Google Cloud Digital Leader Sample Questions (Q52-Q57):

NEW QUESTION # 52
In Google Cloud IAM: if a policy applied at the project level gives you Owner permissions, your access to an individual resource in that project might be restricted to View permission if someone applies a more restrictive policy directly to that resource. What is correct below the options

- A. Not defined by GCP.
- B. True
- C. None of the above.
- D. False

Answer: D

Explanation:
Explanation
Policies are a union of those applied to resources themselves and those inherited from higher levels in the hierarchy. If a parent policy

is less restrictive, it overrides a more restrictive policy applied to the resource. If a parent policy is more restrictive, it does not override a less restrictive policy applied to the resource. Therefore, access granted at a higher level in the hierarchy cannot be taken away by policies applied at a lower level in the hierarchy.

NEW QUESTION # 53
When customer data is uploaded to Google Cloud, who owns the data?

- **A. The customer**
- B. Google
- C. A third party
- D. The customer and Google share ownership

Answer: A

Explanation:
When data is uploaded to Google Cloud, the customer retains full ownership of their data. Google Cloud acts as the data processor, providing the infrastructure and services for storage, but the rights to the data, including access, control, and management, remain with the customer.
Option B: The customer is correct because, according to Google Cloud's data privacy policy, the customer owns their data.

NEW QUESTION # 54
Your organization wants to run a container-based application on Google Cloud. This application is expected to increase in complexity. You have a security need for fine-grained control of traffic between the containers. You also have an operational need to exercise fine-grained control over the application's scaling policies.
What Google Cloud product or feature should your organization use?

- A. Compute Engine virtual machines
- **B. Google Kubernetes Engine cluster**
- C. Cloud Run
- D. App Engine

Answer: B

Explanation:
Google Kubernetes Engine GKE seems a better fit since the requirement is for "security need for fine-grained control of traffic between the containers" and "fine-grained control over scaling policies". Such level of control is easier on GKE that Cloud Run.

NEW QUESTION # 55
Your organization needs to minimize how much it pays for data traffic from the Google network to the internet. What should your organization do?

- A. Choose the Standard network service tier.
- **B. Deploy Cloud VPN.**
- C. Deploy Cloud NAT.
- D. Choose the Premium network service tier.

Answer: B

NEW QUESTION # 56
Your organization is developing and deploying an application on Google Cloud. Tracking your Google Cloud spending needs to stay as simple as possible.

What should you do to ensure that workloads in the development environment are fully isolated from production workloads?

- A. Associate the development resources with their own billing account
- B. Put the development resources in their own project
- C. Associate the development resources with their own network
- D. Apply a unique tag to development resources

Answer: B

Explanation:
Reference:
Project resources are components that are necessary for successful project implementation. They include people, equipment, money, time, knowledge - basically, anything that you may require from the project planning to the project delivery phases.

NEW QUESTION # 57

......
