CramPDF allow its valuable customer to download a free demo of Salesforce Certified Tableau Data Analyst Analytics-DA-201 pdf questions and practice tests before purchasing. In the case of Salesforce Analytics-DA-201 exam content changes, CramPDF provides free 365 days updates after the purchase of Salesforce Analytics-DA-201 exam dumps. CramPDF' main goal is to provide you best Salesforce Analytics-DA-201 Exam Preparation material. So this authentic and accurate Salesforce Certified Tableau Data Analyst Analytics-DA-201 practice exam material will help you to get success in Salesforce Certified Tableau Data Analyst exam certification with excellent results.

Salesforce Analytics-DA-201 Exam Syllabus Topics:

Topic	Details
Topic 1	• Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S • 4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.
Topic 2	• ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S • 4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP.

Topic 3	• ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud.

They have verified all Analytics-DA-201 exam questions one by one and ensured the top standard of Salesforce Analytics-DA-201 practice test questions.

Salesforce Certified Tableau Data Analyst Sample Questions (Q92-Q97):

NEW QUESTION # 92
A Data Analyst has the following worksheet, with Profit data for Categary and Sub-Categury.

The analyst executed the following calculated field at the Total level:
COUNTD(IF (INCLUDE [Sub-Category]: SUM([Profit]) < 0 THEN [Category] END) What is the result?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

NEW QUESTION # 93
A Data Analyst has the following primary data source that contairis a dimension named Dorm_Code.

The analyst receives the following secondary data source that contains updated dorm codes.

Dorm_Name	Dorm_Code_New
Hawthorne	A1
salesforce	A2
Michaels	A3
Rogers	A4
Mazy	A5
Carreroon	A6
Kemmins	A7
...	...

The analyst needs to bring the updated dorm codes into Tableau and use the codes in existing visualizations.
The new dorm codes must use the existing field name of Dorm_Code.
What should the analyst do?

- A. Create a data blend and select Edit Primary Aliases to replace the primary data source alias values with values from the

secondary data source.

- B. Bring in the secondary data source as a union.
- C. Bring in the secondary data source by using relationships. From the Data pane, right-click Dorm_Name, select Replace References, and then select Dorm Name New.
- D. Bring in the secondary table as a left join to the primary data source. From the Data Source page, select Create Calculated Field in the Dorm_Name field and enter [Dorm_Name_New] in the calculation window.

Answer: C

NEW QUESTION # 94

How should a Data Analyst sort data by Sales across multiple dimensions in Tableau?

- A. Right-click on each dimension, choose Sort, then select data source order in the options.
- B. Right-click on the rightmost dimension, choose Sort, then select nested in the options.
- C. Use the Sets feature to combine dimensions and then sort one of the fields.
- D. Use the Group feature to combine dimensions and then sort the grouped field.

Answer: B

NEW QUESTION # 95

You have a dashboard that contains a parameter named Start Date.
You need to create an extract from a Microsoft Excel file. The extract must be filtered based on Start Date.
What should you do?

- A. Create a data source based on the Excel worksheet and create a calculated field based on Start Date. From the Data pane, add the calculated field to the data source filter
- B. Create a data source based on the Excel worksheet and create a calculated field based on Start Date. Add the calculated field to the extract filter.
- C. Create a custom SOL query to define the data source and create a calculated field based on Start Date. Add the calculated field to the extract filter.
- D. Create a custom SOL query that references Stan Date in the WHERE clause.

Answer: B

NEW QUESTION # 96

You have the following chart that shows profits and discounts over time.
You need to combine the lines to appear as shown in the following chart.
What should you do?

- A. Set Discount to Dual Axis
- B. Drag Discount to Color on the Marks card
- C. Convert Discount to Discrete
- D. Drag Discount to the Columns shelf

Answer: A

Explanation:
To combine the lines to appear as shown in the second chart, you should set Discount to Dual Axis. Dual Axis is a feature that allows you to show two measures on two separate axes on one chart. You can create a dual axis by right-clicking on a measure on any shelf and selecting Dual Axis from the menu. This will create two axes on one chart and synchronize their scales.
In this case, you want to show Profit and Discount on two separate axes on one chart. You can right-click on Discount on any shelf and select Dual Axis from the menu. This will create a dual axis chart that shows Profit and Discount as two lines with different colors.
The other options are not correct for this scenario. Dragging Discount to Color on the Marks card will change the color of Profit based on Discount, but it will not show two lines. Converting Discount to Discrete will change Discount from a green pill to a blue pill, but it will not affect how it appears on the chart. Dragging Discount to Columns shelf will create two separate charts for Profit and Discount, but it will not combine them.
