In modern society, innovation is of great significance to the survival of a company. The new technology of the PL-600 practice prep is developing so fast. So the competitiveness among companies about the study materials is fierce. Luckily, our company masters the core technology of developing the PL-600 Exam Questions. On one hand, our professional experts can apply the most information technology to compile the content of the PL-600 learning materials. On the other hand, they also design the displays according to the newest display technology.

We provide top quality verified PL-600 certifications preparation material for all the PL-600 exams. Our PL-600 certified experts have curated questions and answers that will be asked in the real exam, and we provide money back guarantee on PL-600 Preparation material. Moreover, we also offer PL-600 desktop practice test software that will help you assess your skills before real Microsoft exams.

PL-600 Latest Braindumps Pdf - PL-600 Latest Test Bootcamp

Let me introduce our PL-600 study guide to you in some aspects. First of all, there are three versions of PL-600 guide quiz. You can choose the most suitable version based on your own schedule. PC version, PDF version and APP version, these three versions of PL-600 Exam Materials have their own characteristics you can definitely find the right one for you. Secondly, you can find that our price of the PL-600 learning braindumps is quite favorable. And some times, we will give discounts for them.

Microsoft PL-600 exam is a part of the Microsoft Certified: Power Platform Solution Architect Expert certification path. Microsoft Power Platform Solution Architect certification path is designed to help the candidates learn the skills and knowledge required to become a certified Power Platform Solution Architect. Microsoft Power Platform Solution Architect certification path includes two exams, including PL-600 and PL-400. The PL-600 exam focuses on designing and implementing complex business solutions using Microsoft Power Platform, while the PL-400 exam focuses on designing and implementing Power Platform applications.

Microsoft Power Platform Solution Architect Sample Questions (Q178-Q183):

NEW QUESTION # 178

A company plans to integrate Microsoft Power Platform with existing systems, including Microsoft Dynamics 365 Omni channel for Customer Service.

You need to recommend a solution for each requirement.

Which components should you recommend for the requirements?

To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Solutions

- Custom API
- Custom pages
- Microsoft Power Virtual Agent

Requirement

- Display information about the contact in the Omnichannel app.
- Ensure only tables needed are exposed for integration purposes.
- Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.

Solution

-
-
-

Answer:

Explanation:

Solutions

- Custom API
- Custom pages
- Microsoft Power Virtual Agent

Requirement

- Display information about the contact in the Omnichannel app.
- Ensure only tables needed are exposed for integration purposes.
- Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.

Solution

- Microsoft Power Virtual Agent
- Custom API
- Custom pages

- Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.

Solution

- Microsoft Power Virtual Agent
- Custom API
- Custom pages

NEW QUESTION # 179

A client uses Dynamics 365 Sales, Power BI datasets, and Power BI dataflows.

The Dynamics 365 Sales implementation has security roles that restrict data export. You need to ensure that data has the same restrictions in Power BI as it does in Dynamics 365 Sales.

You need to design the security to avoid sensitive data from being seen.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Limit the role in Dynamics 365 Sales to only data allowed so it cannot be exported to Microsoft Excel.
- B. Use Microsoft Dataverse restrictions before setting up the Power BI reports.
- C. Limit the role and ensure that exporting to Microsoft Excel is not allowed in both Dynamics 365 Sales and Power BI.
- D. Share Power BI dashboards only with users who are supported to see this data.

Answer: C,D

Explanation:

For individual reports you can click on the 'Settings' option which is the gear icon against the said report name and choose 'Export Data' to 'None'.

NEW QUESTION # 180

You need to recommend the appropriate components to meet the inspection requirements.

What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement

Prevent editing of finalized inspection orders.

	▼
Business rule	
Security role	
User permission	

Prepare documentation for failed inspection steps.

	▼
Data flow	
Business rule	
Form property	

Answer:

Explanation:

Requirement	Solution								
Prevent editing of finalized inspection orders.	<table border="1"> <tr> <td></td> <td>▼</td> </tr> <tr> <td colspan="2">Business rule</td> </tr> <tr> <td colspan="2">Security role</td> </tr> <tr> <td colspan="2">User permission</td> </tr> </table>		▼	Business rule		Security role		User permission	
	▼								
Business rule									
Security role									
User permission									
Prepare documentation for failed inspection steps.	<table border="1"> <tr> <td></td> <td>▼</td> </tr> <tr> <td colspan="2">Data flow</td> </tr> <tr> <td colspan="2">Business rule</td> </tr> <tr> <td colspan="2">Form property</td> </tr> </table>		▼	Data flow		Business rule		Form property	
	▼								
Data flow									
Business rule									
Form property									

Explanation:

Requirement	Solution								
Prevent editing of finalized inspection orders.	<table border="1"> <tr> <td></td> <td>▼</td> </tr> <tr> <td colspan="2">Business rule</td> </tr> <tr> <td colspan="2">Security role</td> </tr> <tr> <td colspan="2">User permission</td> </tr> </table>		▼	Business rule		Security role		User permission	
	▼								
Business rule									
Security role									
User permission									
Prepare documentation for failed inspection steps.	<table border="1"> <tr> <td></td> <td>▼</td> </tr> <tr> <td colspan="2">Data flow</td> </tr> <tr> <td colspan="2">Business rule</td> </tr> <tr> <td colspan="2">Form property</td> </tr> </table>		▼	Data flow		Business rule		Form property	
	▼								
Data flow									
Business rule									
Form property									

Box 1: Security role

Microsoft Dataverse uses a role-based security model to help secure access to the database.

Scenario:

- * You must prevent users from changing inspection order data once an inspection is marked as final.
- * Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.

Box 2: Data flow

Dataflows are a self-service, cloud-based, data preparation technology. Dataflows enable customers to ingest, transform, and load data into Microsoft Dataverse environments, Power BI workspaces, or your organization's Azure Data Lake Storage account.

Scenario: Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance.

Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.

NEW QUESTION # 181

A company plans to deploy multiple Microsoft Dataverse environments. You are supporting the go-live process.

The company reports the following access issues:

- * Users can access account records but cannot read a column in the table.
- * A licensed user receives an insufficient permission error when opening leads.
- * A licensed user does not appear in the list of users available for security assignment.

You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Issue	Action
Users can access account records but cannot read a column in the table.	Security role Security group Field security profile
A licensed user receives an insufficient permission error when opening leads.	Security role Security group Field security profile
A licensed user does not appear in the list of users available for security assignment.	Security role Security group Field security profile

Answer:

Explanation:

Answer Area

Issue	Action
Users can access account records but cannot read a column in the table.	Security role Security group Field security profile
A licensed user receives an insufficient permission error when opening leads.	Security role Security group Field security profile
A licensed user does not appear in the list of users available for security assignment.	Security role Security group Field security profile

NEW QUESTION # 182

A company has a Power Platform environment that connects to a third-party marketing application.

The company reports that the data in the Power Platform lead table does not match data from the marketing application.

Issues include:

The owner data in the lead table and the third-party application do not match.

The Topic column has more information than the related record from the marketing application.

There are differences in how telephone numbers are formatted.

You need to determine which processes are causing the issues.

Which three processes may be causing the differences observed? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Issue**Solution**

Migration processes fail due to operation timeouts.

Increase multithreading and/or batch size settings.
Decrease multithreading and/or batch size settings.
Ensure you are loading data into all tables at the same time.
Ensure you are loading data into tables in a particular order.

Records that include lookup columns often fail to load.

Increase multithreading and/or batch size settings.
Decrease multithreading and/or batch size settings.
Ensure you are loading data into all tables at the same time.
Ensure you are loading data into tables in a specific order.

Answer:

Explanation:
