APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q79-Q84):

NEW QUESTION # 79

Which of the following reasons support why Agility in project management is always advantageous?

- Assumptions are often flawed
- Flexibility enables competitive advantage
- Uncertainty leads to reduced ambiguity
- Deferring decisions is advantageous

- A. 1, 2, 3
- B. 1, 3, 4
- C. 2, 3, 4
- **D. 1, 2, 4**

Answer: D

Explanation:

AgilePM is designed for environments where change and learning are expected. First, assumptions are often flawed; short, empirical cycles expose errors quickly, reducing waste and rework. Second, flexibility-via timeboxing, MoSCoW prioritization, and incremental delivery-enables organizations to pivot faster than competitors as market and stakeholder insights emerge, creating competitive advantage. Third, the statement "uncertainty leads to reduced ambiguity" is incorrect-uncertainty increases ambiguity; agile practices counter this by making work and progress visible and by validating value early. Fourth, deferring decisions to the last responsible moment is advantageous when it avoids premature commitment and keeps options open until better information is available. That balance preserves adaptability without causing decision paralysis. Together, (1), (2), and (4) capture why agility consistently helps organizations navigate complexity and volatility while safeguarding time, cost, and quality through scope flexibility.

NEW QUESTION # 80

Which of the following statements, about ways in which we communicate and connect with people, are true?

- A. Both 1 and 2 are true.
- B. Only 1 is true.
- **C. Only 2 is true.**
- D. Neither 1 nor 2 is true.

Answer: C

Explanation:

* Statement 1: Incorrect. Non-verbal communication refers to gestures, facial expressions, and body language, which cannot be captured in written form.

* Statement 2: Correct. Actions, such as behavior during change or leading by example, can convey powerful messages without verbal communication.
