## C\_BCBAl\_2502 Materials | Exam C\_BCBAl\_2502 Labs

This is similar to the C\_BCBAl\_2502 desktop format but this is browser-based. It requires an active internet connection to run and is compatible with all browsers such as Google Chrome, Mozilla Firefox, Opera, MS Edge, Safari, Internet Explorer, and others. The SAP C\_BCBAl\_2502 Mock Exam helps you self-evaluate your SAP C\_BCBAl\_2502 exam preparation and mistakes. This way you improve consistently and attempt the C\_BCBAl\_2502 certification exam in an optimal way for excellent results in the exam.

### SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q54-Q59):

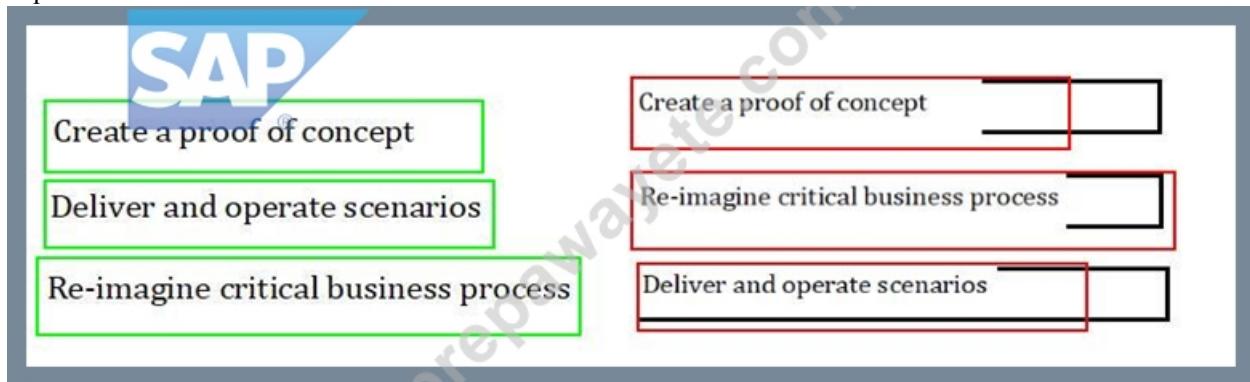

#### NEW QUESTION # 54

In Custom AI Adoption (CAIA) with SAP, what is the correct order of steps?

**Answer:**

Explanation:

#### NEW QUESTION # 55

A manufacturing firm wants to use AI to predict machine failures and optimize maintenance schedules. Which SAP solutions should they implement?

There are 3 correct answers to this question.

Response:

SAP Predictive Maintenance

- A. SAP AI Business Services
- B. SAP Conversational AI
- C. SAP Blockchain for Business
- D. SAP Digital Manufacturing Cloud

**Answer: A,B,D**

### NEW QUESTION # 56

A retail business wants to use AI for automating customer support while ensuring personalized customer interactions. Which SAP AI solutions should they implement?

There are 3 correct answers to this question.

Response:

- A. SAP AI for Customer Experience
- B. SAP Conversational AI
- C. SAP Blockchain for Business
- D. SAP AI Business Service
- E. SAP Predictive Analytics

**Answer: A,B,D**

### NEW QUESTION # 57

(What are some generative AI capabilities in SAP Build Process Automation? Note: There are 3 correct answers to this question.)

- A. AI-driven recommendations
- B. AI-driven generation of test scripts for automations
- C. AI-driven document information extraction
- D. AI-powered conversion of BPMN diagrams into automations
- E. AI-powered process artifact generation

**Answer: A,B,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Generative AI capabilities in SAP Build Process Automation include AI-powered generation of process artifacts such as processes, decisions, forms, and script tasks; AI-driven generation of test scripts for automations to accelerate testing; and AI-driven recommendations for optimizing automations and next best actions.

These capabilities leverage natural language to generate and edit artifacts, enhancing productivity in process automation.

Exact extracts supporting this:

AI-powered process artifact generation: "You can use generative AI in SAP Build Process Automation to generate a business process, decisions, forms, and script tasks." help.sap.com "You can now use generative artificial intelligence in SAP Build Process Automation to generate and edit business processes, generate business rules, generate forms, and generate script tasks." community.sap.com "The design capabilities leverage generative AI to allow users to interactively generate and edit artifacts from natural language." community.sap.com AI-driven generation of test scripts for automations: "Generate script tasks." community.sap.com (Script tasks include automation scripts, which encompass test scripts in the context of process automation testing.) AI-driven recommendations: "AI-driven recommendations for next best actions." community.sap.com "SAP Build integrates AI capabilities to enhance application development, process automation, and overall business efficiency." community.sap.com Other options are incorrect because:

Option A: While BPMN diagrams are used in process modeling (e.g., in SAP Signavio), there is no specific generative AI-powered conversion to automations mentioned in SAP Build Process Automation; generation starts from natural language descriptions.

Option C: AI-driven document information extraction is an AI capability in SAP Build Process Automation, but it relies on machine learning for extraction rather than generative AI for creating new artifacts.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP Help Portal documentation for "Generative AI - SAP Build Process Automation" and community blogs like "SAP Build Brings Generative AI to Process Automation." These position generative AI in SAP Build as a tool for artifact generation and recommendations within the SAP Business Suite, as covered in SAP Learning journeys for enterprise automation and the C\_BCAI\_2502 certification for custom AI in business processes.

### NEW QUESTION # 58

Which SAP solution provides a centralized platform for tracking sustainability performance? Please choose the correct answer.

- A. SAP Extended Warehouse Management
- B. SAP Sustainability Control Tower
- C. SAP Business One
- D. SAP Fieldglass

**Answer: B**

## Explanation:

SAP Sustainability Control Tower is the centralized platform for tracking and managing sustainability performance across an organization. The correct answer is SAP Sustainability Control Tower, as it is explicitly designed for this purpose.

SAP documentation highlights: "SAP Sustainability Control Tower provides a centralized platform to track, measure, and manage sustainability performance, enabling organizations to achieve their environmental, social, and governance (ESG) goals." It supports "real-time monitoring of sustainability metrics, such as carbon emissions, energy consumption, and waste management," and integrates with other SAP solutions to provide a holistic view of sustainability performance. For example, it enables companies to "set and track sustainability KPIs" and "report on ESG compliance," aligning with global standards.

The incorrect options are not relevant to sustainability performance tracking. SAP Extended Warehouse Management focuses on logistics and inventory management. SAP Business One is an ERP solution for small businesses, not specifically for sustainability. SAP Fieldglass manages contingent workforce and services, not sustainability metrics. SAP Sustainability Control Tower's role in SAP's sustainability portfolio confirms its suitability as the centralized platform

## NEW QUESTION # 59

.....

Our C\_BCBAl\_2502 training dumps are deemed as a highly genius invention so all exam candidates who choose our C\_BCBAl\_2502 exam questions have analogous feeling that high quality our practice materials is different from other practice materials in the market. So our C\_BCBAl\_2502 study braindumps are a valuable invest which cost only tens of dollars but will bring you permanent reward. So many our customers have benefited from our C\_BCBAl\_2502 preparation quiz, so will you!
