

# Desktop Oracle 1Z0-1122-25 Practice Exam Software Offers a Realistic Certification Test Environment

2025 Latest PassExamDumps 1Z0-1122-25 PDF Dumps and 1Z0-1122-25 Exam Engine Free Share:  
[https://drive.google.com/open?id=1DmxSpVAEDiciP80NEIDmR0\\_Bte9l\\_fJu](https://drive.google.com/open?id=1DmxSpVAEDiciP80NEIDmR0_Bte9l_fJu)

Our 1Z0-1122-25 practice materials are suitable for exam candidates of different degrees, which are compatible whichever level of knowledge you are in this area. These 1Z0-1122-25 training materials win honor for our company, and we treat it as our utmost privilege to help you achieve your goal. As far as we know, our 1Z0-1122-25 Exam Prep have inspired millions of exam candidates to pursuit their dreams and motivated them to learn more high-efficiently. Our 1Z0-1122-25 practice materials will not let your down.

## Oracle 1Z0-1122-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Get started with OCI AI Portfolio: This section measures the proficiency of Cloud AI Specialists in exploring Oracle Cloud Infrastructure (OCI) AI services. It provides an overview of OCI AI and machine learning services, details AI infrastructure capabilities and explains responsible AI principles to ensure ethical and transparent AI development.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Intro to ML Foundations: This section evaluates the knowledge of Machine Learning Engineers in understanding machine learning principles and methodologies. It explores the basics of supervised learning, focusing on regression and classification techniques, along with unsupervised learning methods such as clustering and anomaly detection. It also introduces reinforcement learning fundamentals, helping professionals grasp the different approaches used to train AI models.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Intro to Generative AI &amp; LLMs:</b> This section tests the abilities of AI Developers to understand generative AI and large language models. It introduces the principles of generative AI, explains the fundamentals of large language models (LLMs), and discusses the core workings of transformers, prompt engineering, instruction tuning, and LLM fine-tuning for optimizing AI-generated content.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Intro to OCI AI Services:</b> This section tests the expertise of AI Solutions Engineers in working with OCI AI services and related APIs. It provides insights into key AI services such as language processing, computer vision, document understanding, and speech recognition, allowing professionals to leverage Oracle's AI ecosystem for building intelligent applications.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>OCI Generative AI and Oracle 23ai:</b> This section evaluates the skills of Cloud AI Architects in utilizing Oracle's generative AI capabilities. It includes a deep dive into OCI Generative AI services, Autonomous Database Select AI for enhanced data intelligence and Oracle Vector Search for efficient information retrieval in AI-driven applications.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Intro to DL Foundations:</b> This section assesses the expertise of Deep Learning Engineers in understanding deep learning frameworks and architectures. It covers fundamental concepts of deep learning, introduces convolutional neural networks (CNN) for image processing, and explores sequence models like recurrent neural networks (RNN) and long short-term memory (LSTM) networks for handling sequential data.</li> </ul>

## 100% Pass 2025 Latest Oracle 1Z0-1122-25: Oracle Cloud Infrastructure 2025 AI Foundations Associate New Dumps Files

There may be a lot of people feel that the preparation process for 1Z0-1122-25 exams is hard and boring, and hard work does not necessarily mean good results, which is an important reason why many people are afraid of examinations. Today, our 1Z0-1122-25 Exam Materials will radically change this. High question hit rate makes you no longer aimless when preparing for the exam, so you just should review according to the content of our 1Z0-1122-25 study guide prepared for you.

### Oracle Cloud Infrastructure 2025 AI Foundations Associate Sample Questions (Q28-Q33):

#### NEW QUESTION # 28

Which AI domain can be employed for identifying patterns in images and extract relevant features?

- A. Natural Language Processing
- B. Anomaly Detection
- **C. Computer Vision**
- D. Speech Processing

**Answer: C**

Explanation:

Computer Vision is the AI domain specifically employed for identifying patterns in images and extracting relevant features. This field focuses on enabling machines to interpret and understand visual information from the world, automating tasks that the human visual system can perform, such as recognizing objects, analyzing scenes, and detecting anomalies. Techniques in Computer Vision are widely used in applications ranging from facial recognition and image classification to medical image analysis and autonomous vehicles.

#### NEW QUESTION # 29

Which type of machine learning is used to understand relationships within data and is not focused on making predictions or classifications?

- **A. Unsupervised learning**

- B. Reinforcement learning
- C. Supervised learning
- D. Active learning

**Answer: A**

Explanation:

Unsupervised learning is a type of machine learning that focuses on understanding relationships within data without the need for labeled outcomes. Unlike supervised learning, which requires labeled data to train models to make predictions or classifications, unsupervised learning works with unlabeled data and aims to discover hidden patterns, groupings, or structures within the data. Common applications of unsupervised learning include clustering, where the algorithm groups data points into clusters based on similarities, and association, where it identifies relationships between variables in the dataset. Since unsupervised learning does not predict outcomes but rather uncovers inherent structures, it is ideal for exploratory data analysis and discovering previously unknown patterns in data .

### NEW QUESTION # 30

Which feature is NOT available as part of OCI Speech capabilities?

- A. Uses extensive data science experience to operate
- B. Provides timestamped, grammatically accurate transcriptions
- C. Supports multiple languages including English, Spanish, and Portuguese
- D. Transcribes audio and video files into text

**Answer: A**

Explanation:

OCI Speech capabilities are designed to be user-friendly and do not require extensive data science experience to operate. The service provides features such as transcribing audio and video files into text, offering grammatically accurate transcriptions, supporting multiple languages, and providing timestamped outputs. These capabilities are built to be accessible to a broad range of users, making speech-to-text conversion seamless and straightforward without the need for deep technical expertise.

### NEW QUESTION # 31

What does "fine-tuning" refer to in the context of OCI Generative AI service?

- A. Upgrading the hardware of the AI clusters
- B. Adjusting the model parameters to improve accuracy
- C. Doubling the neural network layers
- D. Encrypting the data for security reasons

**Answer: B**

Explanation:

Fine-tuning in the context of the OCI Generative AI service refers to the process of adjusting the parameters of a pretrained model to better fit a specific task or dataset. This process involves further training the model on a smaller, task-specific dataset, allowing the model to refine its understanding and improve its performance on that specific task. Fine-tuning is essential for customizing the general capabilities of a pretrained model to meet the particular needs of a given application, resulting in more accurate and relevant outputs. It is distinct from other processes like encrypting data, upgrading hardware, or simply increasing the complexity of the model architecture.

### NEW QUESTION # 32

Which is NOT a capability of OCI Vision's image analysis?

- A. Assigning classification labels to images
- B. Object detection with bounding boxes
- C. Locating and extracting text in images
- D. Translating text in images to another language

**Answer: D**

OCI Vision's image analysis capabilities include locating and extracting text from images, assigning classification labels to images, and detecting objects with bounding boxes. However, translating text in images to another language is not a capability of OCI Vision's image analysis. This functionality typically requires an additional layer of processing, such as integration with a language translation service, which is beyond the scope of OCI Vision's core image analysis features.
