As a responsible company, we don't ignore customers after the deal, but will keep an eye on your exam situation. Although we can assure you the passing rate of our C-SEC-2405 training guide nearly 100 %, we can also offer you a full refund if you still have concerns. So you have nothing to worry about, only to study with our C-SEC-2405 Exam Questions with full attention. And as we have been in this career for over ten years, our C-SEC-2405 learning materials have became famous as a pass guarantee.

SAP C-SEC-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.
Topic 2	<ul style="list-style-type: none">Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.
Topic 3	<ul style="list-style-type: none">Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
Topic 4	<ul style="list-style-type: none">SAP Fiori Authorizations and SAP S4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.
Topic 5	<ul style="list-style-type: none">Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.

SAP C-SEC-2405 Valid Exam Registration - C-SEC-2405 Test Online

In order to meet all demands of all customers, our company has employed a lot of excellent experts and professors in the field to design and compile the C-SEC-2405 study materials with a high quality. It has been a generally accepted fact that the C-SEC-2405 Study Materials from our company are more useful and helpful for all people who want to pass exam and gain the related exam. We believe this resulted from our constant practice, hard work and our strong team spirit.

SAP Certified Associate - Security Administrator Sample Questions (Q61-Q66):

NEW QUESTION # 61

Which cloud-based SAP solution helps organizations control their data across various cloud platforms and on-premise data sources?

- A. SAP Information Steward
- B. SAP Privacy Governance
- **C. SAP Data Custodian**
- D. SAP Identity Access Governance

Answer: C

Explanation:

SAP Data Custodian is the cloud-based SAP solution designed to help organizations control their data across various cloud platforms and on-premise data sources. It provides a centralized framework for data governance, enabling organizations to monitor, manage, and secure data throughout its lifecycle, regardless of where it resides. SAP Data Custodian ensures compliance with data protection regulations by offering tools for data discovery, classification, and access control, making it ideal for hybrid environments. In contrast, SAP Identity Access Governance focuses on managing user access and permissions, SAP Information Steward is used for data quality and profiling, and SAP Privacy Governance addresses privacy compliance.

SAP Data Custodian's unique capability to unify data control across diverse platforms makes it the correct choice for comprehensive data management and security.

NEW QUESTION # 62

Which authorization objects can be used to restrict access to SAP Enterprise Search models in the SAP Fiori launchpad? Note: There are 2 correct answers to this question.

- **A. S_ESH_CONN**
- B. RSDDLTIPI
- C. SDDLVIEW
- **D. S_ESH_ADMIN**

Answer: A,D

Explanation:

* Context:SAP Enterprise Search models require specific authorization objects to restrict user access.

* Solution Explanation:

* **S_ESH_CONN**:Controls connectivity and access to search connectors.

* **S_ESH_ADMIN**:Governs administrative permissions for Enterprise Search.

SAP Security References:

* SAP Enterprise Search Authorization Guide

* SAP Help Portal for Authorization Objects in Enterprise Search

NEW QUESTION # 63

In SAP S/4HANA Cloud Public Edition, what can you do with the Display Authorization Trace? Note: There are 3 correct answers to this question.

- A. Adjust role restrictions to further limit access when performing forensic analysis
- **B. Analyze authorization check results for already assigned authorizations**
- **C. Display business roles granting specific access**

- D. Analyze authorization check results for missing authorizations
- E. Adjust role restrictions to account for missing authorizations

Answer: B,C,D

Explanation:

The Display Authorization Trace in SAP S/4HANA Cloud Public Edition is a powerful tool for analyzing authorization issues. It allows administrators to analyze authorization check results for missing authorizations, identifying gaps where users lack necessary permissions to perform tasks, which is critical for troubleshooting access issues. Additionally, it can display business roles granting specific access, providing visibility into which roles provide permissions for particular applications or data, aiding in role management and compliance checks. The tool also supports analyzing authorization check results for already assigned authorizations, helping administrators verify whether existing permissions are functioning as intended.

However, adjusting role restrictions, either to address missing authorizations or for forensic analysis, is not a function of the Display Authorization Trace, as it is a diagnostic tool, not a maintenance interface. These capabilities make the Display Authorization Trace essential for ensuring secure and efficient access control, supporting both operational and audit requirements in SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 64

Which solution analyzes an SAP system's administrative areas to safeguard against potential threats?

- A. SAP Code Vulnerability Analyzer
- B. SAP Security Optimization Services
- C. SAP EarlyWatch Alert
- D. SAP Enterprise Threat Detection

Answer: B

Explanation:

* Context:SAP Security Optimization Services help assess administrative and security configurations, providing tailored recommendations to safeguard SAP systems against threats.

* Solution Description:

* SAP Security Optimization Servicesanalyze configurations, authorizations, and operational practices in SAP systems, identifying vulnerabilities and providing actionable recommendations for system hardening.

* Elimination of Other Options:

* A. SAP EarlyWatch Alert: Focuses on system performance, not specifically on administrative security.

* B. SAP Enterprise Threat Detection: Monitors runtime threats but does not assess administrative setups.

* C. SAP Code Vulnerability Analyzer: Analyzes code, not administrative areas.

SAP Security References:

* SAP Help Portal (Security Optimization Service Guidelines)

* SAP Support Notes related to system security audits

NEW QUESTION # 65

Which log types are available in the Administration Console of Cloud Identity Services? Note: There are 2correct answers to this question.

- A. Performance logs
- B. Troubleshooting logs
- C. Change logs
- D. Usage logs

Answer: C,D
