Free PDF Quiz 2026 CompTIA XK0-006: CompTIA Linux+ Certification Exam Marvelous Customizable Exam Mode

In today's world, the CompTIA Linux+ Certification Exam (XK0-006) certification exam has become increasingly popular, providing professionals with the opportunity to upskill and stay competitive in the tech industry. At UpdateDumps, we understand the importance of obtaining the CompTIA XK0-006 Certification in the CompTIA sector, where technological advancements constantly evolving.

CompTIA Linux+ Certification Exam Sample Questions (Q81-Q86):

NEW QUESTION # 81

A Linux administrator is updating the group membership by executing the following commands:

```
$ whoami  
admin
```

```
$ sudo usermod -sG wheel admin
```

```
$ sudo groups  
root
```

CompTIA

However, the group membership is not changing. Which of the following explains this issue?

- A. The command `groups` was run with `sudo` privileges.
- B. Executing `usermod` with `sudo` is not permitted.
- C. Users cannot be added to the `wheel` group with the `usermod` command.
- D. The options `wheel` and `admin` are transposed.

Answer: A

Explanation:

Running `groups` with `sudo` shows the groups for the root user, not for the admin user. That's why the output only shows root. Without `sudo`, `groups admin` (or `re-login`) would correctly show the updated group membership, including `wheel`.

NEW QUESTION # 82

In the `echo "profile-$num-$name"` line of a shell script, the variable `$num` seems to not be expanding during execution. Which of the following notations ensures the value is expanded?

- A. `echo "profile-'$num'-$name"`
- B. `echo 'profile-$num-$name'`
- C. `echo "profile-${num}-$name"`
- D. `echo "profile-$(num)-$name"`

Answer: C

Explanation:

Using `${num}` ensures correct variable expansion, especially when variables are adjacent to other characters or hyphens. This prevents ambiguity and guarantees `$num` is properly expanded within the string.

NEW QUESTION # 83

Which of the following Ansible components contains a list of hosts and host groups?

- A. Collection
- B. Playbook
- C. Inventory
- D. Fact

Answer: C

Explanation:

In Ansible, the inventory defines the list of managed nodes (hosts) and groups of hosts. It is the source from which Ansible knows what systems to configure or manage.

NEW QUESTION # 84

A systems administrator wants to review the logs from an Apache 2 `error.log` file in real time and save the information to another file for later review. Which of the following commands should the administrator use?

- A. `tail -f /var/log/apache2/error.log > logfile.txt`
- B. `tail -f /var/log/apache2/error.log | logfile.txt`
- C. `tail -f /var/log/apache2/error.log >> logfile.txt`
- D. `tail -f /var/log/apache2/error.log | tee logfile.txt`

Answer: D

Explanation:

Using `tee` allows output to be viewed in real time on the terminal while simultaneously writing it to `logfile.txt`. This meets both requirements: monitoring live updates and saving them for later review.

NEW QUESTION # 85

Which of the following commands should a Linux administrator use to determine the version of a kernel module?

- A. modinfo bluetooth
- B. lsmod bluetooth
- C. modprobe bluetooth
- D. depmod bluetooth

Answer: A

Explanation:

The modinfo command displays detailed information about a kernel module, including its version, author, description, and parameters.

NEW QUESTION # 86

.....

In today's society, our pressure grows as the industry recovers and competition for the best talents increases. By this way the XK0-006 exam is playing an increasingly important role to assess candidates. Considered many of our customers are too busy to study, the XK0-006 real study dumps designed by our company were according to the real exam content, which would help you cope with the XK0-006 Exam with great ease. With about ten years' research and development we still keep updating our XK0-006 prep guide, in order to grasp knowledge points in accordance with the exam, thus your study process would targeted and efficient.
