

Proven and Quick Way to Pass the EPIC EDI101 Exam

Epic EDI101 Bridges Interfaces Exam Questions and Answers 2024

Does every HL7 message have to be encoded with the characters 1A-& ? - answer✓✓No, the encoding characters can be any printable character.

Imagine that your message begins with MSH|^&1. How would you encode the string "Th result is positive & has a value of 2.7 x 10A3."? - answer✓✓The result is positive \T has a value of 2.7 x 10\5\3.

Why is the NTE segment special? - answer✓✓Context; its meaning depends on the segment it follows

What is the difference between receiving an empty field |I and the delete sequence ? - answer✓✓An empty field is ignored by the interface, whereas the delete character will delete information from the database, assuming the field in question supports the delete character.

Aside from HL7 Version 2, name two other standards supported in Bridges? - answer✓✓X12, FHIR, NCPDP, DICOM, and Direct.

What is Bridges? - answer✓✓Epic's interfacing messages along with the application. It consists of both the interface infrastructure to build, send, receive, and file messages along with the tools and utilities to maintain those interfaces

What are stored in the Event Queue, Data Queue, and Control Queue? - answer✓✓The Event Queue contains the information needed to build a message. Usually this is a patient ID, an encounter DAT, and the type of message to be built, amongst other information.

The Data Queue contains the text of HL7 messages and additional metadata.

The Control Queue is a to-do list of message numbers to send or file.

Are messages ever manually deleted from the Data Queue? - answer✓✓No, never. They are purged only by an automated purge job.

What are two ways that interface messages are sent and received? - answer✓✓TCP/IP with an interface engine is the most common communication method. Interconnect is used for HTTPS or other communication outside your local network.

If you are also planning to take the EDI101 practice test and don't know where to get real EDI101 exam questions, then you are at the right place. RealExamFree is offering the actual EDI101 Questions that can help you get ready for the examination in a short time. These EDI101 Practice Tests are collected by our team of experts. It has ensured that our questions are genuine and updated. We guarantee that you will be satisfied with the quality of our CEE: Bridges Interfaces Application Essentials Exam (2026 Version) (EDI101) practice questions.

Our EDI101 training quiz is provided by PDF, Software/PC, and App/Online, which allows you to choose a suitable way to study anytime and anywhere. The PDF versions of EDI101 study materials can be printed into a paper file, more convenient to read and take notes. You can also try the simulated exam environment with EDI101 software on PC. Anyway, you can practice the key knowledge repeatedly with our EDI101 test prep, and at the same time, you can consolidate your weaknesses more specifically.

Customized EDI101 Lab Simulation, EDI101 Reliable Dumps Pdf

Free demo is available for EDI101 training materials, so that you can have a better understanding of what you are going to buy. Free demo will represent you what the complete version is like. We suggest you try free demo before buying. In addition, EDI101 training materials are high quality and accuracy, since we have a professional team to collect the latest information of the exam. Therefore if you choose EDI101 Exam Dumps of us, you can get the latest version timely. We provide you with free update version for one year for EDI101 training materials.

EPIC CEE: Bridges Interfaces Application Essentials Exam (2026 Version) Sample Questions (Q47-Q52):

NEW QUESTION # 47

An interface can be started if one or more of the profile variables say " Review Required. "

- A. True
- B. False

Answer: B

Explanation:

The " Review Required " status acts as a safety hard-stop in Bridges. This status usually appears after a system upgrade or when a new interface is created from a template. Bridges prevents the daemons from starting as long as a variable is marked for review to ensure that an analyst has verified that the settings are appropriate for the specific environment, preventing potential data filing errors.

NEW QUESTION # 48

Which of the following actions will mark an error as deleted? (SELECT ALL THAT APPLY)

- A. Retriggering the related message
- B. Releasing the error from a workqueue
- C. Pressing Delete Error from an Error Log Report
- D. Resubmitting the related message

Answer: A,C,D

Explanation:

In Bridges, an error is tied to a specific instance of a message. Resubmitting or retriggering a message (Options B and D) essentially tells the system to try again or create a new message, which clears or " deletes " the error status associated with the previous failed attempt. Additionally, users can manually select Delete Error within an Error Log Report (Option C) to administratively clear an error that no longer requires action.

Releasing an error from a workqueue (Option A) merely removes it from that specific list; it does not delete the error from the system logs.

NEW QUESTION # 49

Which of the following tools can be used to find messages for a given patient within a specified time range?
(SELECT ALL THAT APPLY)

- A. Error Log Report
- B. Message Companion
- C. Interface Messages
- D. Message Search

Answer: B,D

Explanation:

Both Message Search and the Message Companion are patient-centric tools. Message Search allows for broad criteria including patient identifiers and timestamps across various interfaces. The Message Companion is a specialized tool often accessed directly from patient clinical records, allowing users to see all incoming and outgoing messages specifically for that patient within a defined timeframe.

NEW QUESTION # 50

For which of the following tasks would you use the ID Maintenance activity?

- A. Add an Identity ID to a record
- B. Set an outgoing default mapping
- C. Define new ID Types

- D. Specify the table to use for mapping

Answer: A

Explanation:

The ID Maintenance activity is a record-level tool used by analysts to manage specific identifiers for individual records. If a patient or provider has an incorrect external ID or is missing one necessary for interface communication, an administrator uses this activity to manually add, edit, or delete an Identity ID for that specific record. Defining new ID types (Option B) or configuring global mapping tables (Option D) are high-level configuration tasks performed in different administrative activities, not in the individual ID Maintenance tool.

NEW QUESTION # 51

Which of the following are possible reasons that an incoming message might show as "waiting" in your message search results? (SELECT ALL THAT APPLY)

- A. There is a high volume of messages to file.
- B. The communications daemon is not running.
- C. The message is in the holding queue.
- D. The Filer Daemon is not running.

Answer: A,C,D

Explanation:

A message shows as "waiting" when it has been received but not yet processed by the Filer. Common causes include:

- * High Volume: The Filer Daemon is working through a backlog.
- * Filer Daemon Stopped: If the Filer is not running, no messages can move from the queue to the database.
- * Holding Queue: The message is specifically waiting for a patient record lock to be released before it can file.
- * The Communications Daemon (Option D) is responsible for receiving the message; if it weren't running, the message wouldn't even be in the search results yet.

NEW QUESTION # 52

.....

With EDI101 study materials, you will have more flexible learning time. With EDI101 study materials, you can flexibly arrange your study time according to your own life. You don't need to be in a hurry to go to classes after work as the students who take part in a face-to-face class, and you also never have to disrupt your schedule for learning. EDI101 Study Materials help you not only to avoid all the troubles of learning but also to provide you with higher learning quality than other students'.
