People's success lies in their good use of every change to self-improve. Our C-S4CPR-2502 Dumps Torrent files will be the best resources for your real test. If you choose our products, we will choose efficient & high-passing preparation materials.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q15-Q20):

NEW QUESTION # 15

Which of the following document can be used as a reference during invoice entry in sourcing and procurement?

- A. Purchase order
- B. Supplier invoice
- C. Purchase requisition
- D. Material document

Answer: A

NEW QUESTION # 16

In which application can you see the available business context capacity remaining for extension items?

- A. Custom Reusable Elements app
- B. Extensibility Explorer app
- **C. Extensibility Cockpit app**
- D. Extensibility Inventory app

Answer: C

Explanation:

The Extensibility Cockpit app is used to view the available business context capacity remaining for extension items in SAP S/4HANA Cloud Public Edition. This app provides insights into the extensibility limits and helps administrators manage customizations effectively.

* Extensibility Cockpit app (Option A): The Extensibility Cockpit app displays the remaining capacity for custom extensions, such as custom fields, custom logic, and UI adaptations. It ensures that organizations stay within the predefined extensibility limits. The SAP Extensibility Guide confirms this functionality.

* B. Extensibility Inventory app: The Extensibility Inventory app provides an overview of existing extensions but does not show the remaining capacity.

* C. Custom Reusable Elements app: This app is used for managing reusable custom elements, not for tracking extensibility capacity.

* D. Extensibility Explorer app: The Extensibility Explorer app helps identify extensibility options for specific business contexts but does not display capacity limits.

* SAP Extensibility Guide: Explains the role of the Extensibility Cockpit app in managing extensibility capacity. <https://help.sap.com>

* SAP S/4HANA Cloud Extensibility Documentation: Provides details on extensibility tools and their functionalities.

Why Option A is Correct: Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 17

What are some characteristics of public cloud? Note: There are 2 correct answers to this question.

- **A. Multi-tenant server**
- B. Perpetual license
- **C. Lower total cost of ownership**
- D. Software installation on customer site

Answer: A,C

NEW QUESTION # 18

Which functions are available with the SAP Business Accelerator Hub? Note: There are 2 correct answers to this question.

- A. Create APIs
- **B. Search APIs**
- **C. Test APIs**
- D. Transfer APIs

Answer: B,C

NEW QUESTION # 19

Which tasks are mandatory before you can migrate data for a specific object? Note: There are 2 correct answers to this question.

- A. You select the same migration method previously used for other objects
- B. All previous migration projects are in the "Finished" status
- **C. Permission to migrate the data has been assigned**
- **D. Predecessor objects have been migrated**

Answer: C,D

Explanation:

Before migrating data for a specific object in SAP S/4HANA Cloud Public Edition, certain prerequisites must be fulfilled to ensure the migration process is successful and consistent. Based on SAP's official documentation, the following two tasks are mandatory:

- * Predecessor objects have been migrated (Option B): In SAP S/4HANA Cloud Public Edition, many objects have dependencies on other objects. For example, before migrating purchase orders, you must ensure that the related vendor master data and material master data have already been migrated. This ensures referential integrity and avoids errors during the migration process. The SAP Help Portal and SAP Data Migration Guide explicitly state that predecessor objects must be migrated first to maintain data consistency.

- * Permission to migrate the data has been assigned (Option C): To perform data migration, users must have the necessary permissions and roles assigned in the system. These permissions are required to access the migration tools, upload data files, and execute migration projects. Without the appropriate permissions, users will not be able to initiate or complete the migration process. This requirement is documented in the SAP S/4HANA Cloud Security Guide and the SAP Data Migration Best Practices.

- * A. You select the same migration method previously used for other objects: While consistency in migration methods can simplify the process, it is not a mandatory requirement. Different objects may require different migration methods based on their complexity and dependencies. SAP allows flexibility in choosing migration methods for each object.

- * D. All previous migration projects are in the "Finished" status: It is not mandatory for all previous migration projects to be in the "Finished" status before starting a new migration. However, ensuring that predecessor objects are migrated (as stated in Option B) is critical. Some migration projects can run in parallel, provided there are no dependencies between them.

- * SAP Help Portal - Data Migration Overview: Provides an overview of the data migration process, including prerequisites and dependencies. <https://help.sap.com>

- * SAP Data Migration Guide for SAP S/4HANA Cloud Public Edition: Details the steps and prerequisites for migrating data, including the importance of migrating predecessor objects.

- * SAP S/4HANA Cloud Security Guide: Explains the role-based permissions required for performing data migration tasks.

- * SAP Data Migration Best Practices: Outlines best practices for ensuring a smooth and error-free migration process, including permission assignments and dependency management.

Why the other options are incorrect: Key References: By adhering to these verified guidelines, organizations can ensure a seamless and compliant data migration process in SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 20
