We are so popular for that we have a detailed and perfect customer service system. Firstly, only 5 to 10 minutes after the customer's online payment of DevOps-Foundation actual exam is successful, you can receive an email from the customer service and immediately start learning. We also have dedicated staff to check and update DevOps-Foundation Exam Questions every day, so you can get the latest information of DevOps-Foundation exam materials whenever you buy it. Secondly, we provide 24-hour round-the-clock service to customers. We can solve any problems about DevOps-Foundation study materials for you whenever and wherever you need it.

The DevOps-Foundation Exam Questions is of the highest quality, and it enables participants to pass the DevOps-Foundation exam on their first try. For successful preparation, it is essential to have good DevOps-Foundation exam dumps and to prepare questions that may come up in the exam. Exams-boost helps candidates overcome all the difficulties they may encounter in their exam preparation. To ensure the candidates' satisfaction, Exams-boost has a support team that is available 24/7 to assist with a wide range of issues.

New DevOps-Foundation Test Experience - Exam DevOps-Foundation Forum

In today's era, knowledge is becoming more and more important, and talents are becoming increasingly saturated. In such a tough situation, how can we highlight our advantages? It may be a good way to get the test DevOps-Foundation certification. In fact, we always will unconsciously score of high and low to measure a person's level of strength, believe that we have experienced as a child by elders inquire achievement feeling, now, we still need to face the fact. Our society needs all kinds of comprehensive talents, the DevOps-Foundation Study Materials can give you what you want, but not just some boring book knowledge, but flexible use of combination with the social practice.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36

Which of the following DevOps practices encourages conversation driven development, delivery and support?

- **A. ChatOps**
- B. Communication Platforms
- C. VisOps
- D. The Second Way

Answer: A

Explanation:

ChatOps is the DevOps practice of using chat platforms (like Slack, Teams, Mattermost) as the central interface for communication, collaboration, and even automated deployment or support tasks.

It encourages "conversation-driven development, delivery, and support," making processes transparent and collaborative.

* Second Way(A) is about feedback loops, but not specifically conversational platforms.

* Communication Platforms(C) is a generic term.

* VisOps(D) is not a standard DevOps term.

Extract-style reference:

"ChatOps is a collaboration model that connects people, tools, process, and automation into a transparent workflow. Teams communicate and execute commands from a central chat client."

-DevOps Handbook

PeopleCert Foundation v3.6: ChatOps promotes rapid feedback and a culture of sharing.

NEW QUESTION # 37

An organization is struggling to reduce delays when launching new projects.

Which of the following automation practices could help reduce these delays?

- A. Test-driven development
- **B. All of the Above**
- C. Treating infrastructure as code
- D. Automated continuous integration and builds

Answer: B

Explanation:

Reducing delays in launching projects requires eliminating manual, time-consuming tasks in the delivery process:

* A: Continuous Integration (CI) with automated builds speeds up integration and reduces defects.

* B: Test-Driven Development (TDD) ensures quality from the start, reducing rework and post-development bug fixing.

* C: Infrastructure as Code (IaC) enables rapid, repeatable provisioning of environments, avoiding manual setup delays.

All three practices contribute to faster, more reliable project starts. As PeopleCert notes, combining these practices creates a strong automation foundation, enabling organizations to move from idea to delivery quickly.

Therefore, D- All of the above- is correct.

The DevOps Handbook- CI, TDD, and IaC Principles

NEW QUESTION # 38

What is the BEST description of the Theory of Constraints?

- **A. A methodology for identifying the most important limiting factor that stands in the way of achieving a goal**
- B. A methodology for shortening feedback loops so that IT is able to understand and respond faster to customer needs
- C. A methodology for encouraging experimentation and learning so that organizations can identify constraints and practice for failure
- D. A methodology for designing and implementing the processes that underpin deployment pipelines

Answer: A

Explanation:

Theory of Constraints is a methodology that seeks to identify the single, most important limiting factor (constraint) in a process and

systematically improve it until it's no longer the limiting factor.

Extract-style reference:

"The Theory of Constraints provides a powerful framework for identifying bottlenecks (constraints) that limit system performance and focusing improvement efforts on these areas to maximize throughput."

-Goldratt's Theory of Constraints

DevOps Foundation syllabus discusses this as a foundational Lean concept, directly applicable to software delivery pipelines, where delays or resource shortages can restrict overall throughput.

NEW QUESTION # 39

What is the first step to take when improving DevOps automation?

- A. Replace proprietary software with open source tools
- B. Build a DevOps toolchain
- C. Architect before automating
- D. Implement self-service

Answer: C

Explanation:

PeopleCert emphasizes that architecture must be planned before automating processes. This means mapping the value stream, understanding dependencies, identifying bottlenecks, and defining integration points before selecting or configuring tools.

Automating without a clear architecture can lead to fragmented processes, wasted effort, and technical debt.

Once the architecture is sound, teams can implement automation in a way that supports scalability, maintainability, and interoperability.

A (building the toolchain) is important but comes after architecture. C (switching to open source) is a tooling decision, not the first automation step. D (self-service) is a benefit of automation, not the starting point.

Thus, B - Architect before automating - is the correct first step.

NEW QUESTION # 40

Which of the following DevOps practices encourages conversation driven development, delivery and support?

- A. ChatOps
- B. Communication Platforms
- C. VisOps
- D. The Second Way

Answer: A

NEW QUESTION # 41

.....

As the saying goes, time is the most precious wealth of all wealth. If you abandon the time, the time also abandons you. So it is also vital that we should try our best to save our time, including spend less time on preparing for exam. Our DevOps-Foundation guide torrent will be the best choice for you to save your time. The three different versions have different functions. If you decide to buy our DevOps-Foundation Test Guide, the online workers of our company will introduce the different function to you. You will have a deep understanding of the three versions of our DevOps-Foundation exam questions. We believe that you will like our products.
