Valid PK0-005 Test Online, PK0-005 Practice Exam Fee

Three versions for PK0-005 training materials are available, you can choose one you like according to your own needs. All three versions have free demo for you to have a try. PK0-005 PDF version is printable and you can learn them anytime and anyplace. PK0-005 Soft test engine can stimulate the real exam environment, so that you can know the procedures for the exam, and your

confidence for PK0-005 Exam Materials will also be improved. PK0-005 Online test engine is convenient and easy to learn, it has testing history and performance review, and you can have a general review of what you have learned by this version.

CompTIA Project+ certification exam is vendor-neutral, meaning it is not specific to any particular technology or product. This makes it an ideal certification for project managers working in different industries and with different project management tools. It is also an excellent certification for individuals who want to establish a solid foundation in project management before pursuing other certifications, such as the PMP (Project Management Professional) certification.

CompTIA PK0-005 Exam measures the candidate's understanding of project management principles, including project initiation, planning, execution, monitoring and control, and project closure. PK0-005 exam also covers project communication, risk management, and project resources management, including human resources, time, cost, and stakeholders.

CompTIA Project+ Certification Exam Sample Questions (Q324-Q329):

NEW QUESTION # 324

A PM needs to calculate the progress of the whole project scope for a presentation to the sponsor. Which of the following is the first document the PM should update?

- A. Gantt chart
- B. Issue log
- C. Risk report
- D. Project network diagram

Answer: A

Explanation:

A gantt chart is a visual representation of a project timeline that shows the tasks, durations, dependencies, and resources of a project in a horizontal bar chart format. A gantt chart can help a project manager to calculate the progress of the whole project scope by comparing the planned and actual start and finish dates of each task, as well as the percentage of completion and the critical path. A gantt chart is also a useful tool for communicating the project status and performance to the sponsor and other stakeholders. Therefore, the first document that the project manager should update to calculate the progress of the whole project scope is the gantt chart. NEW QUESTION # 325

A global franchise requests that a company provide a solution to unify its operation worldwide. Additionally, the company would like the solution to provide operation reports in real time without asking the country franchise manager for these reports. Which of the following cloud models would the company suggest to the global franchise?

- A. IaaS
- B. XaaS
- C. PaaS
- D. SaaS

Answer: D

Explanation:

SaaS, or Software as a Service, is a type of cloud computing that provides ready-to-use software applications over the internet. The software is hosted and managed by the service provider, and the users do not have to install, update, or maintain it. SaaS is suitable for the global franchise because it can provide a unified solution that can be accessed from anywhere, anytime, and on any device. SaaS can also provide real-time operation reports without requiring the intervention of the country franchise managers. SaaS can offer benefits such as scalability, flexibility, cost-effectiveness, and security for the global franchise123. References = CompTIA Project+ Study Guide: Exam PK0-005, 3rd Edition, Chapter 4: Project Communications, p. 143; Types of Cloud Computing - SaaS vs PaaS vs IaaS - AWS; What are the different types of cloud computing? | Google Cloud; IaaS vs. PaaS vs. SaaS | IBM

NEW QUESTION # 326

A project manager is monitoring the performance of the development team and creates the following view:

Planned Task Completion

Actual Task Completion

Which of the following describes the status of the project?

- A. On schedule
- B. Paused schedule
- C. Behind schedule
- D. Ahead of schedule

Answer: C

Explanation:

Comprehensive and Detailed Step-by-Step

If the actual task completion is lagging behind the planned task completion, the project is behind schedule. This indicates that the project is not progressing as planned and may require corrective actions such as resource reallocation or schedule adjustments.

NEW QUESTION # 327

During a brainstorming session, a project team is elaborating on what caused the unexpected crash of the website that the team was developing. Given the following:

Which of the following was the initial cause of the issue?

- A. Lack of infrastructure
- B. Inadequate memory
- C. Inadequate instructions
- D. Incorrect configuration

Answer: D

Explanation:

Incorrect configuration was the initial cause of the issue that caused the unexpected crash of the website that the team was developing. The diagram given is an example of a fishbone diagram or a cause-and-effect diagram that shows the possible causes of a problem or effect. The diagram has four main categories: people, process, technology, and environment. Each category has subcategories that list specific factors that may contribute to the problem or effect. The diagram shows that incorrect configuration under technology was marked as an initial cause of website crash.

NEW QUESTION # 328

As a part of a project, structured cabling activities have been outsourced to another company. The agreement is that work will take six weeks to complete and will be performed at different locations. Which of the following should the project manager do? (Select

two).

- **A. Monitor the performance.**
- B. Assign the resources.
- **C. Approve the deliverables.**
- D. Negotiate with the vendors.
- E. Purchase the materials.
- F. Accept delays in the work.

Answer: A,C

Explanation:

The project manager should approve the deliverables and monitor the performance of the outsourced structured cabling activities. These are the responsibilities of the project manager when dealing with external vendors or contractors, as they ensure that the quality standards, scope, schedule, and budget are met according to the contract terms and the project plan. The project manager should also communicate regularly with the vendor and provide feedback and guidance as needed. The other options are not correct because:

Purchasing the materials is not the responsibility of the project manager, but the vendor who is performing the structured cabling activities. The project manager should only verify that the materials are suitable and available for the project.

Assigning the resources is not the responsibility of the project manager, but the vendor who is performing the structured cabling activities. The project manager should only ensure that the vendor has the adequate and qualified resources to complete the work.

Accepting delays in the work is not a good practice for the project manager, as it can negatively affect the project schedule, scope, and quality. The project manager should proactively identify and manage the risks and issues that may cause delays, and implement contingency plans or corrective actions if necessary.

Negotiating with the vendors is not a task that the project manager should do during the execution of the structured cabling activities, as it should have been done during the planning and procurement phases of the project. The project manager should only adhere to the contract terms and conditions that have been agreed upon with the vendor, and only renegotiate if there are significant changes or disputes that require it. References = CompTIA Project+ Study Guide: Exam PK0-005, 3rd Edition, Chapter 8: Planning Projects, Part 4 (Procurement and Communication), pages 243-260; CompTIA Project+ Certification Exam Objectives, Domain 2: Project Planning, Objective 2.5: Given a scenario, plan procurement for a project; Domain 3:

Project Execution, Objective 3.2: Given a scenario, execute and monitor project tasks using traditional methodologies.
