Dumps4PDF is a reliable and professional leader in developing and delivering authorized IT exam training for all the IT candidates. We promise to give the most valid AZ-305 exam dumps to all of our clients and make the Microsoft AZ-305 exam training material highly beneficial for you. Before you buy our AZ-305 exam torrent, you can free download the AZ-305 Exam Demo to have a try. If you buy it, you will receive an email attached with AZ-305 exam dumps instantly, then, you can start your study and prepare for AZ-305 exam test. You will get a high score with the help of our Microsoft AZ-305 practice training.

The Microsoft AZ-305 also known as Designing Microsoft Azure Infrastructure Solutions is intended for experienced candidates with developed skills and a comprehensive knowledge of IT operations, which include networking, secure, visualization, disaster recovery, identity, business continuity, and governance. The candidates should be able to take a decision and assess the consequences, as well as consider how it affects the common decision. They also should be experienced in Azure development and administration, as well as in DevOps processes. What you need to know more is that this test along with the Microsoft Certified: Azure Administrator Associate certification leads to the Microsoft Certified: Azure Solutions Architect Expert accreditation. The second variant you can choose is to pass exam AZ-303 (retires in March, 2022) together with the AZ-305 test.

Microsoft AZ-305 certification exam is designed for IT professionals who are involved in the design and implementation of Azure infrastructure solutions. AZ-305 Exam Tests the individual's ability to design solutions that meet the business and technical requirements of their organization. AZ-305 exam covers topics such as Azure networking, storage, compute, security, and monitoring. Passing AZ-305 exam validates the candidate's skills and knowledge required for the role of Azure solution architect.

Microsoft AZ-305: Designing Microsoft Azure Infrastructure Solutions is a certification exam designed for professionals who want to demonstrate their skills in designing solutions on the Azure infrastructure. AZ-305 exam is intended for individuals with a strong technical background in Azure and a good understanding of the principles of cloud computing. AZ-305 exam is also suitable for individuals who have experience with designing and implementing Azure solutions.

Preparation AZ-305 Store & Discount AZ-305 Code

Perhaps you plan to seek a high salary job. But you are not confident enough because of lack of ability. Now, our AZ-305 practice guide is able to give you help. You will quickly master all practical knowledge in the shortest time. Also, obtaining the AZ-305 certificate fully has no problem. With the high pass rate of our AZ-305 exam braindumps as 98% to 100%, we can claim that as long as you study with our AZ-305 study materials, you will pass the exam for sure.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q218-Q223):

NEW QUESTION # 218
Hotspot Question
You need to implement the Azure RBAC role assignment. The solution must meet the authentication and authorization requirements. How many assignment should you configure for the Network Contributor role for Role1? To answer, select appropriate in the

answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 219
Hotspot Question
You have an Azure subscription that contains a virtual network named VNET1 and 10 virtual machines. The virtual machines are connected to VNET1. You need to design a solution to manage the virtual machines from the internet. The solution must meet the following requirements:
- Incoming connections to the virtual machines must be authenticated by using Azure Multi-Factor Authentication (MFA) before network connectivity is allowed.
- Incoming connections must use TLS and connect to TCP port 443.
- The solution must support RDP and SSH.
What should you Include In the solution? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:
Box 1: Azure Bastion
Azure bastion client access is authorized and authenticated when trying to log into the Azure portal. You can enable MFA on the Azure portal access by using the Conditional access policy for Microsoft Azure Management.
Box 2: A conditional Access policy that has Cloud Apps assignment set to Azure Windows VM Sign-In You can enforce Conditional Access policies such as multi-factor authentication or user sign-in risk check before authorizing access to Windows VMs in Azure that are enabled with Azure AD sign in. To apply Conditional Access policy, you must select the "Azure Windows VM Sign-In" app from the cloud apps or actions assignment option and then use Sign-in risk as a condition and/or require multi-factor authentication as a grant access control.

NEW QUESTION # 220
You ate designing an Azure governance solution.
All Azure resources must be easily identifiable based on the following operational information environment, owner, department and cost center You need 10 ensure that you can use the operational information when you generate reports for the Azure resources. What should you include in the solution?

- A. Azure Active Directory (Azure AD) administrative units
- B. an Azure data catalog that uses the Azure REST API as a data source
- C. an Azure policy that enforces tagging rules
- D. an Azure management group that uses parent groups to create a hierarchy

Answer: C

Explanation:
You use Azure Policy to enforce tagging rules and conventions. By creating a policy, you avoid the scenario of resources being deployed to your subscription that don't have the expected tags for your organization.
Instead of manually applying tags or searching for resources that aren't compliant, you create a policy that automatically applies the needed tags during deployment.
Note: Organizing cloud-based resources is a crucial task for IT, unless you only have simple deployments. Use naming and tagging standards to organize your resources for these reasons:
Resource management: Your IT teams will need to quickly locate resources associated with specific workloads, environments, ownership groups, or other important information. Organizing resources is critical to assigning organizational roles and access permissions for resource management.

NEW QUESTION # 221
You have an Azure App Service web app named Webapp1 that connects to an Azure SQL database named DB1. Webapp1 and DB1 are deployed to the East US Azure region.
You need to ensure that all the traffic between Weoapp1 and DB1 is sent via a private connection.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 222
You have an Azure subscription.
You need to deploy a relational database. The solution must meet the following requirements:
* Support multiple read-only replicas.
* Automatically load balance read-only requests across all the read-only replicas.
* Minimize administrative effort
What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 223
......

As long as you get to know our AZ-305 exam questions, you will figure out that we have set an easier operation system for our candidates. Once you have a try, you can feel that the natural and seamless user interfaces of our AZ-305 study materials have grown to be more fluent and we have revised and updated AZ-305 learning guide according to the latest development situation.
