It is more convenient for you to study and practice anytime, anywhere. All you need is an internet explorer. This means you can practice for the C-TS414-2023 Exam with your I-pad or smart-phone. Isn't it wonderful?

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q28-Q33):

NEW QUESTION # 28
You must assign a certification profile for outgoing certificates to key combination. What key combination that require no adjustment does SAP QM prove

- A. Material /Customer, Material Material type
- B. Material /Customer, Material Material group
- C. Customer, Material, Material group
- D. Material , Customer, Material group

Answer: D

NEW QUESTION # 29
Which characteristic categories are allowed in the certificate profile? Note: There are 2 correct answers to this question.

- A. Class characteristic
- B. Process instruction characteristic
- C. Inspection characteristic
- D. Master inspection characteristic

Answer: A,D

Explanation:
Certificate profiles in SAP QM (transaction QC01) define the data included in outgoing quality certificates.
The characteristic categories allowed are:
* Master Inspection Characteristic (A): MICs (transaction QS21) are used in inspection plans and material specs, and their results can be included in certificate profiles to report quality data (e.g., measured values).
* Class Characteristic (B): Class characteristics (from the Classification System, transaction CT04) are linked to batches or materials and can be included in certificate profiles to display classification data (e.
g., batch properties).
* Inspection Characteristic (C): This term refers to characteristics in an inspection lot/plan but is not a distinct category; it's covered by MICs, so it's not separately selectable.
* Process Instruction Characteristic (D): Used in Process Industries (PI) for production, not applicable to QM certificate profiles in standard SAP.
Thus, "Master inspection characteristic" and "Class characteristic" are the correct answers.References: SAP Help Portal - "Quality Certificates - Certificate Profiles"; SAP S/4HANA QM User Guide - "Outgoing Certificates".

NEW QUESTION # 30
Which of the following can you set up in a certificate profile for outgoing quality certificates? Note: There are
2 correct answers to this question.

- A. The inspection operations to be executed
- B. The characteristics to be inspected

- C. The print sequence of characteristics
- D. The print layout

Answer: C,D

Explanation:
Certificate profiles for outgoing certificates (transaction QC01) define certificate content:
* The Print Sequence of Characteristics (A): In the certificate profile, you set the order of characteristics (e.g., MICs or class characteristics) to appear on the certificate (SPRO > QM > Quality Certificates > Outgoing > Define Certificate Profiles).
* The Print Layout (C): The profile links to a form (e.g., via SAPscript or Smart Forms), defining the layout of the printed certificate.
* The Characteristics to be Inspected (B): Characteristics are selected, not inspected, within the profile; inspection occurs in lots.
* The Inspection Operations to be Executed (D): Operations are part of plans, not certificate profiles.
Thus, "The print sequence of characteristics" and "The print layout" are the correct answers. References: SAP Help Portal - "Certificate Profiles for Outgoing Certificates"; SAP S/4HANA QM User Guide - "Quality Certificates".

NEW QUESTION # 31

When an inspection plan includes multiple group counter, what determines the unit of measure ?

- A. lot size
- B. Usage
- C. Sampling procedure
- D. Material master

Answer: B

NEW QUESTION # 32

Which inspection origin creates only unplanned physical samples?

- A. 15 sample management
- B. 16 stability study
- C. 3 production
- D. 2 goods issue

Answer: A

NEW QUESTION # 33

......
