- C. act as legislative control on taxing and spending.
- **D. determine debt policy.**

Answer: D

- A. compliance, timeliness, qualifications and due professional care.
- B. supervision, planning, management controls and evidence.
- **C. qualifications, independence, due professional care and quality control.**

- D. planning, internal controls, independence and irregularities.

Answer: C

Explanation:

What Are the Four General Government Auditing Standards?

- * These standards, as defined in the GAO Yellow Book (Government Auditing Standards):
- * Qualifications: Auditors must have the necessary professional skills and competence to perform their work.
- * Independence: Auditors must remain free from personal, external, and organizational impairments to maintain objectivity.
- * Due Professional Care: Auditors must exercise care and diligence, adhering to professional standards and ethical requirements.
- * Quality Control: Auditors must establish and maintain a system of quality control to ensure audit work meets professional standards.

Why Is Option D Correct?

- * These four elements are explicitly outlined in the GAO Yellow Book as the core principles of government auditing standards.

Why Other Options Are Incorrect:

- * A. Compliance, timeliness, qualifications, and due professional care: Timeliness and compliance are not part of the four general standards; they are components of audit objectives.
- * B. Supervision, planning, management controls, and evidence: These are aspects of audit performance, not general standards.
- * C. Planning, internal controls, independence, and irregularities: Planning and internal controls are part of the audit process, not general standards.

References and Documents:

* GAO Yellow Book (Generally Accepted Government Auditing Standards - GAGAS): Lists qualifications, independence, due professional care, and quality control as the four general standards.

* AICPA Audit Standards: Aligns with GAGAS in emphasizing these four principles.

NEW QUESTION # 35

A state had problems with its cash reconciliation resulting in a difference between the total cash per books versus cash balance with banks. The possible loss could only be estimated within a range of \$100 million to \$300 million with no amount within the range considered a better estimate than any other. The state should recognize a minimum liability of

- A. \$200 million and disclose in the notes the exposure to an additional \$100 million loss.
- B. an amount to be determined by external auditors.

- C. \$300 million with no additional disclosure required.
 - D. \$100 million and disclose in the notes the exposure to an additional \$200 million loss.

Answer: D

Explanation:

GASB Statement No. 62 (based on FASB ASC 450-20) provides guidance on recognizing loss contingencies.

If a loss is probable and the amount can only be estimated as a range, and no single amount within the range is better, the minimum amount in the range should be accrued.

The remainder of the range should be disclosed in the notes to the financial statements.

Thus:

Accrue: \$100 million

Disclose: Additional exposure up to \$200 million

Relevant References:

GASB Statement No. 62 - Paragraph 96
