The Microsoft AZ-140 exam measures the candidates' knowledge and expertise in various areas of Azure Virtual Desktop, such as configuring host pools, managing session hosts, creating and managing virtual machines, configuring user access, and monitoring and troubleshooting Azure Virtual Desktop environments. AZ-140 Exam also covers topics related to security and compliance, such as implementing Azure policies, configuring role-based access control, and managing Azure Active Directory.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q263-Q268):

NEW QUESTION # 263

You have a hybrid Azure Active Directory (Azure AD) tenant.

You plan to deploy an Azure Virtual Desktop personal host pool. The host pool will contain 15 virtual machines that run Windows 10 Enterprise. The virtual machines will be joined to the on-premises Active Directory domain and used by the members of a domain group named Department1.

You need to ensure that each user is added automatically to the local Administrators group on the virtual machine to which the user signs in.

What should you configure?

- A. a policy preference in a Group Policy Object (GPO)
- B. a role assignment for each virtual machine
- C. a role assignment for the host pool
- D. a device setting in Azure AD

Answer: A
