

DevOps-Foundation Dumps Questions - Real DevOps-Foundation Braindumps

2025 Latest TestInsides DevOps-Foundation PDF Dumps and DevOps-Foundation Exam Engine Free Share:
<https://drive.google.com/open?id=1z5nGvIymEdGgWKeD57iHotmQ6qPhc9f>

During the process of using our DevOps-Foundation study materials, you focus yourself on the exam bank within the given time, and we will refer to the real exam time to set your DevOps-Foundation practice time, which will make you feel the actual exam environment and build up confidence. Not only that you can get to know the real questions and answers of the DevOps-Foundation Exam, but also you can adjust yourself to the real pace of the DevOps-Foundation exam.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	Exploring DevOps: This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.
Topic 2	Measurement, Metrics, and Reporting: This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.
Topic 3	- Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI - CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.
Topic 4	Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.

Topic 5	• Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.
Topic 6	• Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.
Topic 7	• Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.

Real DevOps-Foundation Braindumps - DevOps-Foundation Simulation Questions

In order to pass the exam and fight for a brighter future, these people who want to change themselves need to put their ingenuity and can do spirit to work. More importantly, it is necessary for these people to choose the convenient and helpful DevOps-Foundation test questions as their study tool in the next time. Because their time is not enough to prepare for the exam, and a lot of people have difficulty in preparing for the exam, so many people who want to pass the DevOps-Foundation exam and get the related certification in a short time have to pay more attention to the study materials. In addition, best practice indicates that people who have passed the DevOps-Foundation Exam would not pass the exam without the help of the DevOps-Foundation reference guide. So the study materials will be very important for all people. If you also want to pass the exam and get the related certification in a short, the good study materials are the best choice for you. Now we are going to make an introduction about the DevOps-Foundation exam prep from our company for you.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which of the following is NOT a characteristic of DevOps?

- A. Working towards a common goal
- **B. Fast flow of unplanned work into production**
- C. Ensuring overall organizational success
- D. World-class stability, reliability, availability and security

Answer: B

Explanation:

A fast flow of unplanned work into production is not a characteristic of DevOps. In fact, DevOps practices strive to minimize unplanned work (like emergency changes or outages) through automation, testing, collaboration, and rigorous change control. The other options-ensuring organizational success, working toward a common goal, and world-class stability/reliability-are all key DevOps characteristics.

Reference: DevOps Foundation v3.6 syllabus section 1.4; State of DevOps Report.

NEW QUESTION # 17

A team has recently introduced their first Kanban board and are saying that they are finding it hard to focus and are feeling exhausted from context switching. Additionally, the business is complaining that nothing is being finished and they are yet to receive any of what they asked for.

What do the team need to do?

- A. Push more work onto the board to provide more opportunities to deliver something
- **B. Try using Work in Progress limits**
- C. Unblock any blocked work items
- D. Add more development resources to the team to cope with the workload

Answer: B

Explanation:

When Kanban teams feel overwhelmed and nothing is getting finished, it's a sign that too much work is in progress (WIP).

Work in Progress (WIP) limits are a key Kanban and Lean practice: they restrict how many tasks can be active at one time, forcing teams to focus, finish, and deliver before starting new work.

* Pushing more work (A) or adding more resources (B) worsens the problem.

* Unblocking work (D) is helpful, but the core issue is overload.

Extract-style reference:

"WIP limits encourage teams to finish work before starting new tasks, reducing context switching and enabling better flow and faster delivery."

-Kanban: Successful Evolutionary Change for Your Technology Business, David J. Anderson PeopleCert DevOps Foundation:

Limiting WIP is essential for effective flow and sustainable pace.

NEW QUESTION # 18

Why is it important for IT to understand and support the business' "why"?

- A. IT must understand specific business processes so that they can support the organization properly
- B. IT must understand why the organization will benefit from a DevOps approach
- C. IT must understand why they should develop or acquire certain software products
- **D. IT must understand why the organization exists and its purpose, cause and belief**

Answer: D

Explanation:

One of the core DevOps values is aligning IT efforts with business objectives-understanding the business

"why." The Foundation syllabus highlights the need for IT to understand the organization's purpose, cause, and belief. Without this, IT can't effectively support value delivery or drive digital transformation.

Understanding the organizational "why" connects daily activities to strategic objectives, a key DevOps mindset.

Reference: DevOps Foundation v3.6 syllabus section 1.2; "Start with Why" by Simon Sinek.

NEW QUESTION # 19

Which of the following could encourage the sharing of tools, knowledge, discoveries and lessons learned between development and operational teams?

- A. Simulations
- B. Common workspaces
- **C. All of the above**
- D. Hackathons

Answer: C

Explanation:

PeopleCert outlines multiple methods to encourage sharing and collaboration:

* A: Common workspaces promote informal communication and rapid problem-solving.

* B: Hackathons provide an engaging environment for innovation, cross-functional teamwork, and sharing solutions.

* C: Simulations (e.g., Game Days) allow teams to practice scenarios, learn from each other, and share insights in a low-risk setting. Each of these fosters trust, transparency, and mutual learning. Using them together can amplify cultural change and skill growth.

Thus, D-All of the above-is correct.

NEW QUESTION # 20

An organization is struggling to reduce delays when launching new projects.
Which of the following automation practices could help reduce these delays?

- A. All of the Above
- B. Automated continuous integration and builds
- C. Treating infrastructure as code
- D. Test-driven development

Answer: A

Explanation:

Reducing delays in launching projects requires eliminating manual, time-consuming tasks in the delivery process:

- * A: Continuous Integration (CI) with automated builds speeds up integration and reduces defects.
- * B: Test-Driven Development (TDD) ensures quality from the start, reducing rework and post-development bug fixing.
- * C: Infrastructure as Code (IaC) enables rapid, repeatable provisioning of environments, avoiding manual setup delays.

All three practices contribute to faster, more reliable project starts. As PeopleCert notes, combining these practices creates a strong automation foundation, enabling organizations to move from idea to delivery quickly.

Therefore, D-All of the above-is correct.
