The most attractive thing about a learning platform is not the size of his question bank, nor the amount of learning resources, but more importantly, it is necessary to have a good control over the annual propositional trend. The DevOps-Foundation study materials through research and analysis of the annual questions, found that there are a lot of hidden rules are worth exploring, plus we have a powerful team of experts, so the rule can be summed up and use. The DevOps-Foundation Study Materials can be based on the analysis of the annual questions, it is concluded that a series of important conclusions related to the qualification examination, combining with the relevant knowledge of recent years, then predict the direction which can determine this year's exam. DevOps-Foundation study materials will improve the ability to accurately forecast the topic and proposition trend this year.

## Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Measurement, Metrics, and Reporting:</b> This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.</li> </ul>

### DevOps-Foundation Exam Duration & Advanced DevOps-Foundation Testing Engine

They struggle to find the right platform to get actual PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam questions and achieve their goals. Test4Cram has made the product after seeing the students struggle to solve their issues and help them pass the DevOps-Foundation certification exam on the first try. Test4Cram has designed this DevOps-Foundation Practice Test material after consulting with a lot of professionals and getting their good reviews so our customers can clear DevOps-Foundation certification exam quickly and improve themselves.

### Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q81-Q86):

#### NEW QUESTION # 81

Which of the following could encourage the sharing of tools, knowledge, discoveries and lessons learned between development and operational teams?

- **A. All of the above**
- B. Common workspaces
- C. Hackathons
- D. Simulations

**Answer: A**

Explanation:

PeopleCert outlines multiple methods to encourage sharing and collaboration:

\* A: Common workspaces promote informal communication and rapid problem-solving.

\* B: Hackathons provide an engaging environment for innovation, cross-functional teamwork, and sharing solutions.

\* C: Simulations (e.g., Game Days) allow teams to practice scenarios, learn from each other, and share insights in a low-risk setting. Each of these fosters trust, transparency, and mutual learning. Using them together can amplify cultural change and skill growth.

Thus, D-All of the above-is correct.

#### NEW QUESTION # 82

Which statement about DevOps toolchains is CORRECT? They:

- **A. Automate tasks in a deployment pipeline**
- B. Should be standardized across applications
- C. Automate continuous testing activities
- D. Require open source tools

**Answer: A**

Explanation:

A DevOps toolchain is designed to automate repetitive tasks across the software delivery process. This includes compiling code, running tests, building artifacts, deploying to environments, and monitoring systems.

While a toolchain can automate continuous testing (D), that is only one of many tasks automated.

Standardization (B) is beneficial but not always required-some applications may need specialized tools.

Open source tools (C) are not mandatory; many organizations use a mix of open source and proprietary tools. Therefore, A-automation of tasks in a deployment pipeline-is the most universally correct statement.

The DevOps Handbook- Deployment Pipeline Automation

### NEW QUESTION # 83

Which of the following is NOT a benefit of using a Kanban board?

- A. It reduces work in progress
- B. It reduces idle time and waste
- C. It enables people to work collaboratively
- **D. It defines policies and procedures**

**Answer: D**

Explanation:

Kanban boards are visual management tools used to track work and manage flow. They provide transparency, limit work in progress (WIP), and help teams focus on delivering value quickly.

\* A: Reducing WIP is a key Kanban principle that improves flow and delivery speed.

\* C: Visibility fosters collaboration and shared ownership.

\* D: By identifying bottlenecks and waste, Kanban helps reduce idle time.

B-defining policies and procedures-is not an inherent benefit of Kanban. While teams may display existing policies on a Kanban board, the board itself does not define them. Its role is to visualize work and flow, not to establish governance rules.

Thus, B is the correct "NOT" benefit.

### NEW QUESTION # 84

How can Scrum support DevOps' Third Way?

- A. By encouraging shorter feedback loops through Daily Scrums
- B. By overcoming constraints and getting more work done
- C. By encouraging Scrum Teams to invite an operational professional to their team
- **D. By using Sprint Retrospectives as learning and improvement opportunities**

**Answer: D**

Explanation:

The Third Way of DevOps emphasizes continuous learning and experimentation to drive improvement.

Scrum supports this principle through Sprint Retrospectives, which are dedicated sessions at the end of each sprint where the team reflects on what went well, what could be improved, and how to adapt processes or behaviors.

Retrospectives create a structured space for honest discussion, experimentation, and the application of lessons learned. This aligns directly with the Third Way's focus on learning from successes and failures, promoting innovation, and building a culture of continual improvement.

B focuses on throughput, which aligns more with the First Way (flow). C could improve collaboration but is not a core mechanism of the Third Way. D (shorter feedback loops) is more related to the Second Way.

Thus, A is correct because Sprint Retrospectives directly embody the Third Way's goal of learning and adaptation.

Scrum Guide - Sprint Retrospective Purpose

### NEW QUESTION # 85

What should we measure in preference to outputs and productivity?

- A. Utilization and velocity
- B. Lines of code and deployment frequency
- C. Maturity and capability
- **D. Outcomes and value**

**Answer: D**

Explanation:

DevOps shifts the focus from activity-based metrics (outputs) to impact-based metrics (outcomes and value).

Measuring outcomes means assessing whether work delivers the intended business or customer benefit.

Outputs like lines of code, number of deployments, or velocity measure activity but not whether value is being delivered. PeopleCert emphasizes that outcomes should align with business objectives—such as improved customer satisfaction, revenue growth, or reduced failure rates.

Therefore, B—Outcomes and value—is preferred for guiding meaningful improvements.
