SAP Certified Associate – Back-End Developer - ABAP Cloud	13-Oct-2023	Passed	ILP

Preparation for the professional SAP Certified Associate - Back-End Developer - ABAP Cloud (C-ABAPD-2507) exam is no more difficult because experts have introduced the preparatory products. With Exams4Collection products, you can pass the SAP Certified Associate - Back-End Developer - ABAP Cloud (C-ABAPD-2507) exam on the first attempt. If you want a promotion or leave your current job, you should consider achieving a professional certification like SAP Certified Associate - Back-End Developer - ABAP Cloud (C-ABAPD-2507) exam.

SAP C-ABAPD-2507 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">ABAP Core Data Services and Data Modeling: This section of the exam measures skills of SAP ABAP Developers and covers the creation, definition, and use of Core Data Services (CDS) views for data modeling within SAP environments. Candidates are expected to understand annotations, data definitions, and the role of CDS in enabling advanced data processing and integration across SAP systems.
Topic 2	<ul style="list-style-type: none">SAP Clean Core Extensibility and ABAP Cloud: This section of the exam measures skills of SAP Application Programmers and covers the clean core principles and extensibility options within SAP BTP. It also includes cloud-native ABAP development practices, emphasizing the creation of upgrade-stable and maintainable extensions aligned with SAP's cloud strategy.
Topic 3	<ul style="list-style-type: none">ABAP RESTful Application Programming Model: This section of the exam measures skills of SAP Application Programmers and covers the fundamentals of the ABAP RESTful Application Programming Model (RAP). It includes topics such as behavior definitions, service binding, and the use of managed and unmanaged scenarios. The focus is on building modern, scalable, and cloud-ready applications using RAP.
Topic 4	<ul style="list-style-type: none">Object-Oriented Design: This section of the exam measures skills of SAP ABAP Developers and covers the basics of object-oriented programming in ABAP. It includes concepts such as classes, interfaces, inheritance, polymorphism, and encapsulation, all of which are necessary for building robust and scalable ABAP applications.

C-ABAPD-2507 Valid Exam Voucher & C-ABAPD-2507 Exam Voucher

Having more competitive advantage means that you will have more opportunities and have a job that will satisfy you. This is why more and more people have long been eager for the certification of C-ABAPD-2507. Our C-ABAPD-2507 test material can help

you focus and learn effectively. You don't have to worry about not having a dedicated time to learn every day. You can learn our C-ABAPD-2507 exam torrent in a piecemeal time, and you don't have to worry about the tedious and cumbersome learning content. We will simplify the complex concepts by adding diagrams and examples during your study. By choosing our C-ABAPD-2507 test material, you will be able to use time more effectively than others and have the content of important information in the shortest time.

SAP Certified Associate - Back-End Developer - ABAP Cloud Sample Questions (Q62-Q67):

NEW QUESTION # 62

Which statement can you use to change the contents of a row of data in an internal table?

- A. INSERT
- B. APPEND
- C. MODIFY
- D. UPDATE

Answer: C

NEW QUESTION # 63

In class ZCL_CLASS_A, you use the statement DATA var TYPE ***

What may stand in place of ***?

Note: There are 2 correct answers to this question.

- A. The name of a data element from the ABAP Dictionary
- B. The name of a domain from the ABAP Dictionary
- C. The name of a type defined privately in class ZCL_CLASS_A
- D. The name of a type defined privately in another class

Answer: A,C

NEW QUESTION # 64

Given the following ABAP SQL statement excerpt from an ABAP program:

```
SELECT SINGLE *
```

```
FROM spfli
```

```
WHERE carrid = 'LH' AND connid = '0400'
```

```
INTO @DATA(wa).
```

You are given the following information:

- * The data source spfli on line #2 is an SAP HANA database table.
- * spfli will be a large table with over one million rows.
- * This program is the only one in the system that accesses the table.
- * This program will run rarely.

Based on this information, which of the following general settings should you set for the spfli database table?

Note: There are 2 correct answers to this question.

- A. "Load Unit" to "Column Loadable"
- B. "Storage Type" to "Column Store"
- C. "Load Unit" to "Page Loadable"
- D. "Storage Type" to "Row Store"

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In SAP HANA, the choice of storage type and load unit depends on access patterns, table size, and usage frequency.

Here's how each part applies:

- * A. "Storage Type" to "Row Store" - This is correct. Since:
- * The table is accessed by only one program.
- * The program runs rarely.

* The access pattern is row-oriented (SELECT SINGLE with filters).

Row store is more suitable for rare access with small result sets and no aggregation.

* D. "Load Unit" to "Page Loadable" - This is correct. Since the program runs infrequently, loading the entire column into memory (column loadable) is not efficient. Page-loadable units load only required parts into memory on demand, which reduces memory footprint.

Incorrect options:

* B. "Storage Type" to "Column Store" - Incorrect here. Column store is ideal for frequent reads, aggregations, or analytics, not for rarely accessed tables with simple lookups.

* C. "Load Unit" to "Column Loadable" - Also not optimal for rarely accessed data. Column loadable preloads entire columns into memory, which is memory-intensive and unnecessary in this case.

Reference: ABAP CDS Development Guide and SAP HANA Table Storage Guidelines - Recommended storage strategies based on access pattern, frequency, and usage role.

NEW QUESTION # 65

What are some features of the current ABAP programming language? Note: There are 2 correct answers to this question.

- A. A data object's type can change at runtime.
- B. The code is expression-based.
- C. It has built-in database access.
- D. Keywords are case-sensitive.

Answer: B,C

NEW QUESTION # 66

You select a field `flight_date` with type DATS in the field list of a CDS view.

Which of the following expressions returns the 2-digit month from the field?

(Select 2 correct answers)

- A. `substring(flight_date, 5, 2)`
- B. `right(left(flight_date, 6), 2)`
- C. `substring(flight_date, 4, 2)`
- D. `left(right(flight_date, 6), 2)`

Answer: A,B

Explanation:

Comprehensive and Detailed Explanation from Exact Extract:

A DATS field is stored as YYYYMMDD.

* Option A: `substring(flight_date, 5, 2)` # Extracts characters 5-6 # correct month.

* Option B: `right(left(flight_date, 6), 2)` # Takes first 6 chars YYYYMM, then last 2 # correct month.

* Option C: Wrong, extracts last 2 chars of MMDD, results in day not month.

* Option D: Wrong, starts at 4 # gives YM instead of MM.

Study Guide Reference: ABAP CDS Development Guide - String Functions in CDS.

NEW QUESTION # 67

.....

In this era of the latest technology, we should incorporate interesting facts, figures, visual graphics, and other tools that can help people read the SAP Certified Associate - Back-End Developer - ABAP Cloud (C-ABAPD-2507) exam questions with interest. Exams4Collection uses pictures that are related to the C-ABAPD-2507 certification exam and can even add some charts, and graphs that show the numerical values. It will not let the reader feel bored with the C-ABAPD-2507 Practice Test. They can engage their attention in SAP C-ABAPD-2507 exam visual effects and pictures that present a lot of.
