SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Topic 3	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Admirable C_ACDET_2506 Exam Questions: SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite bring you reliable Guide Materials

People who want to pass the exam have difficulty in choosing the suitable C_ACDET_2506 guide questions. They do not know which study materials are suitable for them, and they do not know which the study materials are best. Our company can promise that the C_ACDET_2506 study materials from our company are best among global market. As is known to us, the C_ACDET_2506 Certification guide from our company is the leading practice materials in this dynamic market. All study materials from our company are designed by a lot of experts and professors. In addition, these experts and professors from our company are responsible for constantly updating the C_ACDET_2506 guide questions.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q14-Q19):

NEW QUESTION # 14

You need to revise a published form template.
What steps do you follow?

- A. Clone and change ID
- **B. Create a new version, edit, test, and publish**
- C. Edit directly in production
- D. Delete and recreate

Answer: B

NEW QUESTION # 15

Which data elements are shared in a Suite-Integrated Environment? (Select 3 correct answers)

- **A. Users**
- **B. Suppliers**
- **C. User Group mapping**
- D. Supplier Catalogs
- E. Exception Types

Answer: A,B,C

Explanation:

In a Suite-Integrated SAP Ariba environment, master data elements such as Suppliers, Users, and User Group mappings are shared across sourcing and procurement modules, enabling unified access and data consistency. Supplier Catalogs and Exception Types are not typically shared master data in this context. This integration supports seamless workflows and consistent security roles, enhancing usability and governance.

NEW QUESTION # 16

How can you create a field label with Italics?

- A. By selecting the option "Italic label"
- B. Find the correct folder
- C. By using standard HTML formatting like `<i>label</i>` can be added to the field label
- D. Formatting of a field label is not possible
- E. By marking the text in the field and selecting Ctrl-I

Answer: C

Explanation:

In SAP Ariba, field labels themselves do not support rich text formatting directly in the UI, meaning you cannot use Ctrl-I or a specific "Italic label" toggle to style the label. However, SAP allows the use of basic HTML tags, including `<i>` for italics, in help tip text or validation/error message text associated with fields. By embedding HTML tags like `<i>...</i>`, administrators can add italicized text in these auxiliary field descriptions, enhancing clarity and user guidance.

This is because SAP Ariba's UI rendering engine processes simple HTML in certain field-related text areas but treats field labels as plain text for consistency and localization reasons.

Therefore, the correct method for italicizing field-related text is using HTML tags in Help Tips or validation messages, not in the label itself.

This behavior is documented in SAP Ariba configuration best practices, emphasizing limited HTML support to maintain UI integrity and accessibility standards.

NEW QUESTION # 17

Which data elements are shared in a Suite-Integrated Environment? Note: There are 3 correct answers to this question.

- A. Users
- B. Suppliers
- C. Supplier Catalogs
- D. Exception Types
- E. User Group mapping

Answer: A,B,D

NEW QUESTION # 18

You want to apply a preset filter to a custom field so that it only shows valid values based on the value of another field. What do you use to apply predefined filter criteria for a field?

- A. Populate the "Relation Name" and "NameTableConstraintFieldPath" in the Advanced tab
- B. Enable field property "Use relationship chooser" in the Advanced tab
- C. Enable field property "Enable for Template Field Setter" in the Advanced tab
- D. Define a Visibility Condition in the Conditions tab
- E. Load Relation types and Relation entries

Answer: A

NEW QUESTION # 19

.....
