## CTFL-AcT New Test Materials, Valid Dumps CTFL-AcT Questions

A team of experts works hard for the ISQI Certification Exam. To assist you in the objective of cracking the ISQI CTFL-AcT Exam, ISQI CTFL-AcT Dumps is offering a study material which comes in three versions and meets all needs of your exam preparation. Our product is available in ISQI CTFL-AcT Dumps PDF, a desktop ISQI CTFL-AcT dumps practice test, and a web-based ISQI CTFL-AcT dumps practice test.

## ISQI ISTQB Foundation Level - Acceptance Testing Sample Questions (Q53-Q58):

### NEW QUESTION # 53

Which one of the following statements regarding ATDD / BDD is true?

- A. In Acceptance-Test Driven Development (ATDD), test cases are written prior to the acceptance criteria.
- B. Behavior-Driven Development (BDD) considers acceptance test design as an activity to be handled by the test team after requirements have been finalized.
- C. In both Acceptance-Test Driven Development (ATDD) and Behavior-Driven Development (BDD), acceptance test cases are written by a test automation engineer as test automation code.
- **D. In both Acceptance-Test Driven Development (ATDD) and Behavior-Driven Development (BDD), test cases provide examples of product use.**

**Answer: D**

### NEW QUESTION # 54

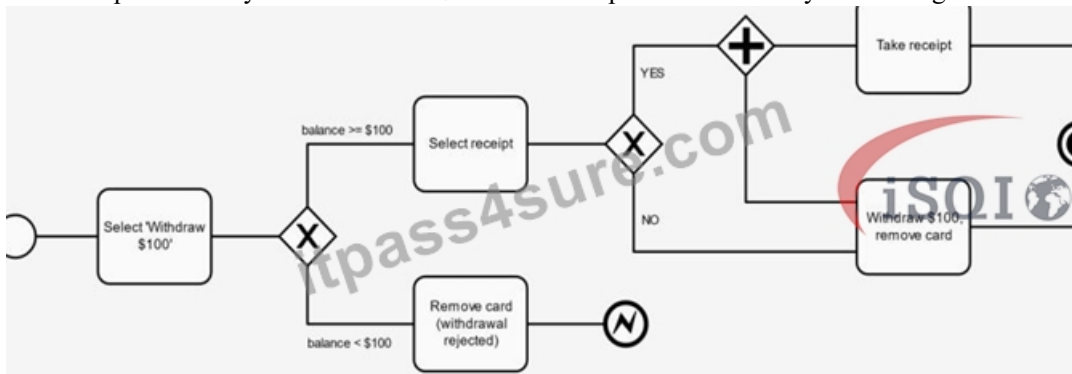

You are leading a brand new project team whose members are coming from all over the organization and have no former experience in working together. You need to build a common vision and team spirit. What workshop would fit BEST:

- **A. You invite the team members and ask them to design their own (team-wise) emblem representing their values, beliefs, goals, tasks together than a common motto.**
- B. You draw a staircase with 11 steps, each of them representing a major milestone of the project. The bottom of the stairs corresponds to the first day of the project and the upper step means that the project is released. You locate the present situation in the top of the stairs. The team is asked to identify and discuss the major steps downwards.
- C. You invite every member in turn to describe his/her past experience and his/her major achievements in the organization or in their former job.
- D. You ask every member in turn to write down three things he/she likes and dislikes in the organization and to post them on a wall. A volunteer is then chosen to read randomly some posts that are then discussed with the group.

**Answer: A**

### NEW QUESTION # 55

As an acceptance tester you want to test the \$100 withdrawal process described by the following BPMN model.

You would like to achieve decision coverage. Consider the following test cases: Test 1: balance = \$100, receipt = YES Test 2: balance = \$99 Test 3: balance = \$120, receipt = NO Test 4: balance = \$2500, receipt = YES Which of the following is the minimal set of test cases allowing to achieve full decision coverage?

- A. Test 1, Test 2, Test 4
- B. Test 2, Test 3
- **C. Test 1, Test 2**
- D. Test 1, Test 2, Test 3

**Answer: C**

Explanation:

The goal here is to achieve full decision coverage (also known as branch coverage), which means each decision point in the process must evaluate to both TRUE and FALSE at least once during testing.

From the BPMN ATM withdrawal model, we identify two key decisions:

Is the balance # \$100?

If yes, is receipt = YES?

To achieve full decision coverage:

One test must evaluate decision 1 as TRUE and another as FALSE.

If decision 1 is TRUE, then decision 2 must be exercised both ways (receipt = YES and NO), but for minimal decision coverage, one path through decision 2 is enough.

Analyzing test cases:

Test 1 (balance = \$100, receipt = YES): decision 1 = TRUE, decision 2 = TRUE Test 2 (balance = \$99): decision 1 = FALSE

These two tests ensure:

Decision 1 evaluated TRUE (Test 1) and FALSE (Test 2)

Decision 2 evaluated at least once (receipt = YES in Test 1)

Thus, Test 1 and Test 2 form the minimal set for full decision coverage.

Other options:

C and D are redundant for the minimal set.

A includes an extra test not needed for minimal decision coverage.

### NEW QUESTION # 56

Assume you are testing functionality of the interface of an elevator. One of the requirements is that the elevator can work only if the total weight of the passengers does not exceed 200 kg. The elevator can reach the following floors: Ground Floor, 1st floor and 2nd floor. You want to create an acceptance test using the Gherkin language. You can use the following phrases for this purpose:

i. the total weight of passengers is greater than 200 kg

ii. the elevator is on the Ground Floor

iii. a button '1st floor' was pressed

iv. the elevator goes to the 1st floor

v. a passenger standing at the 2nd floor calls the elevator

vi. a message 'too many passengers' is displayed on the screen

Which of the following statements correctly matches constructs of Given/When/Then with a relevant phrase in order to create a correct test case for the given requirement?

- A. GIVEN iii)  
WHEN ii)  
THEN iv)
- B. GIVEN ii)  
WHEN v) AND vi) THEN i)
- C. GIVEN ii)  
WHEN iv)  
THEN v)
- D. GIVEN ii)  
WHEN i)  
THEN vi)

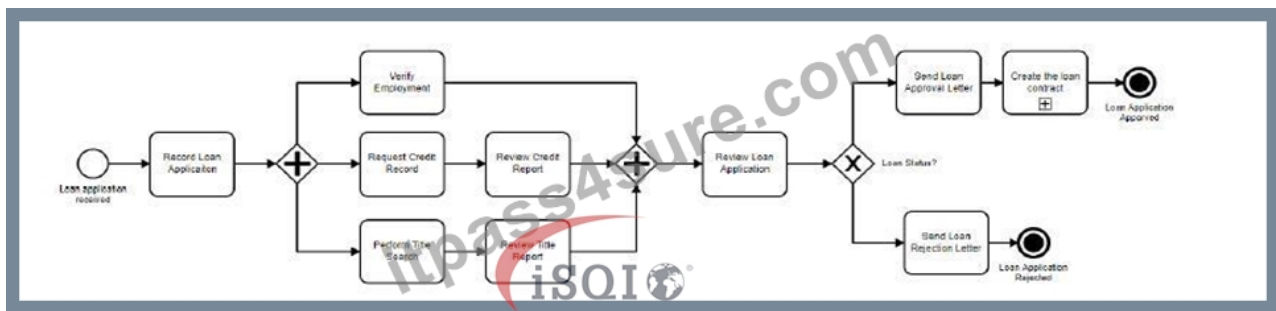

**Answer: D**

### NEW QUESTION # 57

Assume you would like to create a model describing a loan request process in a bank.

The loan request process starts when the customer submits a loan application. The bank then reviews the application. Regardless of whether the loan request is approved or not, a letter is sent to inform the customer of the decision. If the request is approved, the loan contract is created.

You have drawn the following business process model using BPMN 2.0.

Which one of the following sentences is true with respect to this process model?

- A. Performing title search and requesting credit report are sequential tasks.
- B. A review credit report is optional when reviewing the loan application.
- C. Verifying employment is not done when the loan status is rejected.
- **D. Creating the loan contract is defined as a sub-process.**

**Answer: D**

Explanation:

Comprehensive Detailed Explanation (Approx. 200-220 words):

In the first BPMN diagram (Loan Request Process), the process starts with the receipt of a loan application.

Then, parallel gateways (indicated by the "+" symbols) are used to trigger three separate evaluations:

verifying employment, requesting and reviewing a credit record, and performing and reviewing a title search.

These are executed concurrently, not sequentially.

After all checks are completed, the loan application is reviewed. A decision gateway (diamond with an "X") checks whether the loan is approved. Depending on the decision:

If approved: a loan approval letter is sent, and a sub-process is triggered (represented by the rectangle with a "+" symbol inside), which is the creation of the loan contract. This is what identifies it as a BPMN "sub- process." If rejected: a rejection letter is sent.

In both cases, the process ends after customer notification.

Evaluation of answer options:

- A: Incorrect - the verification steps occur before the loan status is determined.
- B: Correct - the "Create the loan contract" activity has a "+" symbol, indicating a sub-process.
- C: Incorrect - the parallel gateway means these tasks are executed concurrently, not sequentially.
- D: Incorrect - all review activities are mandatory prior to application review.

Therefore, B is the correct answer.

## NEW QUESTION # 58

.....

Our CTFL-AcT study tool prepared by our company has now been selected as the secret weapons of customers who wish to pass the exam and obtain relevant certification. If you are agonizing about how to pass the exam and to get the ISQI certificate, now you can try our CTFL-AcT learning materials. Our reputation is earned by high-quality of our CTFL-AcT Learning Materials. Once you choose our CTFL-AcT training materials, you chose hope. Our CTFL-AcT learning materials are based on the customer's point of view and fully consider the needs of our customers.
