Pass Leader AD0-E117 Dumps & Valid AD0-E117 Test Questions

P.S. Free & New AD0-E117 dumps are available on Google Drive shared by Dumpleader: https://drive.google.com/open?id=1HvY2aoBHQTuIvTupGYwJUkizpWQGfWuu

Are you still feeling uncomfortable about giving up a lot of time to entertain, work or accompany your family and friends in preparation for the exam? Using AD0-E117 Quiz torrent, you can spend less time and effort reviewing and preparing, which will help you save a lot of time and energy. When some candidates trying to overcome an exam, they will all first think of choosing a good study material to prepare for their exam. The Adobe Experience Manager Architect Master prep torrent has a variety of self-learning and self-assessment functions to test learning outcome, which will help you increase confidence to pass exam.

Adobe AD0-E117 certification exam is intended for solution architects, technical architects, and developers who have extensive experience in implementing AEM solutions. AD0-E117 exam is structured to evaluate the candidates' knowledge in several areas, including AEM architecture, solution design, deployment, and optimization. AD0-E117 exam is designed to help professionals identify and address the challenges associated with designing and implementing AEM solutions.

Adobe AD0-E117 Certification Exam is a rigorous exam that tests your knowledge and skills in AEM architecture. AD0-E117 exam consists of 60 multiple-choice questions that you need to complete in 120 minutes. To pass the exam, you need to score at least 70%. If you fail the exam, you can retake it after 14 days.

Valid AD0-E117 Test Questions, AD0-E117 PDF

We often ask, what is the purpose of learning? Why should we study? Why did you study for AD0-E117exam so long? As many people think that, even if one day we forget the formula for the area of a triangle, we can still live very well, but if it were not for the knowledge of learning AD0-E117 Exam and try to obtain certification, how can we have the opportunity to good to future life? So, the examination is necessary, only to get the test AD0-E117 certification, get a certificate, to prove better us, to pave the way for our future life.

Adobe AD0-E117 Certification Exam is designed for professionals who want to validate their skills and knowledge in Adobe Experience Manager (AEM) architecture. Adobe Experience Manager Architect Master certification exam is targeted towards individuals who are responsible for designing and implementing AEM solutions. It is a master level exam that tests your expertise in AEM architecture and ensures that you have the necessary skills to design and deploy complex AEM solutions.

Adobe Experience Manager Architect Master Sample Questions (Q81-Q86):

NEW QUESTION # 81
A website hosted on AEM as a Cloud Service (AEMaaCS) uses a private key to decrypt data received from a secure web platform. The private key is stored as an encrypted OSGi configuration on the AEM publishers using the OOTB AEM Crypto Support bundle. The architect has received reports from developers stating that while the feature works on the AEMaaCS environments, they fail to decrypt the data on the local development environment.

What two actions would the architect take to resolve the issue? (Choose two.)

- A. Navigate to /crx-quickstart/launchpad/felix/bundle/<ID>/data in the file system and copy the hmac and master files from the source instance to the target instances
- B. Start the local AEM environment with the -Dcom.adobe.granite.crypto.file.disable=true option
- C. Restart the com.adobe.granite.crypto OSGi bundle or restart the entire AEM instance
- D. Export the CryptoKey from AEMaaCS environment by creating a content package of the /etc/key path
- E. Use the cryptosupport API to decrypt the private key and re-encrypt the value using the /system/console /crypto console

Answer: C,E

NEW QUESTION # 82

A customer is about to go live with a new website on AEM on prem. The DNS (www.domam.com) already points to the load balancer of the AEM environment and final sanity checks are being performed. The website was tested in lower environments without SSL On production, the website is served over https. During sanity testing, all requests result in a 404.
While investigating this issue, an Architect determines the following:
* The requests land on port 443 on the load balancer where SSL is terminated and an HTTP header X-Forwarded-Proto is set
* The website Sling Mapping is created beneath /etc/map/http/www.domain.com.80
* The URLs on the website are externalized with http in the absolute links Which two actions should the Architect take to resolve this problem? (Choose two.)

- A. Ensure the Sling Mapping exist at /etc/map/https/www.domain.com.443
- B. Configure Apache Felix Http Service SSL Filter to use the correct SSL forward header
- C. Ensure the Sling Mapping exist at /etc/map/httpj)mwp<.domain.com.443Configure the Adobe Granite SSL Connector Factory with the correct SSL port
- D. Ensure the Sling Mapping exist at /etc/map/https/www.domain.com.80

Answer: B,C

Explanation:
"the Sling Mapping should match the protocol and port of the incoming request, which in this case is https and 443. The Apache Felix Http Service SSL Filter should be configured to use the X-Forwarded-Proto header to detect if the request is secure or not".

NEW QUESTION # 83

Refer to the exhibit.
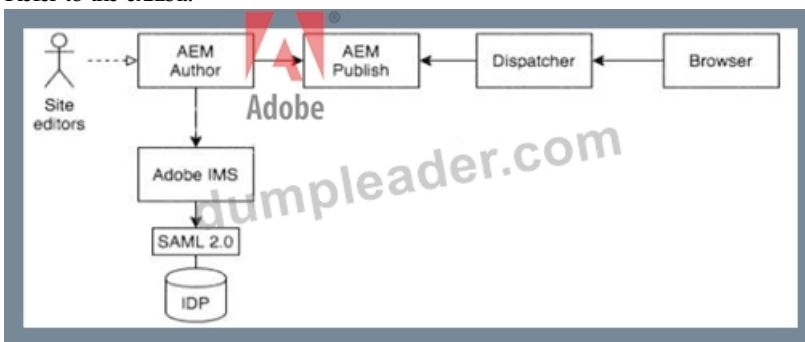

A customer has SSO on its AEM Author environment using Adobe IMS, which is integrated with the customer's IDP using SAML The customer plans to roll out a new secured website on AEM where SSO authentication is required for end users. The end user accounts are also managed in the customer's existing IDP.
How should the Architect set up the authentication for the website?

- A. Set up CUG and use User Synchronisation from Author to Publisher
- B. Integrate AEM Publisher using SAML with Adobe IMS
- C. Integrate AEM Publisher using SAML directly with the IDP
- D. Integrate AEM Publisher using oAuth with Adobe IMS

Answer: C

Explanation:

SAML is a common and standard SSO handler that allows a user to access multiple systems after providing authentication credentials once. AEM ships with a SAML 2.0 Authentication Handler that supports signing and encryption of messages, automatic creation of users, and synching groups to existing ones in AEM3. By integrating AEM Publisher using SAML directly with the IDP, the Architect can leverage the existing user accounts and authentication mechanism for the end users of the secured website.

NEW QUESTION # 84

An enterprise client is on-boarding an AEM Desktop application to provide authors with the ability to load the AEM repository virtually on the file system. The desktop application is unable to connect to the AEM Author, which has SSL enabled. The intermediate certificate is installed on Apache.

How should an Architect resolve this issue?

- A. Install the certificate chain to the keystore of the AEM authentication service user
- B. Install the certificate chain to the keystore of the AEM ssl-service user
- C. Install the certificate chain to the AEM truststore
- D. Install the Root certificate to the AEM truststore

Answer: D

Explanation:
"installing the Root certificate to the AEM truststore can allow AEM Desktop application to connect to AEM Author with SSL enabled".

NEW QUESTION # 85

A client is using AEM and wants to make sure they are managing their configurations correctly. Refer to the following requirements: The client has multiple brands that they will be hosting on a single AEM implementation The client wants to reuse as much between brands as possible Each brand needs to be able to override the default values for items like contact us information The client plans to support multiple languages in multiple regions for each brand Each brand/language/region combination will have its own set of content approvers used as part of a custom workflow Which approach should an Architect recommend to manage the client's configurations for AEM?

- A. Use OSGi Configuration to handle configuration overrides by brand. Create a new workflow for each brand/language/region combination for content approval.
- B. Use Context-aware configurations to manage configuration overrides and approval group by brand/language/region combination.
- C. Use the OOTB Configuration Browser to set configuration defaults and approval group by brand/language/region combination.
- D. Use OSGi to manage approval group and provide default contact us information by runmode.

Answer: D
