

Detail GICSP Explanation Pass Certify| Efficient GICSP Real Exam Answers: Global Industrial Cyber Security Professional (GICSP)

We have to admit that the exam of gaining the GICSP certification is not easy for a lot of people, especially these people who have no enough time. If you also look forward to change your present boring life, maybe trying your best to have the GICSP certification is a good choice for you. Now it is time for you to take an exam for getting the certification. If you have any worry about the GICSP Exam, do not worry, we are glad to help you. Because the GICSP study materials from our company are very useful for you to pass the exam and get the certification.

Passing the GICSP exam with least time while achieving aims effortlessly is like a huge dream for some exam candidates. Actually, it is possible with our proper GICSP learning materials. To discern what ways are favorable for you to practice and what is essential for exam syllabus, our experts made great contributions to them. All GICSP Practice Engine is highly interrelated with the exam. You will figure out this is great opportunity for you. Furthermore, our GICSP training quiz is compiled by professional team with positive influence and reasonable price

GIAC GICSP Real Exam Answers & Examcollection GICSP Questions Answers

Our valid GICSP practice questions are created according to the requirement of the certification center based on the real questions. Our team always checked and revised GICSP dumps pdf to ensure the accuracy of our preparation study materials. We guarantee that our GICSP Exam Prep is cost-efficient and affordable for most candidates who want to get certification quickly in their first try.

GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q71-Q76):

NEW QUESTION # 71

Use

sqlmap to dump tables from <http://localhost/index.php?page-login.php>. The data necessary for this is as follows:

GIAC CERTIFICATION

user_name=john

password=123456

Submit_button=Submit

How many tables does sqlmap find in the dojo control database? Hint: The option to dump tables is -tables

- A. 0
- B. 1
- C. 2

- D. 3
- E. 4
- F. 5
- G. 6
- **H. 7**
- I. 8
- J. 9

Answer: H

Explanation:

This question relates to the use of sqlmap, a popular automated tool for detecting and exploiting SQL injection vulnerabilities, which is part of the GICSP skillset in vulnerability assessment and exploitation.

When using the --tables option, sqlmap enumerates the database tables present.

The "dojo control database" is a common demo database used in many ICS cybersecurity exercises.

According to GICSP lab references and known exercises involving dojo, the database often contains 84 tables, reflecting a complex schema.

This aligns with GICSP's guidance on vulnerability scanning, enumeration, and exploitation techniques in ICS environments.

NEW QUESTION # 72

Observe the network diagram. Which of the following hosts is intended to keep ICS process data in a database?

- **A. 10.10.4.11**
- B. 10.103.17
- C. 10.10.31.217
- D. 10.10.4.123
- E. 10.10.4.239

Answer: A

Explanation:

The host with IP 10.10.4.11 in the network diagram is labeled as the Historian Server. ICS historians are specialized databases designed to collect and store process data from control systems over time for analysis, reporting, and feedback to control processes. 10.10.31.217 is a Microsoft Access Workstation (not a database server).

10.10.4.123 represents NTP servers (time servers), not data storage.

10.10.4.239 is an Engineering Workstation.

10.103.17 is an SQL Server, but per the diagram it is outside the ICS network in a different subnet related to public or enterprise servers.

Thus, 10.10.4.11 (A) is the host intended to store ICS process data.

NEW QUESTION # 73

Which document should be updated to include incident handling while in the Planning phase of incident response?

- A. Vulnerability report
- **B. Disaster recovery plan**
- C. Access control policy
- D. Backup policy

Answer: B

Explanation:

The Disaster Recovery Plan (DRP) (A) is the document that should incorporate incident handling procedures during the planning phase. It details how to respond to and recover from incidents to restore normal operations.

Access control policy (B) governs permissions.

Backup policy (C) describes data backup processes but not incident handling.

Vulnerability report (D) is an assessment document, not a procedural plan.

GICSP underscores integrating incident response within disaster recovery planning to ensure comprehensive preparedness.

NEW QUESTION # 74

What is a benefit of MECM over VVSUS?

- A. Lower configuration and management overhead
- **B. Hardware and software inventory control**
- C. Minimal system resource use
- D. Lower operating and product cost

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Microsoft Endpoint Configuration Manager (MECM) provides advanced features compared to Windows Server Update Services (WSUS), including:

Integrated hardware and software inventory control (A), enabling administrators to track detailed system configurations and installed applications across endpoints.

WSUS primarily focuses on patch deployment and update management without comprehensive inventory capabilities.

MECM's enhanced management capabilities justify its greater resource use and complexity, making it more suitable for enterprise-scale patching and asset management in ICS environments.

NEW QUESTION # 75

An engineer has analyzed a subsystem of a power plant and identified physical and logical inputs that could expose the subsystem to unauthorized access. What has the engineer defined?

- A. A risk analysis
- B. A vulnerability scan
- C. A threat model
- **D. An attack surface**

Answer: D

Explanation:

By identifying all the points where a system could be accessed or attacked (physical or logical), the engineer has defined the attack

surface (B).

A vulnerability scan (A) is an automated tool-based assessment.

A risk analysis (C) evaluates the likelihood and impact of threats.

A threat model (D) outlines potential threat actors and attack paths but not specifically all input points.

Understanding the attack surface is critical to designing effective ICS security controls, as emphasized in GICSP.

NEW QUESTION # 76

.....

GICSP study material has a high quality service team. First of all, the authors of study materials are experts in the field. They have been engaged in research on the development of the industry for many years, and have a keen sense of smell for changes in the examination direction. During your installation, GICSP exam questions hired dedicated experts to provide you with free remote online guidance. During your studies, GICSP Exam Torrent also provides you with free online services for 24 hours, regardless of where and when you are, as long as an email, we will solve all the problems for you. At the same time, if you fail to pass the exam after you have purchased GICSP training materials, you just need to submit your transcript to our customer service staff and you will receive a full refund.
