1Z0-1163-1 Simulated Test | 1Z0-1163-1 Practice Exam Pdf

DOWNLOAD the newest ExamCost 1Z0-1163-1 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1tVe3dJiZemrj-MkxtFV0qGggmfvXKP_6

ExamCost has made the Oracle 1Z0-1163-1 exam dumps after consulting with professionals and getting positive feedback from customers. The team of ExamCost has worked hard in making this product a successful 1Z0-1163-1 study material. So we guarantee that you will not face issues anymore in passing the 1Z0-1163-1 Certification test with good grades. ExamCost has built customizable 1Z0-1163-1 practice exams (desktop software & web-based) for our customers.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.
Topic 2	• OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.
Topic 3	• OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.
Topic 4	• Oracle Cloud Success Navigator & Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.

Topic 5	• OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.
Topic 6	• OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.
Topic 7	• Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.

Oracle 1Z0-1163-1 Practice Exam Pdf & New 1Z0-1163-1 Study Guide

You can also set the number of Oracle 1Z0-1163-1 dumps questions to attempt in the practice test and time as well. The web-based Oracle 1Z0-1163-1 practice test software needs an active internet connection and can be accessed through all major browsers like Chrome, Edge, Firefox, Opera, and Safari. Our Desktop-based Oracle 1Z0-1163-1 Practice Exam Software is very suitable for those who don't have an internet connection. You can download and install it within a few minutes on Windows-based PCs only and start preparing for the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 exam.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q42-Q47):

NEW QUESTION # 42
What is the primary advantage of the Replenishment Planning process in Oracle Fusion Cloud SCM?

- A. It ensures optimal inventory levels by predicting demand and adjusting supply plans.
- B. It eliminates the need for demand forecasting.
- C. It reduces supplier payment cycles.
- D. It guarantees inventory levels remain static regardless of demand fluctuations.

Answer: A

Explanation:
The primary advantage of Replenishment Planning (A) is ensuring optimal inventory levels by predicting demand and adjusting supply plans accordingly. It uses demand signals-e.g., a forecast of 500 units for next month-to trigger timely replenishments, avoiding overstock (costly) or stockouts (lost sales). Option B is incorrect-static levels defy dynamic demand; Replenishment Planning adapts to fluctuations. Option C is false-demand forecasting is its foundation. Option D is unrelated-payment cycles are a financial process. For instance, if demand spikes unexpectedly, it recalibrates orders, saving costs and maintaining service levels, a key operational benefit.

NEW QUESTION # 43
Which activity is fundamental to the Insight to Sourcing OMBP, ensuring effective procurement and cost optimization?

- A. Idea Generation, which identifies market opportunities, incorporating trend analysis and internal innovation.
- B. Performance Monitoring, which assesses supplier ability to meet quality and service standards by utilizing audits, inspections, or performance reviews.
- C. Spend Analysis, which involves categorizing and analyzing historical spending data to identify cost-saving opportunities and strategic sourcing decisions.

Answer: C

Explanation:
Spend Analysis (B) is the cornerstone of the Insight to Sourcing OMBP in Oracle Fusion Cloud SCM, as it involves categorizing and analyzing historical spending data to uncover cost-saving opportunities and inform strategic sourcing decisions. By examining past expenditures-e.g., identifying that 70% of spending on raw materials comes from a single supplier-businesses can negotiate better terms, consolidate suppliers, or shift to lower-cost alternatives, optimizing procurement costs. Option A (Idea Generation) is a preliminary step focused on innovation and market trends, not the core analytical activity driving sourcing. Option C (Performance Monitoring) evaluates supplier performance post-sourcing, not the initial insight process. For instance, Spend Analysis might reveal excessive spending on expedited shipping, prompting a shift to local suppliers, directly impacting cost efficiency and procurement strategy. This data-driven approach ensures decisions are grounded in financial reality, making it fundamental to the OMBP.

NEW QUESTION # 44
Which two Oracle Redwood Design System UX features, when integrated with Oracle Fusion Applications SCM, deliver a superior user experience?

- A. Enhanced Mobile Accessibility.
- B. Simplified User Interface (UI).
- C. Advanced Data Visualization.
- D. Automated Task Management.

Answer: B,C

Explanation:
The Oracle Redwood Design System enhances Oracle Fusion Applications SCM's user experience with Simplified User Interface (UI) (C) and Advanced Data Visualization (D). The Simplified UI offers an intuitive, clutter-free design with consistent layouts and minimal clicks-e.g., a planner can access demand forecasts in two steps instead of navigating complex menus, boosting productivity. Advanced Data Visualization provides interactive charts and dashboards (e.g., a heat map of inventory levels), enabling users to quickly interpret complex data and make informed decisions. Option A (Enhanced Mobile Accessibility) is valuable but less transformative than UI simplicity and visualization for daily SCM tasks. Option B (Automated Task Management) is a functional feature, not a UX design element. Together, C and D reduce learning curves, enhance decision-making, and elevate user satisfaction.

NEW QUESTION # 45
What is a key feature of the Supplier Portal in Oracle Fusion Cloud Procurement?

- A. It allows suppliers to manage purchase orders, invoices, and collaboration in real time.
- B. It restricts suppliers from modifying their account details.
- C. It only provides access to purchase orders but not invoices.

Answer: A

Explanation:
The Supplier Portal in Oracle Fusion Cloud Procurement is a collaborative platform that allows suppliers to manage purchase orders (POs), invoices, and real-time interactions with buyers. Suppliers can view POs, submit invoices, update shipment details, and respond to queries, enhancing transparency and efficiency. Option A is incorrect because the portal includes both POs and invoices, not just one. Option C is false-suppliers can update account details like contact or banking information, subject to approval workflows. For example, a supplier receiving a PO for 200 units can confirm delivery dates and submit an invoice directly through the portal, reducing email exchanges and delays. This feature streamlines procurement, improves supplier relationships, and ensures data accuracy across the supply chain.

NEW QUESTION # 46
Which two capabilities within the Predict Demand process in the Demand to Management OMBP make it a powerful tool for demand planning and management?

- A. Statistical Forecasting.
- B. Machine Learning-based Forecasting.
- C. Collaborative Forecasting Platform.
- D. Demand Sensing.

Answer: B,C

Explanation:
The Predict Demand process within the Demand to Management OMBP in Oracle Fusion Cloud SCM leverages advanced capabilities to enhance demand planning. Collaborative Forecasting Platform (A) enables stakeholders-such as sales teams, suppliers, and distributors-to collaborate in real time, inputting qualitative insights (e.g., market trends or promotions) that refine forecasts beyond pure data analysis. For example, a retailer might adjust forecasts based on an upcoming sale confirmed via the platform, improving accuracy. Machine Learning-based Forecasting (B) uses algorithms to analyze historical data, detect patterns (e.g., seasonality or anomalies), and adapt predictions dynamically, making it more precise than traditional methods. For instance, it might identify a spike in demand for umbrellas during unexpected rainy seasons. Option C (Statistical Forecasting) is a traditional method relying on statistical models but lacks the adaptive intelligence of machine learning, though it's still used as a foundation. Option D (Demand Sensing) focuses on short-term demand signals (e.g., point-of-sale data) rather than long-term planning, making it complementary but not a core strength of Predict Demand. Together, A and B empower businesses with both human collaboration and cutting-edge AI, ensuring robust demand planning that balances quantitative and qualitative inputs.

NEW QUESTION # 47
......

According to the statistics shown in the feedback chart, the general pass rate for latest 1Z0-1163-1 test prep is 98%, which is far beyond that of others in this field. In recent years, our 1Z0-1163-1 exam guide has been well received and have reached 99% pass rate with all our dedication. As one of the most authoritative question bank in the world, our study materials make assurance for your passing the 1Z0-1163-1 Exam.
