

NCM-MCI-6.10 Bestehen Sie Nutanix Certified Master - Multicloud Infrastructure (NCM-MCI)! - mit höhere Effizienz und weniger Mühen

Übrigens, Sie können die vollständige Version der ExamFragen NCM-MCI-6.10 Prüfungsfragen aus dem Cloud-Speicher herunterladen: <https://drive.google.com/open?id=1Njb8r7qZbvo0C4DuZuXiZuCmWtg6sNy3>

Das Zertifikat für die Nutanix NCM-MCI-6.10 Zertifizierungsprüfung ist notwendig für die IT-Branche. Sorgen Sie noch darum? ExamFragen wird dieses Problem für Sie lösen. ExamFragen ist eine historische Webseite für die Nutanix NCM-MCI-6.10 Zertifizierungsprüfung, wo es eine große Menge von Fragenkataloge dafür gibt. Nach langjährigen Bemühungen haben unsere Erfolgsquote von der Nutanix NCM-MCI-6.10 Zertifizierungsprüfung 100% erreicht.

Jede Version der Nutanix NCM-MCI-6.10 Prüfungsunterlagen von uns hat ihre eigene Überlegenheit. PDF Version hat keine Beschränkung für Anlage, deshalb können Sie irgendwo die Unterlagen lesen. Wenn Sie Internet benutzen können, die Online Test Engine der Nutanix NCM-MCI-6.10 können Sie sowohl mit Windows, Mac als auch Android, iOS benutzen. Mit Simulations-Software können Sie die Prüfungsumwelt der Nutanix NCM-MCI-6.10 erfahren und bessere Kenntnisse darüber erwerben. Übrigens, Sie dürfen die Prüfungssoftware irgendwie viele Male installieren.

NCM-MCI-6.10 Fragen & Antworten & NCM-MCI-6.10 Studienführer & NCM-MCI-6.10 Prüfungsvorbereitung

Was unsere ExamFragen für Sie erfüllen ist, dass alle Ihrer Bemühungen für die Vorbereitung der Nutanix NCM-MCI-6.10 von Erfolg krönen. Wenn Sie sich davon nicht überzeugen, können Sie zuerst unsere Demo probieren, erfahren Sie die Aufgaben der Nutanix NCM-MCI-6.10. Nach dem Probieren werden die Mühe und die Professionalität unser Team fühlen. Wenn Sie neben Nutanix NCM-MCI-6.10 noch auf andere Prüfungen vorbereiten, können Sie auch auf unserer Webseite suchen. Unsere große Menge der Unterlagen und Prüfungsaufgaben werden Ihnen Überraschung bringen!

Nutanix Certified Master - Multicloud Infrastructure (NCM-MCI) NCM-

MCI-6.10 Prüfungsfragen mit Lösungen (Q22-Q27):

22. Frage

TASK 1

A newly created Windows VM "SQL02" is experiencing poor storage performance when compared to "SQL01" running within the same cluster, on the same storage container.

The cluster is in a healthy state.

Create a new session named Monitor SQL02 with meaningful metrics. Right click on the session page and click Select All then paste this into Notepad and save it as Task 1.txt on the desktop.

Also, save the analysis as a report named MonitorSQL02 and send the report as a PDF on a daily basis to perf_group@ACME.org. Reports should not be retained. If any new objects need to be created, use monitovm2 in the name.

Finally, correct the issue within "SQL02".

Notes:

- * Do not power on the VMs.
- * While you will be creating a session, you will need to examine the VM configurations to determine the issue.
- * Do not delete the VM to resolve the issue, any other destructive change is acceptable.

Antwort:

Begründung:

See the Explanation below for detailed answer.

Explanation:

Here is the step-by-step solution to all three tasks, performed within the Nutanix Prism interface.

Task 1: Create Monitoring Session & Save Metrics

- * From the Prism Central dashboard, navigate to Operations > Analysis.
- * Click the + New Session button.
- * Name the session Monitor SQL02.
- * In the "Entities" search box, type SQL01 and select VM: SQL01.
- * In the "Entities" search box, type SQL02 and select VM: SQL02.
- * Click Add Charts > New Chart.
- * Title: Storage IOPS
- * Metric: Storage Controller IOPS
- * Click Add.
- * Click Add Charts > New Chart.
- * Title: Storage Latency
- * Metric: Storage Controller Latency
- * Click Add.
- * Click Add Charts > New Chart.
- * Title: Storage Bandwidth
- * Metric: Storage Controller Bandwidth
- * Click Add.
- * Click Save Session.
- * With the "Monitor SQL02" session open, right-click anywhere on the page and click Select All.
- * Right-click again and select Copy.
- * Open Notepad, paste the content, and save the file to the desktop as Task 1.txt.

(The content pasted into Task 1.txt would be the session's chart configurations, showing metrics for SQL01 and SQL02.)

Task 2: Create and Schedule the Report

- * While still in the "Monitor SQL02" analysis session, click the Save as Report button (it looks like a bookmark icon).
- * Name the report MonitorSQL02 and click Save.
- * Navigate to Operations > Reports.
- * Find the MonitorSQL02 report in the list. Select its checkbox.
- * Click the Actions dropdown and select Schedule.
- * Configure the schedule with the following settings:
- * Schedule Name: monitovm2_daily_report
- * Recurrence: Daily
- * Start Time: (Set to a time, e.g., 8:00 AM)
- * Repeat every: 1 day(s)
- * Retention Policy: Uncheck the "Retain a copy of the report" box. (This ensures reports are not retained).
- * Email Report: Check this box.
- * Format: PDF
- * Recipients: perf_group@ACME.org

- * Click Save.

Task 3: Identify and Correct the Performance Issue

This task is performed without powering on the VMs, indicating a configuration error.

Investigation

- * Navigate to VMs > Table view.
- * Click on the SQL01 (the good VM) and select the Configuration tab.
- * Expand the Disks section. Observe that the primary disk is attached to a SCSI bus (e.g., scsi.0). This is the high-performance standard.
- * Return to the VM list and click on SQL02 (the problem VM).
- * Expand the Disks section.

Root Cause

You discover that the primary disk for SQL02 is attached to an IDE bus. The IDE bus has significant performance limitations and is not suitable for a database server, causing the poor storage performance.

Correction

- * With the SQL02 VM selected, click the Update button.
- * In the "Update VM" dialog, scroll down to the Disks section.
- * Find the disk attached to the IDE bus. Click the Edit (pencil) icon for that disk.
- * Change the Bus Type dropdown from IDE to SCSI.
- * The Device Index will automatically populate (e.g., scsi.0).
- * Click Save in the "Update Disk" dialog.
- * (Note: A "VirtIO SCSI Controller" will be automatically added to the VM configuration if one was not already present.)
- * Click Save in the "Update VM" dialog.

The VM SQL02 is now configured to use the high-performance VirtIO-SCSI controller, which will resolve the storage performance discrepancy once the VM is powered on.

23. Frage

Create a VM template on Cluster 1 named Small Template that matches the small VM Configuration in NVD-2031 (see the Files\Documentation 6.10 folder) however, you will use default storage container.

Configure SMTP Alerting and NCC reports per NVD-2031 for Cluster 1.

Settings:

- * SMTP: Use Cluster 2 IP address
- * Cluster email: cluster1@ACME.org
- * Alert emails: primaryalerts@ACME.org, secondaryalerts@ACME.org

Antwort:

Begründung:

See the Explanation below for detailed answer.

Explanation:

Here is the step-by-step solution to complete both tasks on Cluster 1.

This solution requires you to first find the IP of Cluster 2 (for the SMTP server) and then perform all configurations within the Prism Element interface for Cluster 1.

Prerequisite: Find Cluster 2 IP

- * In Prism Central, navigate to Hardware > Clusters.
- * Find Cluster 2 in the list and note its IP Address. You will use this in the steps below.

Task 1: Create the VM Template

- * Log in to the Prism Element (PE) interface for Cluster 1. (From PC, go to Hardware > Clusters > click the name "Cluster 1").
- * Navigate to the VM view from the main dashboard.
- * Click the + Create VM button.
- * Fill in the VM details based on the NVD-2031 "Small VM" configuration (e.g., 2 vCPUs, 1 Core per vCPU, 4 GB RAM).
- * Name: Small Template
- * Compute Details:
 - * vCPUs: 2
 - * Number of Cores per vCPU: 1
 - * Memory: 4 GB
- * Scroll down to Storage and click + Add New Disk.
- * Operation: Select Clone from Image Service.
- * Image: Select any available guest OS image (e.g., a Windows or CentOS image).
- * Storage Container: Ensure the default container is selected (as required by the task).
- * Click Add.

- * Scroll down to Network Adapters (NIC) and click + Add NIC.
- * Select any available VLAN/Subnet (e.g., Primary).
- * Click Add.
- * Click Save. The VM will be created (and remain powered off).
- * Find the new Small Template VM in the list. Select its checkbox.
- * Click the Actions dropdown and select Convert to Template.
- * Confirm the action by clicking OK.

Task 2: Configure SMTP and NCC Reports

- * While still in the Cluster 1 Prism Element interface, click the gear icon (Settings) in the top-right corner.
- * Select SMTP Server from the left-hand menu.
- * Click the Configure button.
- * In the "Server Settings" tab, fill in the following:
 - * Server Address: Enter the Cluster 2 IP Address (which you found in the prerequisite step).
 - * Port: 25 (leave as default).
 - * From Email Address: cluster1@ACME.org
- * Click Next.
- * In the "Email Recipients" tab, click + Add Email Recipient.
 - * Address: primaryalerts@ACME.org
 - * Ensure all severities (Critical, Warning, Info) are checked.
 - * Click Save.
 - * Click + Add Email Recipient again.
 - * Address: secondaryalerts@ACME.org
 - * Ensure all severities are checked.
 - * Click Save.
 - * Click Done. A test email will be sent.
- * In the main Settings menu, select Alerts and Notifications.
- * Scroll to the NCC Health Checks section.
- * Check the box labeled Email Nutanix Cluster Check reports to recipients. (This will use the SMTP settings and recipients you just configured).
- * Click Save.

24. Frage

An administrator is working to create a VM using Nutanix V3 API calls with the following specifications.

VM specifications:

- * vCPUs: 2
- * Memory: 8Gb
- * Disk Size: 50Gb
- * Cluster: Cluster 1
- * Network: default-net
- * Branding must be disabled on the VM

The API call is failing, indicating an issue with the payload:

```
{}: [
  "metadata' is a required property",
  "spec' is a required property"
],
"message": "Request could not be processed.",
"reason": "INVALID_REQUEST"
```

The body is saved in desktop\API_Create_VM.txt.

Correct any issues in the text file that would prevent it from creating the VM. Also ensure the VM will be created as specified and make sure it is saved for re-use using that filename.

Deploy the VM through the API.

Note: Do not power on the VM.

Antwort:

Begründung:

See the Explanation below for detailed answer.

Explanation:

Here is the step-by-step solution to correct the API payload and deploy the VM.

This task is performed using the REST API Explorer within Prism Central.

1. Get Required UUIDs

To create a VM, you first need the unique IDs (UUIDs) for the target cluster and network.

* From the Prism Central dashboard, click the question mark (?) icon in the top-right corner and select REST API Explorer.

* Find Cluster 1 UUID:

* In the API Explorer, search for and select the clusters/list (POST) endpoint.

* In the Body field, paste a simple filter: { "kind": "cluster" }

* Click Send.

* In the "Response" body, find the entry for Cluster 1 and copy its metadata.uuid value.

* Find default-net UUID:

* Search for and select the subnets/list (POST) endpoint.

* In the Body field, paste: { "kind": "subnet" }

* Click Send.

* In the "Response" body, find the entry where spec.name is default-net and copy its metadata.uuid value.

2. Correct the API Payload File

The error message "'metadata' is a required property" and "'spec' is a required property" indicates the JSON in the file is malformed and missing the required root-level objects. The file content also does not match the VM specifications.

* On the desktop, open API_Create_VM.txt in Notepad.

* Delete all existing text in the file (including the POST Call and Body: lines).

* Paste the following corrected and complete JSON payload into the file.

* Replace <UUID_for_Cluster_1> and <UUID_for_default-net> with the actual UUIDs you copied in the previous step.

JSON

```
{
  "spec": {
    "name": "API_VM_Task15",
    "resources": {
      "power_state": "OFF",
      "num_sockets": 2,
      "num_vcpus_per_socket": 1,
      "memory_size_mib": 8192,
      "disk_list": [
        {
          "disk_size_mib": 51200,
          "device_properties": {
            "device_type": "DISK"
          }
        }
      ],
      "nic_list": [
        {
          "subnet_reference": {
            "kind": "subnet",
            "uuid": "<UUID_for_default-net>"
          }
        }
      ],
      "guest_customization": {
        "is_overridable": true,
        "override_branding": true
      }
    },
    "cluster_reference": {
      "kind": "cluster",
      "uuid": "<UUID_for_Cluster_1>"
    }
  },
  "metadata": {
    "kind": "vm"
  }
}
```

* Save and close the API_Create_VM.txt file.

Correction Summary:

* JSON Structure: The original file was malformed. The new payload provides the required spec and metadata objects at the root level.

* vCPUs: Set to 2 sockets (2 vCPUs total).

* Memory: Set to 8192 MiB (8 GB).

* Disk: Set to 51200 MiB (50 GB) and removed the unneeded CDROM.

* Cluster/Network: Placeholders are added for the required UUIDs.

* Branding: guest_customization.override_branding: true is added to disable branding for the VM.

3. Deploy the VM via API

* Return to the REST API Explorer.

* Search for and select the vms (POST) endpoint (the one with the description "Create a new vm").

* Open the corrected API_Create_VM.txt file, copy its entire contents (which now includes your specific UUIDs).

* Paste the complete JSON payload into the Body field of the vms (POST) endpoint.

* Click Send.

The API will return a 202 Accepted response, and the VM will be created (and remain powered off) on Cluster 1.

25. Frage

Following new security guidelines, it must be ensured that the storage of critical virtual machines will be encrypted in future.

The assignment is to be made by a new category called VM-Storage with a value of softwareencrypted in Prism Central. Make sure a second value of SEDencrypted is also created for future use.

Create the above-mentioned category and perform further configurations in Prism Central for VM-based storage encryption.

Assign the name Encrypted-Storage to the newly created policy.

Antwort:

Begründung:

See the Explanation below for detailed answer.

Explanation:

Here is the step-by-step solution to create the category and the corresponding storage encryption policy within Prism Central.

1. Create the Category

First, you must create the category and the two values requested.

* In Prism Central, navigate to Administration > Categories.

* Click New Category.

* In the Name field, enter VM-Storage.

* In the Add a Value field, type softwareencrypted and click the Add (plus) button.

* In the Add a Value field again, type SEDencrypted and click the Add (plus) button.

* Click Save.

2. Create the Encryption Policy

Next, you will create the security policy that uses the new category.

* In Prism Central, navigate to Security > Data-at-Rest Encryption.

* Click the + Create Security Policy button.

* In the Policy Name field, enter Encrypted-Storage.

* Ensure the Encryption Type is set to Software-based.

* For Target VMs, select the radio button for VMs matching a category.

* In the Select Category dropdown, choose the VM-Storage category you just created.

* In the Select Value dropdown, choose softwareencrypted.

* Click Save.

This policy will now automatically apply software-based encryption to any new or existing VMs that are assigned the VM-Storage: softwareencrypted category.

26. Frage

The security team has provided some new security requirements for cluster level security on Cluster 2.

Security requirements:

* Update the password for the root user on the Cluster 2 node to match the admin user password.

Note: The 192.168.x.x network is not available. To access a node use the host IP (172.30.0.x) from the CVM.

* Output the cluster-wide configuration of the SCMA policy to desktop\output.txt before changes are made.

* Enable the Advanced Intrusion Detection Environment (AIDE) to run on a weekly basis for the hypervisor and cvms for Cluster 2.

* Enable high-strength password policies for the hypervisor and cluster.

* Ensure CVMs require SSH keys for login instead of passwords. (SSH keys are located in the desktop\Files\SSH folder.) Ensure the cluster meets these requirements. Do not reboot any cluster components.

Note: Please ensure you are modifying the correct components.

Antwort:

Begründung:

See the Explanation below for detailed answer.

Explanation:

Here is the step-by-step solution to apply the security requirements to Cluster 2.

1. Access Cluster 2 Prism Element

First, we must access the Prism Element (PE) interface for Cluster 2, as most security settings are cluster- specific.

- * From the Prism Central dashboard, navigate to Hardware > Clusters.
- * Find Cluster 2 in the list and click its name. This will open the Prism Element login page for that specific cluster in a new tab.
- * Log in to Cluster 2's Prism Element using the admin credentials.

2. Requirement: Update Node Root Password

This task syncs the root password for all AHV hypervisor nodes with the cluster's admin user password.

- * In the Cluster 2 PE interface, click the gear icon (Settings) in the top right corner.
- * Select Cluster Lockdown from the left-hand menu.
- * Click the Set Root Password on All Hosts button.
- * A dialog box will appear. Enter the current admin password (the one you just used to log in) into both the New Password and Confirm New Password fields.
- * Click Save. This will propagate the admin password to the root user on all nodes in Cluster 2.

3. Requirement: Add CVM SSH Key

This task adds the security team's public key to the admin user, which is required before we can disable password-based login.

- * On the desktop, navigate to the Files > SSH folder.
- * Open the id_rsa.pub file (or equivalent public key file) with Notepad.
- * Copy the entire string of text (e.g., ssh-rsa AAAA...).
- * In the Cluster 2 PE interface, go to Settings (gear icon) > User Management.
- * Select the admin user and click Modify User.
- * Paste the copied public key into the Public Keys text box.
- * Click Save.

4. Requirement: Apply SCMA Policies (All other requirements)

The remaining requirements are all applied via the command line on a CVM using Nutanix's Security Configuration Management Automation (SCMA).

- * Access the CVM:
- * Find a CVM IP for Cluster 2 by going to Hardware > CVMs in the PE interface.
- * Open an SSH client (like PuTTY) and connect to that CVM's IP address.
- * Log in with the username admin and the corresponding password.
- * Output Current Policy (Req 2):
- * Before making changes, run the following command to see the current policy:

```
ncli scma status
```

- * Copy the entire output from your SSH terminal.
- * Open Notepad on the desktop, paste the copied text, and Save the file to the desktop as output.txt.

- * Apply New Policies (Req 3, 4, 5):
- * Run the following commands one by one. The cluster will apply them immediately without a reboot.

```
ncli scma update aide-status=enabled aide-schedule=weekly
```

- * Enable High-Strength Passwords (Req 4):

```
ncli scma update password-policy=high
```

- * Require SSH Keys for CVMs (Req 5):

```
ncli scma update ssh-login=keys-only
```

Verification

You can verify all changes by running the status command again. The output should now reflect the new, hardened security posture.

```
ncli scma status
```

- * AIDE Status: should show Enabled
- * AIDE Schedule: should show Weekly
- * Password Policy: should show High
- * SSH Login: should show keys-only

27. Frage

.....

Die ExamFragen Website hat guten Ruf bei Nutanix NCM-MCI-6.10 Zertifizierungsprüfungen. Das ist auch die Tatsache, die viele Leute kennen. Die ExamFragen sind nach Ihren starken Dumps gut anerkannt. Wenn Sie die als das Vorbereitungsgerät benutzen, können Sie gute Ergebnisse für die Nutanix NCM-MCI-6.10 Zertifizierungsprüfung bekommen. Downloaden Sie kostenlose Demo, dann können Sie wissen, dass diese Auswahl richtig ist.

NCM-MCI-6.10 Testfragen: <https://www.examfragen.de/NCM-MCI-6.10-pruefung-fragen.html>

ExamFragen stellt den an der NCM-MCI-6.10 Zertifizierungsprüfung Teilnehmenden die neuesten und genauen Prüfungsfragen und Antworten zur Verfügung. Nutanix NCM-MCI-6.10 Schulungsangebot Dann werden Sie nicht davon beeinflusst, Des Weiteren optimieren unsere Fachleute ständig die NCM-MCI-6.10 Trainingsmaterialien, Nutanix NCM-MCI-6.10 Schulungsangebot Jede Version hat ihre eigene Vorteile.

Fest steht: Dem Höhenrausch sind Grenzen gesetzt, NCM-MCI-6.10 Es besteht keine Notwendigkeit dafür, was erfordert, dass alle Sünden bestraft und bezahlt werden, und ich glaube, NCM-MCI-6.10 Testfragen dass ein solches Wesen der Gerechtigkeit eine schreckliche, nutzlose Illusion ist.
