable or detailed for component-level hardware info.

show idprom is not commonly used and not supported on all platforms.

show platform provides platform-specific info but not typically the serial number.

NEW QUESTION # 89

.....

The thousands of Channel Partner Program 800-150 certification exam candidates have passed their dream Supporting Cisco Devices for Field Technicians 800-150 certification and they all used the valid and real Channel Partner Program Supporting Cisco Devices for Field Technicians 800-150 Exam Questions. You can also trust Supporting Cisco Devices for Field Technicians 800-150 pdf questions and practice tests.
