# Desktop Juniper JN0-214 Practice Exam Software Offers a Realistic Certification Test Environment

Through years of efforts and constant improvement, our JN0-214 exam materials stand out from numerous study materials and become the top brand in the domestic and international market. Our company controls all the links of JN0-214 training materials which include the research, innovation, survey, production, sales and after-sale service strictly and strives to make every link reach the acme of perfection. Our company pays close attentions to the latest tendency among the industry and the clients' feedback about our JN0-214 Certification guide.

Our industry experts are constantly adding new content to JN0-214 test dumps based on constantly changing syllabus and industry development breakthroughs. We also hired dedicated IT staff to continuously update our question bank daily, so no matter when you buy JN0-214 Study Materials, what you learn is the most advanced. Even if you fail to pass the exam, as long as you are willing to continue to use our JN0-214 test answers, we will still provide you with the benefits of free updates within a year.

JN0-214 Testking Cram & JN0-214 Vce Torrent & JN0-214 Prep Pdf

Purchasing a product may be a caucious thing for all of us, because we not only need to consider the performance of the product but also need to think about the things after purchasing. Our product will provide free demo for trying, and after you have bought the product of the JN0-214 exam, we will send you the product by email in ten minutes after we have received the payment. After you bought the practice materials for the JN0-214 Exam, if you have any question in the process of using, you can ask the service staff for help by email. Free update for having bought product is also available.

Juniper Cloud, Associate (JNCIA-Cloud) Sample Questions (Q62-Q67):

NEW QUESTION # 62
You want to create a template that defines the CPU, RAM, and disk space properties that a VM will use when instantiated.
In this scenario, which OpenStack object should you create?

- A. role
- B. Image
- C. project
- D. flavor

Answer: D

Explanation:
In OpenStack, a flavor defines the compute, memory, and storage properties of a virtual machine (VM) instance. Let's analyze each option:
A . role
Incorrect: A role defines permissions and access levels for users within a project. It is unrelated to defining VM properties.
B . Image

Incorrect: An image is a template used to create VM instances. While images define the operating system and initial configuration, they do not specify CPU, RAM, or disk space properties.

C . project

Incorrect: A project (or tenant) represents an isolated environment for managing resources. It does not define the properties of individual VMs.

D . flavor

Correct: A flavor specifies the CPU, RAM, and disk space properties that a VM will use when instantiated. For example, a flavor might define a VM with 2 vCPUs, 4 GB of RAM, and 20 GB of disk space.

Why Flavor?

Resource Specification: Flavors allow administrators to define standardized resource templates for VMs, ensuring consistency and simplifying resource allocation.

Flexibility: Users can select the appropriate flavor based on their workload requirements, making it easy to deploy VMs with predefined configurations.

JNCIA Cloud Reference:

The JNCIA-Cloud certification covers OpenStack concepts, including flavors, as part of its cloud infrastructure curriculum.

Understanding how flavors define VM properties is essential for managing compute resources effectively.

For example, Juniper Contrail integrates with OpenStack Nova to provide advanced networking features for VMs deployed using specific flavors.

OpenStack Nova Documentation: Flavors

Juniper JNCIA-Cloud Study Guide: OpenStack Compute

NEW QUESTION # 63

In OpenShift, which node type is used to host your application containers?

- A. full node
- B. miner node
- C. worker node
- D. control plane node

Answer: C

Explanation:

In OpenShift, the worker node is used to host your application containers. Worker nodes are where all your coding adventures happen, and they can be virtual or physical.

NEW QUESTION # 64

Which two statements are correct about Kubernetes resources? (Choose two.)

- A. NodePort service exposes the service externally by using a cloud provider load balancer.
- B. A ClusterIP type service can only be accessed within a Kubernetes cluster.
- C. A deploymentConfig is a Kubernetes resource.
- D. A daemonSet ensures that a replica of a pod is running on all nodes.

Answer: B,D

Explanation:

A daemonSet in Kubernetes ensures that a replica of a pod is running on all nodes. A ClusterIP type service can only be accessed within a Kubernetes cluster.

NEW QUESTION # 65

Which two functions does CN2 provide? (Choose two.)

- A. It provides an orchestration solution for VMs and containers.
- B. It performs SDN functions in an NFV solution.
- C. It provides enhanced networking capabilities to private clouds.
- D. It provides underlay network management capabilities.

Answer: A,C

Explanation:
CN2 (Cranial Nerve II), also known as the optic nerve, controls the special sense of vision. It transmits visual information from the retina to the vision centers of the brain. Two functions that CN2 provides are:
It provides enhanced networking capabilities to private clouds. It transmits special afferent impulses of light to the brain and is involved in several reflex arcs related to the ocular system.
It provides an orchestration solution for VMs and containers. It is a unique structure that functions as the bridge between the retinal layer of the eyes and the visual cortex of the brain.

NEW QUESTION # 66
You want to view pods with their IP addresses in OpenShift.
Which command would you use to accomplish this task?

- A. oc get all
- B. oc get pods
- C. oc get pods -o wide
- D. oc get pods -o yaml

Answer: C

Explanation:
To view pods with their IP addresses in OpenShift, you would use the command oc get pods -o wide. This command provides additional information such as the IP address and the node where the pod is located.

NEW QUESTION # 67
......

These Cloud, Associate (JNCIA-Cloud) (JN0-214) exam questions are available at an affordable cost and cover current sections of the actual Cloud, Associate (JNCIA-Cloud) (JN0-214) Exam Questions. Therefore, relying on Exams4sures Juniper JN0-214 exam dumps will ensure that you crack the actual JN0-214 certification exam on the first attempt. For the trouble-less Cloud, Associate (JNCIA-Cloud) (JN0-214) exam preparation of customers, we have designed these three formats of the Cloud, Associate (JNCIA-Cloud) (JN0-214) exam prep material: PDF, desktop practice test software, and web-based practice exam software. You can read the characteristics of these three versions of the Cloud, Associate (JNCIA-Cloud) (JN0-214) practice test material below.
