## SAP C\_S4PM2\_2507 Quiz - C\_S4PM2\_2507 Studienanleitung & C\_S4PM2\_2507 Trainingsmaterialien

In den letzten Jahren ist die SAP C\_S4PM2\_2507 Zertifizierungsprüfung schon eine der einflussreichsten Zertifizierungsprüfung in Bezug auf das Computer geworden. Aber wie kann man die SAP C\_S4PM2\_2507 Zertifizierungsprüfung mühelos bestehen? Unser ExamFragen kann Ihnen immer helfen, dieses Problem schnell zu lösen, indem wir Ihnen die C\_S4PM2\_2507 Schulungsunterlagen zu C\_S4PM2\_2507 Zertifikationsprüfung anbieten. Die Inhalte der C\_S4PM2\_2507 Zertifizierungsprüfung bestehen aus den neuesten Prüfungsmaterialien von den IT-Fachleuten.

### SAP C\_S4PM2\_2507 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> <li>Organizational Change Management: This section of the exam evaluates the expertise of Change Management Specialists and focuses on managing SAP implementation's human and organizational aspects. It covers stakeholder engagement, communication planning, and resistance management. The goal is to ensure that candidates understand how to prepare, support, and sustain organizational readiness during digital transformation projects driven by SAP technologies.</li> </ul>
Thema 2	<ul style="list-style-type: none"> <li>Project Management: This section of the exam assesses the capabilities of SAP Project Leads and focuses on the project management principles required to execute successful SAP implementations. It includes planning, scope management, risk assessment, stakeholder coordination, and performance monitoring. Candidates are expected to apply project management techniques that ensure timely delivery, resource optimization, and alignment with SAP Activate and Rise methodologies.</li> </ul>

Thema 3	<ul style="list-style-type: none"> <li>• Rise with SAP Methodology: This domain measures the skills of SAP Solution Architects and covers the Rise with SAP approach that supports customers in their business transformation journey. It focuses on understanding SAP's Business Transformation as a Service (BTaaS) model, key components such as business process intelligence, cloud infrastructure, and the transformation framework. Candidates are expected to understand how to align the Rise with SAP methodology with customer-specific business goals and outcomes.</li> </ul>
Thema 4	<ul style="list-style-type: none"> <li>• Implementing S</li> <li>• 4HANA Cloud Private Edition: This domain assesses the skills of SAP Implementation Consultants and focuses on deploying and configuring the SAP S</li> <li>• 4HANA Cloud Private Edition. It includes understanding system architecture, integration scenarios, data migration strategies, and extensibility options. Candidates must demonstrate their ability to manage deployment processes and use available tools to ensure smooth migration from legacy systems to S</li> <li>• 4HANA Cloud Private Edition.</li> </ul>
Thema 5	<ul style="list-style-type: none"> <li>• SAP Activate Methodology: This section of the exam measures the skills of SAP Project Managers and covers the fundamental principles of the SAP Activate Methodology used for implementing S</li> <li>• 4HANA solutions. It focuses on the agile project delivery framework, including phases such as Prepare, Explore, Realize, and Deploy. Candidates are tested on their ability to apply best practices, accelerators, and guided configuration tools to ensure a structured and efficient implementation approach.</li> </ul>

## SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects C\_S4PM2\_2507 Prüfungsfragen mit Lösungen (Q12-Q17):

### 12. Frage

Which functions of the System View Dashboard in SAP Cloud ALM help maintain a clean core and support upgrades for SAP S/4HANA? Note: There are 3 correct answers to this question.

- A. Performance Benchmarking: Compare performance against Industry Peers.
- B. Version insights: Ensure your installed SAP S/4HANA product version is up to date.
- C. Detailed Cost Analysis of Upgrades: Provide detailed cost breakdown and cost analysis.
- D. Tool readiness: Verify that essential tools for clean-core data collection are active (for example, SAP EarlyWatch Alerts).
- E. Upgrade preparation: Assess your current extensions to anticipate and mitigate potential upgrade risks.

**Antwort: B,D,E**

Begründung:

Step 1 - Understanding the question

This question asks about the System View Dashboard in SAP Cloud ALM and how it helps maintain a clean core and support upgrades for SAP S/4HANA.

A "clean core" means keeping the SAP system as standard as possible, reducing unnecessary custom code or modifications that can complicate upgrades.

Step 2 - Evaluate each option

Option A: Upgrade preparation: Assess your current extensions to anticipate and mitigate potential upgrade risks.

This is correct.

The System View Dashboard helps identify extensions and modifications that might impact system upgrades.

It provides visibility into the system landscape and highlights potential upgrade risks due to custom code or integrations.

Option B: Detailed Cost Analysis of Upgrades: Provide detailed cost breakdown and cost analysis.

This is incorrect.

The System View Dashboard does not perform cost analysis. Its purpose is monitoring system health, readiness, and upgrade-related insights, not financial evaluation.

Option C: Performance Benchmarking: Compare performance against industry peers.

This is incorrect.

Performance benchmarking is not part of the System View Dashboard. It focuses on system version, tool readiness, and upgrade preparation, not performance comparisons.

Option D: Tool readiness: Verify that essential tools for clean-core data collection are active (for example, SAP EarlyWatch Alerts).

This is correct.

The dashboard checks whether key monitoring and analysis tools-like SAP EarlyWatch Alerts or other SAP monitoring services-are active.

These tools provide valuable data to support clean-core management and help ensure system stability before and after upgrades.

Option E: Version insights: Ensure your installed SAP S/4HANA product version is up to date.

This is correct.

The dashboard provides insights into the installed product version, ensuring that the system is on a supported release and highlighting if an upgrade is due.

This directly supports upgrade planning and helps keep the core system clean and current.

Step 3 - Final Answer

The correct answers are A. Upgrade preparation, D. Tool readiness, and E. Version insights.

### 13. Frage

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. Target customer go-live date
- B. SAP Fiori application extensions
- C. Business role requirements
- D. Known integration requirements

**Antwort: C,D**

Begründung:

The Digital Discovery Assessment (DDA) is part of the early discovery and scoping process for SAP S/4HANA Cloud projects. It captures the customer's business priorities, scope, and key requirements to support solution design and project planning.

A). Known integration requirements

The assessment records any known or expected integration requirements, helping identify connections to other systems or external applications early in the project.

B). Business role requirements

It also captures business role requirements to define which roles and user responsibilities are needed to support the processes included in the solution scope.

Other options:

\* C. SAP Fiori application extensions: These are identified later in the design phase, not during DDA.

\* D. Target customer go-live date: This may be noted in project planning but is not part of the formal DDA deliverables.

### 14. Frage

What can you find in the SAP Fiori apps reference library? Note: There are 3 correct answers to this question.

- A. Installation and configuration requirements for selected apps
- B. Related app-specific solution design guidelines
- C. Shortcut to the Quicksizer tool to estimate hardware requirements
- D. Related app recommendations based on your usage profile
- E. Shortcut to the Maintenance Planner tool to establish the technical update path

**Antwort: A,B,D**

Begründung:

Step 1 - Understanding the question

This question refers to the SAP Fiori Apps Reference Library, which is the official tool provided by SAP to explore all Fiori applications available for SAP S/4HANA.

It includes detailed information such as functional scope, technical components, installation requirements, and related app recommendations.

Step 2 - Evaluate each option

Option A: Related app-specific solution design guidelines

This is correct.

The Fiori Apps Reference Library provides design guidelines and best practices for specific Fiori apps, including navigation patterns and user experience notes.

Option B: Shortcut to the Maintenance Planner tool to establish the technical update path This is incorrect.

The library does not provide direct access to the Maintenance Planner tool. Maintenance Planner is accessed through SAP Support Portal, not the Fiori Apps Library.

Option C: Installation and configuration requirements for selected apps

This is correct.

Each app entry provides installation, configuration, and authorization requirements, including business catalogs, roles, and software components.

Option D: Shortcut to the Quicksizer tool to estimate hardware requirements This is incorrect.

The Quicksizer tool is separate and used for system sizing; it is not part of the Fiori Apps Reference Library.

Option E: Related app recommendations based on your usage profile

This is correct.

The library provides related app recommendations, showing which other apps are commonly used together or complement the selected one.

### 15. Frage

You are preparing for an SAP S/4HANA Cloud Private Edition implementation project. What do you find in the Roadmap Viewer? Note: There are 2 correct answers to this question.

- A. Solution process setup instructions
- **B. Clean Core quality gates**
- **C. Tasks and deliverables to complete each phase**
- D. Business process flows

**Antwort: B,C**

### 16. Frage

How do you move extensions between SAP S/4HANA Cloud Private Edition systems? Note: There are 2 correct answers to this question.

- **A. Assign items to a software collection**
- **B. Import the collection**
- C. Assign items to a software package
- D. Mark items relevant for transport

**Antwort: A,B**
