## SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q69-Q74):

### NEW QUESTION # 69

(What are some generative AI tools for an SAP Cloud ERP transformation? Note: There are 3 correct answers to this question.)

- A. ABAP Business Object generator
- B. Integration generator
- C. Extension builder wizard
- D. Process automation
- E. Process model generator

**Answer: A,D,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Generative AI tools for SAP Cloud ERP transformation include process automation capabilities in SAP Build Process Automation for generating and automating business processes, the process model generator in SAP Signavio for creating process models using AI, and the ABAP Business Object generator in Joule for developing ABAP-based business objects to extend ERP functionalities. These tools facilitate efficient migration, customization, and optimization during cloud ERP transformations by leveraging generative AI to streamline code, processes, and extensions.

Exact extracts supporting this:

Process automation: "SAP Build Process Automation integrates with generative AI to generate and edit business processes, decisions, forms, and script tasks using natural language descriptions."sap.com This supports automation in ERP transformations.

Process model generator: "SAP Signavio uses generative AI to assist in process modeling, recommending performance indicators and generating models based on best practices."learning.sap.com ABAP Business Object generator: "Joule generates ABAP

business objects using the ABAP RESTful Application Programming Model (RAP) for extensions in SAP S/4HANA Cloud."learning.sap.com "Generative AI in ABAP Cloud includes business object generation."community.sap.com Other options are incorrect because:

Option B: While extension building is simplified with wizards in SAP Build Code, it is not specifically a "generative AI tool" but rather a guided process; generative aspects come from Joule integration.

Option C: Integration generation is supported in SAP BTP, but not highlighted as a distinct generative AI tool for ERP transformation; focus is on code and process generation.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from SAP Learning Journey "Boosting Your Cloud Transformation Journey with SAP Business AI and Generative AI," units on generative AI in SAP Signavio, Build Process Automation, and ABAP Cloud. Supported by SAP Community blogs on generative AI for S/4HANA migration and SAP Help Portal, aligning with C\_BCBAI\_2502 certification for tools in cloud ERP transformations.

### **NEW QUESTION # 70**

Which SAP AI solution helps optimize supply chain operations?

Please choose the correct answer.

Response:

- A. SAP AI for Supply Chain
- B. SAP Digital Assistant
- C. SAP AI Core
- D. SAP Business Workflow

**Answer: A**

### **NEW QUESTION # 71**

Which SAP AI-powered tool enhances financial forecasting accuracy?

Please choose the correct answer.

Response:

- A. SAP Predictive Analytics
- B. SAP SuccessFactors
- C. SAP AI Business Services
- D. SAP Intelligent Robotic Process Automation

**Answer: A**

### **NEW QUESTION # 72**

Which AI capability is commonly used in SAP Business AI to enhance customer service? Please choose the correct answer.

- A. Predictive maintenance
- B. Blockchain technology
- C. Natural Language Processing (NLP)
- D. AI-driven payroll automation

**Answer: C**

Explanation:

Natural Language Processing (NLP) is the primary AI capability used in SAP Business AI to enhance customer service, enabling automated and personalized interactions. The correct answer is Natural Language Processing (NLP), as it is explicitly documented as a core capability for customer service.

SAP documentation states: "SAP Conversational AI, powered by Joule, leverages Natural Language Processing (NLP) to enhance customer service by enabling chatbots to understand and respond to customer inquiries in natural language." NLP supports "proactively finding answers to customer questions" and

"delivering personalized responses based on customer behavior and history," as seen in SAP Sales Cloud and SAP Service Cloud. For example, Joule's NLP capabilities automate customer support, improve response times, and enhance engagement, making it a cornerstone of SAP's customer experience solutions.

The incorrect options are not relevant to customer service. Predictive maintenance is used in manufacturing, not customer service. Blockchain technology focuses on secure transactions, not customer interactions. AI- driven payroll automation is an HR function, not related to customer service. SAP Conversational AI's reliance on NLP, as evidenced by its integration with SAP Customer Experience, confirms its role in enhancing customer service.

### NEW QUESTION # 73

What are the benefits of SAP AI-driven predictive analytics?

There are 3 correct answers to this question.

Response:

- A. Future trend forecasting
- B. Real-time decision-making insights
- C. Manual invoice processing
- D. Automated anomaly detection
- E. Increased manual data entry

**Answer: A,B,D**

### NEW QUESTION # 74

.....
